Planet In Peril Man And The Biosphere Today:

Planet in Peril Raymond Fredric Dasmann,1972 **Planet in Peril?** Raymond Fredric Dasmann,1972 **Planet in Peril** Raymond Frederick Dasmann,1972 *The Ecocriticism Reader* Cheryll Glotfelty,Harold Fromm,1996 This book is the first collection of its kind an anthology of classic and cutting edge writings in the rapidly emerging field of literary ecology Exploring the relationship between literature and the physical environment literary ecology is the study of the ways that writing from novels and folktales to U S government reports and corporate advertisements both reflects and influences our interactions with the natural world **The UNESCO adventure** UNESCO,2024-08-06 EPA-600/5 ,1974-02 **Marx and Nature** P. Burkett,1999-02-14 With Marx and Nature Paul Burkett reconstructs Marx s approach to nature society and environmental crisis While recognizing that production is structured by historically developed relations among producers Marx also insists that production as a social and material process is shaped and constrained by natural conditions including the natural condition of human bodily existence Marx s value analysis places him squarely in the camp of the growing number of ecological theorists questioning the ability of monetary and market based calculations to adequately represent the natural conditions of human production and development **Proceedings of the Conference on the Management of Biosphere Reserves** John Douglas Peine,1985 *Spaceship Earth in the Environmental Age, 1960-1990* Sabine Höhler,2015-10-06 The idea of the earth as a vessel in space came of age in an era shaped by space travel and the Cold War H hler s study brings together technology science and ecology to explore the way this latter day ark was invoked by politicians environmentalists cultural historians writers of science fiction and many others across three decades

Planning for the Planet Simone Schleper,2019-07-12 During the 1960s and 1970s rapidly growing environmental awareness and concern created unprecedented demand for ecological expertise and novel challenges for ecological advocacy groups such as the International Union for Conservation of Nature and Natural Resources IUCN This book reveals how despite their vast scientific knowledge and their attempts to incorporate socially relevant themes IUCN experts inevitably struggled to make global schemes for nature conservation a central concern for UNESCO UNEP and other intergovernmental organizations **Water in New Mexico** Ira G. Clark,1987-07 The most comprehensive reference on the state s most precious resource is now back in print **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),1972 First multi year cumulation covers six years 1965 70 *International Law and the Environment* Tuomas Kuokkanen,2002-10-01 This important book makes an original and modern contribution to the study of international environmental law addressing its development over three time periods the traditional period the modern era and the post modern period Kuokkanen s thesis is this in the traditional period there was no clear distinction between the protection of the environment and the exploitation of natural resources during the modern period the subjects became completely separated and in the post modern era there has been an effort to reconcile economic interests and environmental concerns

The work challenges the reader to think about international environmental law and its development within a broader framework and through a lens which differs from that taken elsewhere The book presents an impressive panorama of the principal international legal developments over the past century in this area and successfully pinpoints the tensions between environmental and economic objects over the past century A timely and important contribution

The Country in the City Richard A. Walker, 2009-11-23 Winner of the Western History Association's 2009 Hal K Rothman Award Finalist in the Western Writers of America Spur Award for the Western Nonfiction Contemporary category 2008 The San Francisco Bay Area is one of the world's most beautiful cities Despite a population of 7 million people it is more greensward than asphalt jungle more open space than hardscape A vast quilt of countryside is tucked into the folds of the metropolis stitched from fields farms and woodlands mines creeks and wetlands In *The Country in the City* Richard Walker tells the story of how the jigsaw geography of this greenbelt has been set into place The Bay Area's civic landscape has been fought over acre by acre an arduous process requiring popular mobilization political will and hard work Its most cherished environments Mount Tamalpais Napa Valley San Francisco Bay Point Reyes Mount Diablo the Pacific coast have engendered some of the fiercest environmental battles in the country and have made the region a leader in green ideas and organizations This book tells how the Bay Area got its green grove from the stirrings of conservation in the time of John Muir to origins of the recreational parks and coastal preserves in the early twentieth century from the fight to stop bay fill and control suburban growth after the Second World War to securing conservation easements and stopping toxic pollution in our times Here modern environmentalism first became a mass political movement in the 1960s with the sudden blooming of the Sierra Club and Save the Bay and it remains a global center of environmentalism to this day Green values have been a pillar of Bay Area life and politics for more than a century It is an environmentalism grounded in local places and personal concerns close to the heart of the city Yet this vision of what a city should be has always been informed by liberal even utopian ideas of nature planning government and democracy In the end green is one of the primary colors in the flag of the Left Coast where green enthusiasms like open space are built into the fabric of urban life Written in a lively and accessible style *The Country in the City* will be of interest to general readers and environmental activists At the same time it speaks to fundamental debates in environmental history urban planning and geography
