Race Decoded Catherine Bliss, 2012-05-23 In 2000 with the success of the Human Genome Project scientists declared the death of race in biology and medicine But within five years many of these same scientists had reversed course and embarked upon a new hunt for the biological meaning of race Drawing on personal interviews and life stories Race Decoded takes us into the world of elite genome scientists including Francis Collins director of the NIH Craig Venter the first person to create a synthetic

genome and Spencer Wells National Geographic Society explorer in residence among others to show how and why they are formulating new ways of thinking about race In this original exploration Catherine Bliss reveals a paradigm shift both at the level of science and society from colorblindness to racial consciousness Scientists have been fighting older understandings of race in biology while simultaneously promoting a new grand scale program of minority inclusion In selecting research topics or considering research design scientists routinely draw upon personal experience of race to push the public to think about race as a biosocial entity and even those of the most privileged racial and social backgrounds incorporate identity politics in the scientific process Though individual scientists may view their positions differently whether as a black civil rights activist or a white bench scientist all stakeholders in the scientific debates are drawing on memories of racial discrimination to fashion a science based activism to fight for social justice

Becoming Christian David G. Horrell,2013-07-04 The first letter of Peter remains a relatively neglected corner of the New Testament the number of monographs devoted to it is tiny compared with those on the Gospels and Pauline letters Yet it is a text so this book argues that offers much insight into crucial processes in the development of Christian identity In particular 1 Peter illustrates with particular clarity the complex ways in which Christian identity was forged from Jewish traditions and negotiated in the generally hostile Roman empire As such studies of this particular letter illuminate central themes in the making of Christianity in the earliest centuries Becoming Christian is a collection of essays that treat various facets of the first letter of Peter in its social and historical setting in some cases using new social scientific and postcolonial methods to shed light on the ways in which the letter contributes to the making of Christian identity At the heart of the book are chapters 5 7 which examine the contribution of 1 Peter to the construction of Christian identity the persecution and suffering of Christians in Asia Minor the significance of the name Christian and the response of the letter to the hostility encountered by Christians in society There are no recent books which bring together such a wealth of information and analysis of this crucial early Christian text Becoming Christian has developed out of Horrell s ongoing research for the International Critical Commentary on 1 Peter Together these essays will offer a series of significant and original engagements with this letter and a resource for studies of 1 Peter for some time to come
