Persons, 2018-04-24 Contradictory forces are at play at the close of the twentieth century There is a growing closeness of peoples fueled by old and new technologies of modern aviation digital based communications new patterns of trade and commerce and growing affluence of significant portions of the world's population Television permits individuals around the world to learn about the cultures and lifestyles of peoples of physically distant lands These developments give real meaning to the notion of a global village Peoples of the world are growing closer in new and increasingly important ways Nonetheless there are disturbing signs of a growing awareness of ethnic differences in all parts of the world the United States included and a concomitant rise in ethnic based conflicts many of them extraordinarily violent in nature Fear resentment intolerance and mistreatment of the other abound in world news accounts Not only does this phenomenon pose an interesting juxtaposition to the concept of the emergent global village but its emergence in the post cold war era internationally and the post civil rights era in the United States raises significant and compelling questions Why are such conflicts occurring now How do analysts explain these developments The essays in *Race and Ethnicity in Comparative Perspective* lucidly explore some of the complexities of the persistence and re emergence of race and ethnicity as major lines of divisiveness around the world Contributors analyze manifestations of race based movements for political empowerment in Europe and Latin America

as well as racial intolerance in these same settings Attention is also given to the conceptual complexities of multidimensional and shared cultural roots of the overlapping phenomena of ethnicity nationalism identity and ideology The book greatly informs discussions of race and ethnicity in the international context and provides an interesting perspective against which to view America's changing problem of race Race and Ethnicity in Comparative Perspective is a timely thought provoking volume that will be of immense value to ethnic studies specialists African American studies scholars political scientists historians and sociologists

Rational Choice Theory Margaret S. Archer, Jonathan Q. Tritter, 2013-04-03 Rational Choice Theory is flourishing in sociology and is increasingly influential in other disciplines Contributors to this volume are convinced that it provides an inadequate conceptualization of all aspects of decision making of the individuals who make the decisions of the process by which decisions get made and of the context within which decisions get made The critique focuses on the four assumptions which are the bedrock of rational choice rationality the theory's definition of rationality is incomplete and cannot satisfactorily incorporate norms and emotions individualism rational choice is based upon atomistic individual decision makers and cannot account for decisions made by couples groups or other forms of collective action process the assumption of fixed well ordered preferences and perfect information makes the theory

inadequate for situations of change and uncertainty aggregation as methodological individualists rational choice theorists can only view structure and culture as aggregates and cannot incorporate structural or cultural influences as emergent properties which have an effect upon decision making The critique is grounded in discussion of a wide range of social issues including race marriage health and education [Eelam Online](#) Maya Ranganathan,2011-01-18 This book details the potential of computer mediated technologies particularly the internet in creating and nurturing political and cultural identities among the widely dispersed conflict generated Sri Lankan Tamil diaspora and traces the engagement of the diaspora in Australia with the online media in the struggle for a homeland Taking the ethnic issue in Sri Lanka as a given the book explores the way in which new media has added dimensions to the issue Although the theoretical framework of the book overflows into the areas of political communication journalism media theories and studies nationalism and social psychology it draws heavily from the theories of Ellul s social propaganda and Anderson s concept of nation as an imagined community Divided into three parts the first part explores the potential of the internet to lead to the imagination of the nation by the Sri Lankan Tamil diaspora the second part traces the online engagement of the diaspora in the making of the homeland and the third part contrasts it with the experiences and expectations of the homeland of the second generation of migrants in Australia and the Sri Lankan refugees in India With the focus shifting to the diaspora after the announcement of the decimation of the Liberation Tigers of Tamil Eelam in Sri Lanka in May 2009 the book aims to contribute to an understanding of the dynamics to underscore the increasingly significant role that communication technologies play in deciding the weave and warp of the fabric of a nation **Resource Politics in Sub-Saharan Africa** Matthias Basedau,2005 **Transforming Cities** Nick Jewson,Susanne Macgregor,2018-05-11 Transforming Cities examines the profound changes that have characterised cities of the advanced capitalist societies in the final decades of the twentieth century It analyses ways in which relationships of contest conflict and co operation are realised in and through the social and spatial forms of contemporary urban life This book focuses on the impact of economic restructuring and changing forms of urban deprivation and social exclusion It contends that these processes are creating new patterns of social division and new forms of regulation and control *Poland in a Colonial World Order* Piotr Puchalski,2021-11-18 Poland in a Colonial World Order is a study of the interwar Polish state and empire building project in a changing world of empires nation states dominions protectorates mandates and colonies Drawing from a wide range of sources spanning two continents and five countries Piotr Puchalski examines how Polish elites looked to expansion in South America and Africa as a solution to both real problems such as industrial backwardness and perceived issues such as the supposed overrepresentation of Jews in liberal professions He charts how in partnership with other European powers and international institutions such as the League of Nations Polish leaders made attempts to channel emigration to South America to establish direct trade with Africa to expedite national minorities to far away places and to tap into colonial resources around the globe Puchalski demonstrates the intersection

between such national policies and larger processes taking place at the time including the internationalist turn of colonialism and the global fascination with technocratic solutions Carefully researched the volume is key reading for scholars and advanced students of twentieth century European history **New Approaches to Migration?** Nadjé Al-Ali, Khalid Koser, 2003-09-02 This book critically evaluates the transnational communities approach to contemporary international migration It does so through a specific focus on the relationship between transnational communities and home The meaning of home for international migrants is changing and evolving as new globally oriented identities are developed These issues are explored through a number of central themes the meaning of home to transnational peoples the implications of transforming these social spaces and how these have been transformed The Oxford Handbook of Nigerian History Toyin Falola, Matthew M. Non-racialism in South Africa David Everatt, 2017-07-05 When Nelson Mandela was elected President of South Africa in 1994 the world looked on at the miracle of racial reconciliation that unfolded in South Africa However the dream of a Rainbow Nation in Archbishop Desmond Tutu s phrase seems to be fading and racial identities seem to be more entrenched than ever What prospects then for the non racial democracy envisioned by Mandela and the South African Constitution This

book examines the status and future prospects of non racialism It discusses the nature of non racialism and applies the concept to wider national issues and to questions of identity The book looks out into South Africa s future and assesses generational changes to the country s handling of non racialism This latter point is the main theme in the opening preface by Ahmed Kathrada jailed with Nelson Mandela who reminds the reader that there is no easy answer non racialism is built every day every minute by people who seek to transform social relations and allow the Rainbow Nation to flourish This book was published as a special issue of Politikon Race Ethnicity And Difference: Imagining The Inclusive Society Ratcliffe, Peter,2004-06-01 This book addresses many of the key problems facing contemporary societies The social significance attached to various forms of difference most notably race and ethnicity has been seen as resulting in the exclusion of some groups from their full rights as citizens This in turn is viewed as presenting a series of barriers to the creation of more inclusive societies **Cultural Studies** Lawrence Grossberg,Janice Radway,2005-08-08 First published in 1995 Routledge is an imprint of Taylor Francis an informa company
