*Germinal* de Émile Zola, 1985 The Great Chiasmus Paul R. Olson, 2003 In *The Great Chiasmus* Paul R Olson explores the use of the chiasmus in the work of Miguel de Unamuno The chiasmus a reversal in the order of words or parts of speech in parallel phrases appears on a variety of levels from brief microstructures blanca como la nieve y como la nieve fría to the narrative structures of entire novel Olson even suggests the chiasmus encompasses the stages in Unamuno's novelistic work forming a chiasmus that can be schematized as ABC CBA As a phenomenon of enclosure the chiasmus is related to other enclosing phenomena such as the image of Chinese boxes and the mise en abyme These structures three dimensional version of the chiasmus are also frequent in Unamuno's texts The chiasmus is also found on the conceptual level in which Unamuno regards apparent contraries as freely reversible and thus identical From early adulthood he was fascinated by the Hegelian idea of the identity of pure Being and pure Nothingness and that concept provides the structure underlying a wide variety of his paradoxes and verbal conceits In this connection Unamuno explores concepts usually considered opposites such as mind and body or spirit and matter Olson's close readings of the texts in terms of this structure lead to observations on Spanish history events in Unamuno's life the psychological dimensions of his characters and the authorial self that is found within his texts
