## Quiet Days In Burgundy:

The Oxford Handbook of Political Leadership R. A. W. Rhodes, Paul 't Hart, 2014-05-29 Political leadership has made a comeback. It was studied intensively not only by political scientists but also by political sociologists and psychologists, Sovietologists, political anthropologists and by scholars in comparative and development studies from the 1940s to the 1970s. Thereafter, the field lost its way with the rise of structuralism, neo-institutionalism and rational choice approaches to the study of politics, government and governance. Recently, however, students of politics have returned to studying the role of individual leaders and the exercise of leadership to explain political outcomes. The list of topics is now endless: elections, conflict, management, public policy, government, popularity, development, governance, networks and regional integration. In the media age, leaders are presented and stage-managed, spun. DDLs are the solution to almost every social problem. Through the mass media and the Internet, citizens and professional observers follow the rise, impact and fall of senior political officeholders at closer quarters than ever before. This Handbook encapsulates the resurgence by asking: where are we today? It orders the multidisciplinary field by identifying the distinct and distinctive contributions of the disciplines. It meets the urgent need to take stock. It brings together scholars from around the world, encouraging a comparative perspective to provide a comprehensive coverage of all the major disciplines, methods and regions. It showcases both the normative and empirical traditions in political leadership studies and juxtaposes behavioural, institutional and interpretive approaches. It covers formal, office-based as well as informal, emergent political leadership and in both democratic and undemocratic polities. **The House of Commons** Emma Crewe, 2020-05-31 The House of Commons is one of Britain's mysterious institutions, constantly in the news yet always opaque. In this ground-breaking anthropological study of the world's most famous parliament, Emma Crewe reveals the hidden mechanisms of parliamentary democracy. Examining the work of Members of Parliament, including neglected areas such as constituencies and committees, this book provides unique insights into the actual lives and working relationships of parliamentarians. Why do the public loathe politicians but often love their own MP, the author asks. The antagonistic façade of politics irritates the public who tend to be unaware that backstage democracy relies on MPs consulting, compromising and cooperating across political parties far more than is publicly admitted. As the book shows, this is only one of myriad contradictions in the labyrinths of power. Based on unprecedented access and two years of interviews and research in the Palace of Westminster and MPs' constituencies, *The House of Commons: An Anthropology of MPs at Work* challenges the existing scholarship on political institutions and party politics. Moving beyond the narrow confines of rational choice theory and new institutionalism, Emma Crewe presents a radical alternative to the study of British politics by demonstrating that all of its processes hinge on culture, ritual and social relations. A must-read for anyone interested in political anthropology, politics or the Westminster model. *The Little Czech and the Great Czech Nation* Ladislav Holy, 1996-08-28 When Ladislav Holy precipitately left Czechoslovakia for the UK in 1968, he was already one of the leading anthropologists in Central Europe.

In the following decades he made important field studies in Africa Since 1986 he has been engaged in research in the Czech Republic and he brings to this timely study of national identity the skills of a seasoned researcher a cosmopolitan perspective and the insights of an insider Drawing on historical and literary sources as well as ethnography he analyses Czech discourses on national identity He argues that there were specifically Czech aspects to the communist regime and to the velvet revolution and paying particular attention to symbolic representations of what it means to be Czech he explores how notions of Czech identity were involved in the debates surrounding the fall of communism and the emergence of a new social system

**Bourgeois Politics in France, 1945-1951** Richard Vinen, 2002-07-11 This 1995 book is a general study of politics and society in the Fourth Republic and is founded on extensive primary research It approaches the period in terms of successful conservatism rather than thwarted reform maintaining that conservatism in France was a more subtle dynamic force than has previously been appreciated Not the preserve of any one single party conservative ideas were often defended by institutions outside the realm of explicit politics altogether such as business associations civil service departments and the law courts It is proposed that conservatives did not simply return to French politics in 1945 untouched by the events of the previous five years The experiences of Vichy the occupation and the purges produced new kinds of political synthesis making conservatives more dynamic and receptive to change than their progressive opponents Living with the Enemy Sandra

