Mystery Files:

Andromeda: The Secret Files David Hatcher Childress, 2021-11-01 David Childress popular author and star of the History Channel show *Ancient Aliens* brings us the amazing story of the German Andromeda craft designed and built during WWII. Along with flying disks the Germans were making long cylindrical airships that are commonly called motherships, large craft that house several smaller disk craft. It was not until 1989 that a German researcher named Ralf Ettl, living in London, received an anonymous packet of photographs and documents concerning the planning and development of at least three types of unusual craft, including the Andromeda. Ettl went on to make several television documentaries based on the material in the packet and released most of the documents and photos to researchers in Austria and other parts of Europe. What the Ralf Ettl document dump shows us is what many have suspected for a long time: that WWII did not end in the manner in which we have been told, and a remnant of the Nazi military, particularly the SS, continued to operate aircraft and submarines around the world in the decades after the end of the war. Much of this activity has been attributed to UFO activity, but Childress lifts the veil shrouding some of these cases and shows that Andromeda and Haunebu craft were involved in many of these incidents over the decades. Join Childress as he shows us the secret files involving the Andromeda, Haunebu, and Vril craft. Chapters include Gravity's Rainbow, The Motherships, The MJ-12 UFOs, and the Korean War. The Strange Case of Reinhold Schmidt, Secret Cities of the Winged Serpent, The Green Fireballs, Submarines That Can Fly, The Breakaway Civilization, more. Includes a 16-page color section, over 120 photographs and diagrams. **MH370 The Secret Files - At Last...The Truth Behind the Greatest Aviation Mystery of All Time** Nigel Cawthorne, 2016-03-03 On March 8, 2014, Malaysia Airlines Flight 370 took off from Kuala Lumpur International Airport bound for Beijing. Less than an hour after take-off somewhere over the South China Sea, the plane simply vanished. One eyewitness saw a burning object crash into the sea. But confusing radar signals trace tracked an aircraft taking an erratic course across the Malaysian peninsula, then on to the Andaman Sea. Did it crash there? Or did it fly on to land safely in disputed lands of Central Asia or the top secret CIA black site on Diego Garcia? Two years later, the Australians are still searching at the cost of billions and have found nothing. Was the search in such a remote place part of a cover-up to distract the world's attention because the US Navy had in fact shot the plane down? The answer must be out there. Or perhaps hidden within the pages of the secret files. **LOST in Media** Benjamin Beil, Lorenz Engell, Jens Schröter, Herbert Schwaab, Daniela Wentz, 2018-02-21 The television series *LOST* initiated a wide-ranging academic debate which centered on its narrative and temporal complexity while also addressing the massive expansion into other media and consequently crossing established genre categories. This expansion poses the essential question about the status of the original medium television within recent multiple media configurations. Can *LOST* be regarded as a symptom of television in the process of media change? What is the relation between *LOST*'s temporality and that of television in general? And how can *LOST* be understood as a phenomenon of mediatized worlds? The contributions in
