Race And Other Stories:

The Race and Other Stories Renee Marie Mitchell, 1999 "Collecting Stamps Would Have Been More Fun" Jordan Stouck, David Stouck, 2010-07-15 This unique exchange of letters between literary icon Sinclair Ross and several prominent writers publishers agents and editors asks why many Canadian artists especially those in western provinces spent a lifetime struggling for recognition and remuneration Featuring exchanges with Earle Birney Margaret Laurence and Margaret Atwood among others this collection exposes the conditions of cultural work in Canada for much of the twentieth century This vivid often moving selection of professional and personal letters plus the only formal interview Ross ever gave provides a valuable resource for those engaged with the history of publishing in Canada as well as for those with an interest in Canadian literature **"Collecting Stamps Would Have Been More Fun"** Sinclair Ross, 2010-07-15 The peculiar struggles of Canadian authors are writ large in the letters of Sinclair Ross The Call of Cthulhu and Other Stories Lovecraft H., Howard Lovecraft was an American writer who achieved posthumous fame through his influential works of horror fiction Despite the fact that he was virtually unknown before he died today he is known as the most influential author in his genre The Call of Cthulhu and Other Stories is a collection of wonderful short stories such as Dagon The Nameless City and The Call of Cthulhu These stories full of mystery and fantastic creatures have captured the minds of readers all over the world

Northern Paiute-Bannock Dictionary, 2012-05-22 Based on extensive fieldwork that spanned more than 50 years this comprehensive dictionary is a monumental achievement and will help to preserve this American Indian language that is nearing extinction *Disaffected* Xine Yao, 2021-09-08 In *Disaffected* Xine Yao explores the racial and sexual politics of unfeeling affects that are not recognized as feeling as a means of survival and refusal in nineteenth century America She positions unfeeling beyond sentimentalism s paradigm of universal feeling Yao traces how works by Herman Melville Martin R Delany Elizabeth Stuart Phelps Frances Ellen Watkins Harper and Sui Sin Far engaged major sociopolitical issues in ways that resisted the weaponization of white sentimentalism against the lives of people of color Exploring variously pathologized racialized queer and gendered affective modes like unsympathetic Blackness queer female frigidity and Oriental inscrutability these authors departed from the values that undergird the politics of recognition and the liberal project of inclusion By theorizing feeling otherwise as an antisocial affect form of dissent and mode of care Yao suggests that unfeeling can serve as a contemporary political strategy for people of color to survive in the face of continuing racism and white fragility Duke University Press Scholars of Color First Book Award recipient *The Editor; the Journal of Information for Literary Workers*, 1909 Sport and Monstrosity in Science Fiction Derek Thiess, 2019 This book pits the imaginative sports of science fiction against our widespread suspicion of the monstrous athletic body The biopolitical nature of sport demands we see these bodies as our bodies capable of the greatest physical feats science fiction can imagine but also our worst fears of injury and death **The Canadian Short Story** Reingard M. Nischik, 2007 Beginning in the 1890s reaching its first full

realization by modernist writers in the 1920s and brought to its heyday during the Canadian Renaissance starting in the 1960s the short story has become Canada's flagship genre. It continues to attract the country's most accomplished and innovative writers today among them Margaret Atwood, Mavis Gallant, Alice Munro, Carol Shields and many others. Yet in contrast to the stature and popularity of the genre and the writers who partake in it, surprisingly little literary criticism and theory has been devoted to the Canadian short story. This collection redresses that imbalance by providing the first collection of critical interpretations of a range of thirty well-known and often anthologized Canadian short stories from the genre's beginnings through the twentieth century. A historical survey of the genre introduces the volume and a timeline comparing the genre's development in Canada, the US and Great Britain via representative examples completes it. The collection is geared both to specialists in and to students of Canadian literature. For the latter it is of particular benefit that the volume provides not only a collection of interpretations but a comprehensive introduction to the history of the Canadian short story.

Reingard M Nischik is professor and chair of American Literature at the University of Constance, Germany. Reflections on the Teaching of Programming Jens Bennedsen, Michael E. Caspersen, Michael Kölling, 2008-05-20. This state-of-the-art survey reflecting on the teaching of programming has been written by a group of primarily Scandinavian researchers and educators with special interest and experience in the subject of programming. The 14 chapters contributed by 24 authors present practical experience gathered in the process of teaching programming and associated with computing education research work. Special emphasis is placed on practical advice and concrete suggestions. The authors are all members of the Scandinavian Pedagogy of Programming Network SPoP and bring together a diverse body of experiences from the Nordic countries. The 14 chapters of the book have been carefully written and edited to present 4 coherent units on issues in introductory programming courses: object-oriented programming, teaching software engineering issues and assessment. Each of these individual parts has its own detailed introduction. The topics addressed span a wide range of problems and solutions associated with the teaching of programming, such as introductory programming courses, exposition of the programming process, apprentice-based learning, functional programming, first problem-based learning, the use of on-line tutorials, object-oriented programming and Java, the BlueJ environment to introduce programming, model-driven programming as opposed to the prevailing language-driven approach, teaching software engineering, testing, extreme programming, frameworks, feedback and assessment, active learning, technology-based individual feedback and mini-project programming exams.
