and Quality Teaching Terence Lovat, Ron Toomey, 2009-04-07 Some revision of public schooling history is necessary to challenge the dominant mythology that public schools were established on the grounds of values neutrality In fact those responsible for the foundations of public education in Australia were sufficiently pragmatic to know that its success relied on its charter being in accord with public sentiment Part of the pragmatism was in convincing those whose main experience of education had been through some form of church based education that state based education was capable of meeting the same ends Hence the documents of the 1870s and 1880s that contained the charters of the various state and territory systems witness to a breadth of vision about the scope of education Beyond the standard goals of literacy and numeracy

education was said to be capable of assuring personal morality for each individual and a suitable citizenry for the soon to be new nation As an instance the NSW Public Instruction Act of 1880 of NSW 1912 under the rubric of religious teaching stressed the need for students to be inculcated into the values of their society including understanding the role that religious values had played in forming that society's legal codes and social ethics The notion therefore that public education is part of a deep and ancient heritage around values neutrality is mistaken and in need of serious revision The evidence suggests that public education's initial conception was of being the complete educator not only of young people's minds but of their inner character as well

Moral and Political Values in Teacher Education over Time Nick Mead, 2022-08-19 This collection brings together international teacher educators to employ a long view of an historic and values based dialectic in teacher education The authors reflect how employing historical consciousness to look back can offer greater continuity to teachers moral and political values within their training The book draws on research from experienced teacher educators representing different historical social and political contexts in North America Europe Asia as well in post conflict South Africa Within each section the authors reflect on the development of the moral and political values of pre service and in service teachers in an era of global neo liberalism and how this is inextricably bound up with the narratives of professionals in the past within their own national context Each chapter takes a long view of the role of historical consciousness in informing the moral and political values of pre service and in service teachers providing examples of how international teacher educators can collectively support one another in restoring a vibrant values based dialectic within the processes pedagogies and provision of university and school based training for which they are responsible The long view approach offers a compelling argument for the need to connect pre service and in service teachers values and narrative to the legacy of professionals of the past *Moral and Political Values in Teacher Education over Time* will be of great interest to researchers academics and students in teacher education comparative education and the history of education It will also be of interest to international university and school based teacher educators and policymakers in the field

Discourses of Globalisation, Cultural Diversity and Values Education Joseph Zajda, 2023-03-10 This book examines dominant discourses in values education globally It critiques dominant discourses and debates pertaining to values education and cultural identity set against the current backdrop of growing social stratification and unequal access to quality education

It addresses discourses concerning globalisation ideologies and the state as well as approaches to values education in schools. The book explores the ambivalent and problematic connections between the state, globalisation and values education. It also explores conceptual frameworks and methodological approaches applicable to research on values education, multiculturalism and identity politics. Drawing on diverse paradigms ranging from critical theory to globalisation, the book focuses on globalisation ideology and values education and critically examines recent research dealing with cultural diversity and its impact of identity politics. Given the need for a multiple perspective approach, authors from diverse backgrounds offer a wealth of insights contributing to a more holistic understanding of the nexus between values education, multiculturalism and national identity. With contributions from key scholars worldwide, the book should be required reading for a broad spectrum of users including policy makers, academics, graduate students, education policy researchers, administrators and practitioners.

Values in Sex Education J. Mark Halstead, Michael Jonathan Reiss, 2003. An accessible yet authoritative book situating sex education both in the primary and secondary school within the current focus on values and citizenship. Education in Values Esther Joos Esteban, 1990. Second International Research Handbook on Values Education and Student Wellbeing Terence Lovat, Ron Toomey, Neville Clement, Kerry Dally, 2023-12-02. This collection applies the principles underlying values education to addressing the many social and learning challenges that impinge on education today. Insights in the fields of social and emotional learning, student wellbeing and increasingly educational neuroscience have demonstrated that values education represents an efficacious pedagogy with holistic effects on students across a range of measures including social, emotional and intellectual outcomes. With schools in the 21st century confronting issues such as gender identity, stemming radicalism, mental health, equity for disadvantaged groups, bullying, respect and the meaning of consent, values education offers a way of teaching and learning that integrates and enhances students' affective and cognitive functioning. The earlier edition of this book has become a standard reference for scholars and practitioners in the fields of values education, moral education and character education. Its citation rates, reads and downloads have been consistently and enduringly high as have those of its companion text *Values Pedagogy and Student Achievement*. A decade on, the main purpose of the revised edition is to update and incorporate new research and practice relevant to values education. Recent insights in the fields of neuroscience and social and emotional learning and their implications for education and student wellbeing are more overt than they were when the first edition was being compiled. Additionally, advanced thinking in the field of epistemology, how humans come to know and therefore learn, has also sharpened, especially through the later writings of prominent scholars like Jürgen Habermas. The revised edition has preserved the essential spirit and thrust of the original edition while making space for some of these new insights about the potential of values education to establish optimal and harmonious learning and social environments for both students and teachers. **Values in Education** Eva Burman, Maxine Cooper, Lorraine Ling, Joan Stephenson, Joan Stephenson****Nfa****, 2005-06-22. Based upon an empirical study involving training and practising

teachers from seven countries this book investigates the various attitudes and practices towards the teaching of values and their place in the curriculum Countries covered include Australia Eire Israel Slovenia Switzerland UK and USA The findings of each of the countries are compared and contrasted in the light of the diverse cultural conditions which are apparent This book brings together various approaches currently taken in values education and also suggests a theoretical foundation for decision making The book culminates in practical examples drawn from the evidence of the research project which teachers can adapt for use with their own pupils This book provides a challenging and imaginative perspective on values in education and comes at a time when educators face a new era which demands dynamic transformative and reflective approaches
