Soul of the Hurricane

Nelson Simon,2021-10-26 Soul of the Hurricane is a remarkable debut from a singular storyteller David Isay Peabody Award winning creator of StoryCorps Nelson Simon didn't want to sign up as a last minute crew member to transport a Norwegian schooner from Brooklyn to Bermuda But one thing led to another and there he was He told himself that it would be a sort of pleasure cruise a week in the Gulf Stream with a gourmet chef on board some down time on a tropical island then a quick flight home What did it matter that he had practically no sailing experience The eight other crew members had plenty they just needed an extra pair of hands What could possibly go wrong It was October 1991 and the ship was Anne Kristine the oldest continuously sailing vessel in the world What awaited them was Hurricane Grace the southern end of what came to be known as the Perfect Storm Soul of the Hurricane tells an unlikely tale that begins with an unexpected invitation and ends in the dead of night somewhere far from home with a Coast Guard helicopter above and a dark angry sea below **Norwegian**

Maritime Explorers and Expeditions Over the Past Thousand Years Øystein Johansen,1999 Norwegian maritime explorers and expeditions take you on the greatest journeys of discovery over a thousand years Throughout Norwegian history the sea has been the most important highway used by Norwegians in their travels along our almost 2000 kilometre long coast or to more distant destinations Some explorers set off in search of new territories for commercial reasons like Viking Ottar around the year 890 A D and Leif Eiriksson in 999 A D Jens Munk in 1619 or Carl Anton Larsen and Otto Sverdrup in the twentieth century Others like Fridtjof Nansen and Roald Amundsen had a burning desire to explore new countries and realize personal ambitions or like Thor Heyerdahl they have wanted to prove a theory about ancient vessels and their ability to cross oceans All these explorers have one key characteristic in common they look upon the sea as a natural element to be mastered but not conquered They conducted their expeditions on nature's own terms in spite of the risks involved The chapters of this book tell stories of daring courage stubborn endurance and scientific curiosity and the drama and tension derive not only from the explorers struggle with the forces of nature but also from the outstanding personalities of the men who made these journeys Publisher's description The Rotarian ,1972-01 Established in 1911 The