Ott, 2017-06-26 In post liberation France the French courts judged the cases of more than one hundred thousand people accused of aiding and abetting the enemy during the Second World War In this fascinating book Sandra Ott uncovers the hidden history of collaboration in the Pyrenean borderlands of the Basques and the Bearnais in southwestern France through nine stories of human folly uncertainty ambiguity ambivalence desire vengeance duplicity greed self interest opportunism and betrayal Covering both the occupation and liberation periods she reveals how the book's characters became involved with the occupiers for a variety of reasons ranging from a desire to settle scores and to gain access to power money and material rewards to love friendship fear and desperation These wartime lives and subsequent postwar reckonings provide us with a new lens through which to understand human behavior under the difficult conditions of occupation and the subsequent search for retribution and justice

**Anthropology in the City** Dr Giuliana B Prato, Dr Italo Pardo, 2012-09-01 With half of humanity already living in towns and cities and that proportion expected to increase in the coming decades society both Western and non Western is fast becoming urban and even mega urban As such research in urban settings is evidently timely and of great importance Anthropology in the City brings together a leading team of anthropologists to address the complex methodological and theoretical challenges posed by field research in urban settings clearly identifying the significance of the anthropological paradigm in urban research and its centrality both to mainstream academic debates and to society more broadly With essays from experts on wide ranging ethnographic research from fields as diverse as China Europe India Latin and North America and South East Asia this book demonstrates the contribution that empirically based

anthropological analysis can make to our understanding of our increasingly urban world      *The Rise and Fall of Community Studies* Robert Parkin, 2025-09-01 Since its inception about a century ago the anthropology of Europe has transitioned from studies of settled communities shaped by fieldwork traditions elsewhere to a focus on more mobile and virtual communities This book provides a partial retrospective on the field offering a rich collection of ethnographic summaries from across the continent It will be of interest to students and academics seeking a survey of this branch of anthropology whether for private study or university courses      *The Oxford Handbook of Politics and Performance* Shirin M. Rai, Milija Gluhovic, Silvija Jestrovic, Michael Saward, 2021-02-19 Political scientists and political theorists have long been interested in social and political performance Theatre and performance researchers have often focused on the political dimensions of the live arts Yet the interdisciplinary nature of this labor has typically been assumed rather than rigorously explored Further it is crucial to bring the concepts of theatre and performance deployed by other disciplines such as psychology law political anthropology sociology among others into a wider as well as deeper interdisciplinary engagement Embodying and fostering that engagement is at the heart of this new handbook The Handbook brings together leading scholars in the fields of Politics and Performance to map out the evolving interdisciplinary engagement The authors drawn from a wide range of disciplines investigate the relationship between politics and performance to show that certain features of political transactions shared by performances are fundamental to both disciplines and that they also share to a large extent a common communicational base and language The volume is organized into seven thematic sections the interdisciplinary theory of politics and performance performativity and theatricality protest regulation resistance change authority identities race gender sexuality class citizenship indigeneity sites states borders markets law religion scripts accountability authority and legitimacy security ceremony sustainability body voice and gesture representation leadership participation rhetoric disruption and affect media care love empathy comedy populism memory      **One Discipline, Four Ways** Fredrik Barth, Andre Gingrich, Robert Parkin, Sydel Silverman, 2010-03-17 One Discipline Four Ways offers the first book length introduction to the history of each of the four major traditions in anthropology British German French and American The result of lectures given by distinguished anthropologists Fredrik Barth Andre Gingrich Robert Parkin and Sydel Silverman to mark the foundation of the Max Planck Institute for Social Anthropology this volume not only traces the development of each tradition but considers their impact on one another and assesses their future potentials Moving from E B Taylor all the way through the development of modern fieldwork Barth reveals the repressive tendencies that prevented Britain from developing a variety of anthropological practices until the late 1960s Gingrich meanwhile articulates the development of German anthropology paying particular attention to the Nazi period of which surprisingly little analysis has been offered until now Parkin then assesses the French tradition and in particular its separation of theory and ethnographic practice Finally Silverman traces the formative influence of Franz Boas the expansion of the discipline after World War II and the fault lines and promises of

