Race and Regionalism in the Politics of Taxation in Brazil and South Africa Evan S. Lieberman, 2003-09 Table of contents *Handbook on the Politics of Taxation* Hakelberg, Lukas, Seelkopf, Laura, 2021-09-14 This comprehensive Handbook provides an insight into the main concepts and academic debates on taxation from a political science perspective Providing a background to current debates on green taxation taxation and inequality taxation and gender tax evasion and avoidance and tax compliance it offers potential avenues for future research **Waves of War** Andreas Wimmer, 2013 A new perspective on how the nation state emerged and proliferated across the globe accompanied by a wave of wars Andreas Wimmer explores these historical developments using social science techniques of analysis and datasets that cover the entire modern world **Immigration and Conflict in Europe** Rafaela M. Dancygier, 2010-08-09 Contemporary debates give the impression that the presence of immigrants necessarily spells strife Yet as *Immigration and Conflict in Europe* shows the incidence of conflict involving immigrants and their descendants has varied widely across groups cities and countries The book presents a theory to account for this uneven pattern explaining why we observe clashes between immigrants and natives in some locations but not in others and why some cities experience confrontations between immigrants and state actors while others are spared from such conflicts The book addresses how economic conditions interact with electoral incentives to account for immigrant native and immigrant state conflict across groups and cities within Great Britain as well as across Germany and France It highlights the importance of national immigration regimes and local political economies in shaping immigrants economic position and political behavior demonstrating how economic and electoral forces rather than cultural differences determine patterns of conflict and calm **Colonialism and Postcolonial Development** James Mahoney, 2010-02-15 In this comparative historical analysis of Spanish America Mahoney offers a new theory of colonialism and postcolonial development He explores why certain kinds of societies are subject to certain kinds of colonialism and why these forms of colonialism give rise to countries with differing levels of economic prosperity and social well being Mahoney contends that differences in the extent of colonialism are best explained by the potentially evolving fit between the institutions of the colonizing nation and those of the colonized society Moreover he shows how institutions forged under colonialism bring countries to relative levels of development that may prove remarkably enduring in the postcolonial period The argument is sure to stir discussion and debate both among experts on Spanish America who believe that development is not tightly bound by the colonial past and among scholars of colonialism who suggest that the institutional identity of the colonizing nation is of little consequence **The Political Construction of Business Interests** Cathie Jo Martin, Duane Swank, 2012-03-30 *The Political Construction of Business Interests* recounts employers struggles to define their collective social identities at turning points in capitalist development **Resisting Extortion** Eduardo Moncada, 2022-01-06 New ethnographic data leads to insights into the widespread yet understudied phenomenon of criminal extortion in Latin America

Property Threats and the Politics of Anti-Statism Gabriel Ondetti, 2021-01-28 Contemporary tax burden differences in Latin America are a function of historical threats to private property *The Evolution of Modern States* Sven Steinmo, 2010-07-19 The Evolution of Modern States first published in 2010 is a significant contribution to the literatures on political economy globalization historical institutionalism and social science methodology The book begins with a simple question why do rich capitalist democracies respond so differently to the common pressures they face in the early twenty first century Drawing on insights from evolutionary theory Sven Steinmo challenges the common equilibrium view of politics and economics and argues that modern political economies are best understood as complex adaptive systems The book examines the political social and economic history of three different nations Sweden Japan and the United States and explains how and why these countries have evolved along such different trajectories over the past century Bringing together social and economic history institutionalism and evolutionary theory Steinmo thus provides a comprehensive explanation for differing responses to globalization as well as a new way of analyzing institutional and social change **Shaping Nations and Markets** Vinícius Guilherme Rodrigues Vieira, 2023-09-15 Shaping Nations and Markets employs a mixed methods approach to contend that economic ideas organization of domestic interests and their economic power asymmetries of information and political institutions do not sufficiently explain the formation of national interests in processes of trade liberalization The author proposes that something is missing identity capital which also empowers economic sectors that share either liberalizing or protectionist interests Identity capital is an economic sector's contribution to the stability of a national identity narrative it correlates with the degree to which the workforce of any sector represents the dominant conception of national identity Identity capital creates political power asymmetries among those sectors and impacts the formation of populist movements in both developed and developing states This book offers a theoretical framework to unpack national identity trade liberalization nationalist populism domestic politics and globalization The author argues that the key for identifying whether liberalizing or protectionist coalitions prevail in trade negotiations is identity capital He offers a comparison of the three largest contemporary federal multicultural democracies Brazil India and the United States from the Doha Development Round of the World Trade Organization WTO in 2001 to the rise of populism in these countries in recent years This book will be of great interest to graduate students and scholars of international relations international studies political science comparative politics and economic sociology Popular Movements in Autocracies Guillermo Trejo, 2012-08-13 A new explanation of the rise development and demise of social movements and cycles of protest in autocracies *The Price of a Vote in the Middle East* Daniel Corstange, 2016-09-01 Clientelism and ethnic favoritism appear to go hand in hand in many diverse societies in the developing world However while some ethnic communities receive generous material rewards for their political support others receive very modest payoffs The Price of a Vote in the Middle East examines this key and often overlooked component of clientelism The author draws on elite interviews and original

survey data collected during his years of field research in Lebanon and Yemen two Arab countries in which political constituencies follow sectarian regional and tribal divisions He demonstrates that voters in internally competitive communal groups receive more and better payoffs for their political support than voters trapped in uncompetitive groups dominated by a single hegemonic leader Ultimately politicians provide services when compelled by competitive pressures to do so whereas leaders sheltered from competition can and do take their supporters for granted Deadly Clerics Richard A.

