Five Generations of a Mexican American Family in Los Angeles Christina Chavez,2007-04-09 Despite their citizenship

and English monolingualism Mexican Americans have long been known to remain largely working class which academically has meant that they tend to be mostly high school graduates with low rates of college attendance and completion Attempting to understand this phenomenon Five Generations of a Mexican American Family in Los Angeles chronicles the home work and school lives of the author s multigenerational family throughout the twentieth century Using oral histories of 33 members across five generations the Fuentes story illuminates the interaction between race ethnicity and class at home in the labor market and in schools which circumscribe the opportunity and resources or lack thereof for academic success Generally findings show that these factors work together to reproduce the family s social standing over generations Equally important the analysis reveals how the persistence and strength of the Fuentes heritage cultural values buena educaci n and familism have insulated them from the continued threat of racial discrimination and economic hardship in American life The Fuentes story provides the reader with a keen view of the process by which Fuentes moved from immigrants to ethnic Americans and shows how they have gracefully survived the harsh and unpredictable nature of being of a racial minority and the working class

there has been increasing discontent with the abstract nature of mainstream economics The book explores the ways in which economics might be reconnected both with the real world and with other disciplines *How Society Makes Itself: The Evolution of Political and Economic Institutions* Howard J Sherman,2015-06-01 This radical account of the evolution of political social and economic institutions weaves together strands of anthropology sociology political science history and economics In a highly readable text Howard Sherman explains the interconnections of ideas and economic forces and traces the evolution of social and economic institutions from primitive times to the present Sherman focuses on the myth of inevitable progress in technology and argues that it progresses only when social and economic institutions and dominant ideas encourage it to improve He shows that throughout history technology as a part of the economic forces ebbs and flows to create or undermine existing economic institutions *The Heterogeneity Link of the Welfare State and Redistribution* Udaya R. Waglé,2013-11-26 This book situates ethnic heterogeneity in the larger discussion of the welfare state and its redistributive outcomes poverty and inequality By using comprehensive longitudinal data covering 1980 to 2010 from 17 high income countries this analysis helps achieve a major milestone in comparative welfare state research both conceptually and methodologically Conceptually it elevates the relevance of growing ethnic heterogeneity in thinking about how politics and economics of the welfare state operate collectively impacting the magnitudes of poverty and inequality Methodologically the analysis conducted in this book provides broader empirical tests for the many propositions and discourses found in the literature based largely on anecdotal evidence case studies and unjustifiably limited quantitative data The innovative operationalization of the multidimensional character of both welfare state policies and ethnic heterogeneity help broaden the analytical frameworks of comparative welfare state research The outcome is a major advance in the way we understand the causes and redistributive consequences of the welfare state in which ethno racial religious and especially immigration heterogeneity can play a crucial role A thorough and insightful analysis presented in this book helps students researchers and policymakers better understand the ethnic heterogeneity connections of the welfare state and redistribution together with a comparative perspective of the changing faces of ethnic heterogeneity welfare state policies and poverty and inequality in high income countries *Valuing Us All* April Laskey Aerni,KimMarie McGoldrick,1999-12-15 Argues for making economics classrooms more inclusive through changes in course content and teaching methods **Class in America** Robert E.
