On Site 1921 71:

An Architecture of Parts: Architects, Building Workers and Industrialisation in Britain 1940 - 1970 Christine Wall, 2013-07-04 This book is unique in describing the history of post war reconstruction from an entirely new perspective by focusing on the changing relationship between architects and building workers It considers individual as well as collective interactions with technical change and in doing so brings together for the first time an extraordinary range of sources including technical archives oral history and visual material to describe the construction process both during and in the decades after the war It focuses on the social aspects of production and the changes in working life for architects and building workers with increasing industrialization in particular analysing the effect on the building process of introducing dimensionally co ordinated components Both architects and building workers have been accused of creating a built environment now popularly discredited architects responsible for poor design and building workers for poor workmanship However many of the structures and ideas underpinning this period of rapid change were revolutionary in their commitment to a complete transformation of the building process An Architecture of Parts adds to the growing literature on changes in the building world during and immediately after the Second World War It is significant both empirically and historically in its examination of the ideas technology and relationships that fired industrialization of the building process in mid century Britain Catalog of Information on Water Data ,1968 *Semi-Detached London* Alan A Jackson, 2018-01-12 Originally published in 1973 Semi Detached London looks at the great suburban expansion of London between the two world wars The book covers all aspects of urban history presenting an authoritative and balanced account of the Great Suburban Age and the final uninhibited forty years before the Green Belt and Development Plan The roles of the speculative builder the estate developer and the local authorities receive careful attention and the author s special knowledge of London s transport systems ensures that the leading part they played is fully developed Students of social urban and transport history will find this book a valuable source of reference Imperialism and Development Nicholas Westcott, 2020 A compelling exploration of one of the most ill advised and calamitous interventions in colonial development history **On site, 1921-71** Alan Jenkins, 1971 *Index to Catalog of Information on Water Data* Geological Survey (U.S.).