Nielsen,2017-11-09 Explores multiple pathways of cleric radicalization to explain why some Muslim clerics turn to militant jihadism *Inequality and Democratization* Ben W. Ansell,David J. Samuels,2014-12-18 Research on the economic origins of democracy and dictatorship has shifted away from the impact of growth and turned toward the question of how different patterns of growth equal or unequal shape regime change This book offers a new theory of the historical relationship between economic modernization and the emergence of democracy on a global scale focusing on the effects of land and income inequality Contrary to most mainstream arguments Ben W Ansell and David J Samuels suggest that democracy is more likely to emerge when rising yet politically disenfranchised groups demand more influence because they have more to lose rather than when threats of redistribution to elite interests are low *Indebted Societies* Andreas

Wiedemann,2021-07-08 In many rich democracies access to financial markets is now a prerequisite for fully participating in labor and housing markets and pursuing educational opportunities Indebted Societies introduces a new social policy theory of everyday borrowing to examine how the rise of credit as a private alternative to the welfare state creates a new kind of social and economic citizenship Andreas Wiedemann provides a rich study of income volatility and rising household indebtedness across OECD countries Weaker social policies and a flexible knowledge economy have increased costs for housing education and raising a family forcing many people into debt By highlighting how credit markets interact with welfare states the book helps explain why similar groups of people are more indebted in some countries than others Moreover it addresses the fundamental question of whether individuals states or markets should be responsible for addressing socio economic risks and providing social opportunities **The Political Economy of Trust** Henry

Farrell,2009-08-24 Trust and cooperation are at the heart of the two most important approaches to comparative politics rational choice and political culture Yet we know little about trust s relationship to political institutions This book sets out a rationalist theory of how institutions and in particular informal institutions can affect trust without reducing it to fully determine expectations It then shows how this theory can be applied to comparative political economy and in particular to explaining inter firm cooperation in industrial districts geographical areas of intense small firm collaboration The book compares trust and cooperation in two prominent districts in the literature one in Emilia Romagna Italy and the other in Baden W rttemberg Germany It also sets out and applies a theory of how national informal institutions may change as a result of changes in global markets and shows how similar mechanisms may explain persistent distrust too among Sicilian

Mafiosi *The Political Logic of Poverty Relief* Alberto Diaz-Cayeros, Federico Estévez, Beatriz Magaloni, 2016-02-26 The Political Logic of Poverty Relief places electoral politics and institutional design at the core of poverty alleviation The authors develop a theory with applications to Mexico about how elections shape social programs aimed at aiding the poor They also assess whether voters reward politicians for targeted poverty alleviation programs **Tying the Autocrat's Hands** Yuhua Wang, 2014-12-18 Under what conditions would authoritarian rulers be interested in the rule of law What type of rule of law exists in authoritarian regimes How do authoritarian rulers promote the rule of law without threatening their grip on power Tying the Autocrat's Hands answers these questions by examining legal reforms in China Yuhua Wang develops a demand side theory arguing that authoritarian rulers will respect the rule of law when they need the cooperation of organized interest groups that control valuable and mobile assets but are not politically connected He also defines the rule of law that exists in authoritarian regimes as a partial form of the rule of law in which judicial fairness is respected in the commercial realm but not in the political realm Tying the Autocrat's Hands demonstrates that the rule of law is better enforced in regions with a large number of foreign investors but less so in regions heavily invested in by Chinese investors **The Politics of Inclusive Development** Samuel Hickey, Kunal Sen, Badru Bukenya, 2015 It is now widely accepted that politics plays a significant role in shaping the possibilities for inclusive development However the specific ways in which this happens across different types and forms of development and in different contexts remains poorly understood This collection provides a state of the art review regarding what is currently known about the politics of inclusive development Leading academics offer systematic reviews of how politics shapes development across multiple dimensions including through growth natural resource governance poverty reduction service delivery social protection justice systems the empowerment of marginalised groups and the role of both traditional and non traditional donors The volume not only provides a comprehensive update but also a ground breaking range of new directions for thinking and acting around these issues The book's originality thus derives not only from the wide scope of its case study material but also from the new conceptual approaches it offers for thinking about the politics of inclusive development and the innovative and practical suggestions for donors policy makers and practitioners that flow from this **Critical Junctures and Historical Legacies** David Collier, Gerardo L. Munck, 2022-02-28 Over the past 50 years scholars across the social sciences have employed critical juncture analysis to understand how social orders are created become entrenched and change In this book leading scholars from several disciplines offer the first coordinated effort to define this field of research assess its theoretical and methodological foundations and use a critical assessment of current practices as a basis for guiding its future Contributors include stars in this field who have written some of the classic works on critical junctures as well as the rising stars of the next generation who will continue to shape historical comparative analysis for years to come Critical Junctures and Historical Legacies will be an indispensable resource for social science research methods scholars and students
