Nonprofits in Urban America Cynthia Jackson-Elmoore, Richard C. Hula, 2000-09-30 From their experience in nonprofit operations and their understanding of the realities of urban politics the editors of this wide ranging volume and their contributors dig into issues seldom explored in the literature They study the role of nonprofits in local governing coalitions the potential of nonprofits to replace social welfare programs their efforts to restructure key elements of the local political process and the unanticipated internal impacts of the changing roles of nonprofit organizations in the urban community The result is a compelling argument that to understand life in contemporary American cities we must take into account the expanding role of nonprofit organizations their response to increased service demands and their participation in common efforts to direct policy choices Hula Jackson Elmoore and their panel of scholars researchers and close observers of urban policymaking focus on the delivery of social services to illustrate the complex and important set of roles that nonprofits have

assumed As social programs are cut at all levels of government it is often believed that nonprofits can and should take up the slack and restore at least some portion of the cutbacks in such services They examine how some nonprofit organizations have taken a proactive stance in this regard by implementing efforts that do not simply react to political and social change but attempt to initiate and guide it instead They attempt to change the political environment in which they operate and the result has been to change the face of local politics in many jurisdictions Each chapter of their book explores these expanding and emerging roles Themes and focuses vary which in turn reflects the variation and complexity within the nonprofit sector itself At the same time each chapter presents an emerging political or policy role now being played by today s nonprofits and voluntary associations and a theoretical context in which such activities and behavior can best be understood Scholars and advanced students in public administration economics and nonprofit management as well as executive level nonprofit managers will find here an important update on what is happening in their special worlds and the knowledge they need to make sense of it

[The Regulation of Organised Civil Society](#) Jonathan Garton, 2009-06-25 Although much has been written on organised civil society the loose collective of organisations that operate outside the public sector the private market and the family unit over the past 30 years there has been little jurisprudential analysis This is in spite of the fact that a number of jurisdictions including England New Zealand Northern Ireland and Scotland have recently implemented major reforms to the regulatory frameworks in which civil society organisations operate with a particular emphasis on the charitable sectors Redressing the balance this monograph considers from first principles when it is appropriate to regulate organised civil society and how that regulation might best be accomplished Four broad issues are addressed a whether the activities undertaken by civil society organisations are distinct from the activities undertaken by the state or the market either because they are pursued in unique ways or because they produce unique outcomes b if so whether it is justifiable to regulate organised civil society activities in a sector specific way c if it is whether the peculiar characteristics of these activities make one type of regulation more appropriate than another and d whether it is appropriate to distinguish between charities and other civil society organisations for regulatory purposes The monograph integrates the traditionally separate disciplines of civil society theory and regulation theory to provide answers to these questions and advance a rudimentary theory of regulation specific to organised civil society
