Drucker, 2020-02-04 The development manufacturing and use of contraceptive methods from the late nineteenth century to the present viewed from the perspective of reproductive justice The beginning of the modern contraceptive era began in 1882 when Dr Aletta Jacobs opened the first birth control clinic in Amsterdam The founding of this facility and the clinical provision of contraception that it enabled marked the moment when physicians started to take the prevention of pregnancy seriously as a medical concern In this volume in the MIT Press Essential Knowledge series Donna Drucker traces the history of modern contraception outlining the development manufacturing and use of contraceptive methods from the opening of Dr

Jacobs's clinic to the present Drucker approaches the subject from the perspective of reproductive justice the right to have a child the right not to have a child and the right to parent children safely and healthily Drucker describes contraceptive methods available before the pill including the diaphragm dispensed at the Jacobs clinic and condom spermicidal jellies and periodic abstinences She looks at the development and dissemination of the pill and its chemical descendants describes technological developments in such non hormonal contraceptives as the cervical cap and timing methods including the rhythm method favored by the Roman Catholic church and explains the concept of reproductive justice Finally Drucker considers the future of contraception the adaptations of existing methods new forms of distribution and ongoing efforts needed to support contraceptive access worldwide

The Color Line and the Assembly Line Elizabeth Esch, 2018-05-04 The Color Line and the Assembly Line tells a new story of the impact of mass production on society Global corporations based originally in the United States have played a part in making gender and race everywhere Focusing on Ford Motor Company's rise to become the largest richest and most influential corporation in the world The Color Line and the Assembly Line takes on the traditional story of Fordism Contrary to popular thought the assembly line was perfectly compatible with all manner of racial practice in the United States Brazil and South Africa Each country's distinct racial hierarchies in the 1920s and 1930s informed Ford's often divisive labor processes Confirming racism as an essential component in the creation of global capitalism Elizabeth Esch also adds an important new lesson showing how local patterns gave capitalism its distinctive features

*Ordinary Whites in Apartheid Society* Neil Roos, 2024-02-06 How were whites implicated in and shaped by apartheid culture and society and how did they contribute to it In *Ordinary Whites in Apartheid Society* historian Neil Roos traces the lives of ordinary white people in South Africa during the apartheid years beginning in 1948 when the National Party swept into power on the back of its catchall apartheid slogan Drawing on his own family's story and others Roos explores how working class whites frequently defied particular aspects of the apartheid state but seldom opposed or even acknowledged the idea of racial supremacy which lay at the heart of the apartheid society This cognitive dissonance afforded them a way to simultaneously accommodate and oppose apartheid and allowed them to later claim they never supported the apartheid system *Ordinary Whites in Apartheid Society* offers a telling reminder that the

politics and practice of race in this case apartheid era whiteness derive not only from the top but also from the bottom

Transformation of Archives and Heritage Education in Post-apartheid South Africa Geraldine Frieslaar, Olusegun Morakinyo, 2023-06-10 Although there have been significant strides to transform the demographics of archive and museum personnel develop new museums and heritage institutions and heritage training initiatives in post apartheid South Africa the Eurocentric model of the archive museum and heritage sector has largely remained intact Despite the euphoria around the transformation of heritage in the beginnings of post apartheid South Africa it can be argued that the transformation of heritage institutions has been superficial and cosmetic with the ideological foundation of the colonial archive and museum as well as Eurocentric modalities of heritage education remaining solid largely unmoved and under continuing challenge This is the thrust of this book which reflects on the transformation of archives and museum and heritage education in South Africa and argues for meaningful transformation of the sector through a decolonisation from its Eurocentric mooring

**Poverty Knowledge in South Africa** Grace Davie, 2015-02-05 Poverty is South Africa's greatest challenge But what is poverty How can it be measured And how can it be reduced if not eliminated In South Africa human science knowledge about the cost of living grew out of colonialism industrialization apartheid and civil resistance campaigns which makes this knowledge far from neutral or apolitical South Africans have used the Poverty Datum Line PDL Gini coefficients and other poverty thresholds to petition the state to chip away at the pillars of white supremacy and more recently to criticize the postapartheid government's failures to deliver on some of its promises Rather than promoting one particular policy solution this book argues that poverty knowledge teaches us about the dynamics of historical change the power of racism in white settler societies and the role of grassroots protest movements in shaping state policies and scientific categories Readers will gain new perspectives on today's debates about social welfare redistribution and human rights and will ultimately find reasons to rethink conventional approaches to advocacy

Waste of a White Skin Tiffany Willoughby-Herard, 2015-01-06 A pathbreaking history of the development of scientific racism white nationalism and segregationist philanthropy in the U S and South Africa in the early twentieth century Waste of a White Skin focuses on the American Carnegie Corporation's study of race in South Africa the Poor White Study and its influence on the creation of apartheid This book demonstrates the ways in which U S elites supported apartheid and Afrikaner Nationalism in the critical period prior to 1948 through philanthropic interventions and shaping scholarly knowledge production Rather than comparing racial democracies and their engagement with scientific racism Willoughby-Herard outlines the ways in which a racial regime of global whiteness constitutes domestic racial policies and in part animates black consciousness in seemingly disparate and

discontinuous racial democracies This book uses key paradigms in black political thought black feminism black internationalism and the black radical tradition to provide a rich account of poverty and work Much of the scholarship on whiteness in South Africa overlooks the complex politics of white poverty and what they mean for the making of black political action and black people's presence in the economic system Ideal for students scholars and interested readers in areas related to U S History African History World History Diaspora Studies Race and Ethnicity Sociology Anthropology and Political Science      **Facing Eugenics** Erika Dyck, 2013-01-01 Facing Eugenics is a social history of sexual sterilization operations in twentieth century Canada Looking at real life experiences of men and women who either coercively or voluntarily participated in the largest legal eugenics program in Canada it considers the impact of successive legal policies and medical practices on shaping our understanding of contemporary reproductive rights The book also provides deep insights into the broader implications of medical experimentation institutionalization and health care in North America Erika Dyck uses a range of historical evidence including medical files court testimony and personal records to place mental health and intelligence at the centre of discussions regarding reproductive fitness Examining acts of resistance alongside heavy handed decisions to sterilize people considered unfit Facing Eugenics illuminates how reproductive rights fit into a broader discussion of what constitutes civil liberties modern feminism and contemporary psychiatric survivor and disability activism
