The Premenstrual Syndrome P.A. van Keep,W.H. Utian,2012-12-06 Despite a plethora of theories premenstrual syndrome PMS has remained an enigma There has persisted in the literature a constant conflict as to the existence of the syndrome a question as to whether it is one syndrome or several and a debate as to whether the origin is psychic somatic or both Advances in endocrinology specifically in radioligand assays allowing for accurate hormone measurements have precipitated a more scientific evaluation of PMS in recent years Nonetheless difficulties have persisted in accumulating well documented data because of the protean nature of the syndrome Indeed even at this time the question of what requires measurement during the follicular phase of the cycle and the premenstrual phase remains unresolved and is difficult to place in perspective In view of the persisting conflict between the organic and the psychological schools of thought we the editors of this book considered the Sixth International Congress of Psychosomatic Obstetrics and Gynecology to be an ideal venue for a workshop in which both parties could be encouraged to participate Towards this end the organizing committee of the International Society of Psychosomatic Obstetrics and Gynecology ISPOG was approached and their response was extremely encouraging In this respect we wish to record our thanks to the Scientific Committee of ISPOG for allowing this workshop to be organized under their auspices but totally under our direction We in turn stand responsible for the format and content of the workshop

Premenstrual Syndrome Benson Ginsburg,2012-12-06 As the work on a revised edition of the Diagnostic and Statistical Manual DSM IIIR progressed a great controversy grew over the inclusion of a new diagnostic category Premenstrual Phase Dysphoric Disorder Some nosologists and scientists who study premenstrual syndrome PMS felt that while a specific psychiatric disorder does exist it occurs relatively rarely The disorder can be characterized by recurrent periods of dysphoria on a monthly basis in synchrony with the menstrual period PMS already exists as a diagnosis in ICD 9 the international medical nomenclature The category for DSM IIIR was to be a specific psychiatric disorder concentrating on the dysphoric reaction and not including all of the physical and mental symptoms that people have ascribed to this condition Much of the controversy that ensued had little to do with the diagnostic category or the condition itself Rather it concerned feelings voiced by feminist groups that the new diagnostic category would be misleading that it would inappropriately label women as mentally ill and that it would be affixed not only to the dysphoric disorder but everything else that happens psychiatrically to women
