Flint, 2008 Written by international leaders in trauma surgery this comprehensive text spans the entire field of trauma from the composition and practice of the trauma team to management of all injuries seen in a trauma setting The fully searchable online text is also available on a companion Web site **General Trauma Care and Related Aspects** Hans-Jörg Oestern, Otmar Trentz, Selman Uranues, 2013-10-22 There currently is a clear tendency to an increasing number of accidental injuries in elderly people in sport injuries and car crashes also in countries which recently joined the European Union and candidates to join the European Union Patients expect very good functional results even after serious injuries But in contrast to this development Trauma Surgery as an independent field is not yet established in all European countries Therefore it seems mandatory to compile a book that covers the state of the art in Trauma Surgery The book also serves to harmonise the practice of Trauma Surgery within the European Union and to prepare for the exam of the U E M S A National Trauma Care System National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on the Health of Select Populations, Board on Health Sciences Policy, Committee on Military Trauma Care's Learning Health System and Its Translation to the Civilian Sector, 2016-10-12 Advances in trauma care have accelerated over the past decade spurred by the significant burden of injury from the wars in Afghanistan and Iraq Between 2005 and 2013 the case fatality rate for United States service members injured in Afghanistan decreased by nearly 50 percent despite an increase in the severity of injury among U S troops during the same period of time But as the war in Afghanistan ends knowledge and advances in trauma care developed by the Department of Defense DoD over the past decade from experiences in Afghanistan and Iraq may be lost This would have implications for the quality of trauma care both within the DoD and in the civilian setting where adoption of military advances in trauma care has become increasingly common and necessary to improve the response to multiple civilian casualty events Intentional steps to codify and harvest the lessons learned within the military's trauma system are needed to ensure a ready military medical force for future combat and to prevent death from survivable injuries in both military and civilian systems This will require partnership across military and civilian sectors and a sustained commitment from trauma system leaders at all levels to assure that the

necessary knowledge and tools are not lost A National Trauma Care System defines the components of a learning health system necessary to enable continued improvement in trauma care in both the civilian and the military sectors This report provides recommendations to ensure that lessons learned over the past decade from the military s experiences in Afghanistan and Iraq are sustained and built upon for future combat operations and translated into the U S civilian system