contemporary anthropology in the United States      **The Body Impolitic** Michael Herzfeld, 2004 The Body Impolitic is a critical study of tradition not merely as an ornament of local and national heritage but also as a millstone around the necks of those who are condemned to produce it Michael Herzfeld takes us inside a rich variety of small town Cretan artisans workshops to show how apprentices are systematically thwarted into learning by stealth and guile This harsh training reinforces a stereotype of artisans as rude and uncultured Moreover the same stereotypes that marginalize artisans locally also operate to marginalize Cretans within the Greek nation and Greece itself within the international community What Herzfeld identifies as the global hierarchy of value thus frames the nation's ancient monuments and traditional handicrafts as evidence of incurable backwardness Herzfeld's sensitive observations offer an intimately grounded way of understanding the effects of globalization and of one of its most visible offshoots the heritage industry on the lives of ordinary people in many parts of the world today      Ritual and Religion in the Making of Humanity Roy A. Rappaport, 1999-03-25 Roy Rappaport argues that religion is central to the continuing evolution of life although it has been displaced from its original position of intellectual authority by the rise of modern science His book which could be construed as in some degree religious as well as about religion insists that religion can and must be reconciled with science Combining adaptive and cognitive approaches to the study of humankind he mounts a comprehensive analysis of religion's evolutionary significance seeing it as co extensive with the invention of language and hence of culture as we know it At the same time he assembles the fullest study yet of religion's main component ritual which constructs the conceptions which we take to be religious and has been central in the making of humanity's adaptation The text amounts to a manual for effective ritual illustrated by examples drawn from anthropology history philosophy comparative religion and elsewhere      An Identity for Europe R. Kastoryano, 2009-05-11 This book looks at the role of multiculturalism in the complex construction of the European Union acknowledging the tension of creating a new political space for identities that are simultaneously national regional linguistic and religious and yet strive to encompass a political and geographic whole      **The Politics of Culture in Turkey, Greece & Cyprus** Leonidas Karakatsanis, Nikolaos Papadogiannis, 2017-03-27 Performing a political identity usually involves more than just casting a vote For Left wingers in Turkey Greece and Cyprus countries that emerged as the only non socialist constituents of South eastern Europe after WWII political preference meant immersion to distinct ways of life to cultures in times of dictatorship or persecution the desire to find alternative ways to express themselves gave content to these cultures In times of political normality it was the echoes of such memories of precarity and loss that took the lead This book explores the intersection between the politics and cultures of the Left since the sixties in Turkey Greece and Cyprus With the use of 12 case studies the contributors expose the moments in which the Left has been claimed and performed not only through political manifestos and traditional political boundaries but also through corporeal acts discursive practices and affective encounters These are all transformed into distinct modalities of everyday life and conduct which are commemorated narrated or sung versed

painted or captured in photographic images and on reels of tape By focusing on culture and performance this book highlights the complex link between nationalism and internationalism in left wing cultures and illuminates the entanglements between the ways in which left wingers experienced transitions from dictatorship to democracy and vice versa As the first book to analyse cultures and performances of the Left in the three countries The Politics of Culture in Turkey Greece and Cyprus causes a rethinking of the boundaries of political practice and fosters new understandings of the formation of diverse expressions of the Left As such it will be a valuable resource for students and scholars of cultural and social anthropology modern European history and political science

The Trading Crowd Ellen Hertz,1998-06-18 In 1992 there was an explosion of stock fever in Shanghai From the moment I set foot in Shanghai until my last day there people from all walks of life wanted to talk to me about the market Ellen Hertz writes Her 1998 study sets the stock market and its players in the context of Shanghai society and it probes the dominant role played by the state which has yielded a stock market very different from those of the West A trained anthropologist she explains the way in which investors and officials construct a moral storyline to make sense of this great structural innovation identifying a struggle between three groups of actors the big investors the little investors and the state to control the market
