Race and Politics in School/community Organizations Allan C. Ornstein, 1974 **Race, Politics, and Education in Brazil** Rosana Heringer, Ollie Johnson, Ollie A. Johnson III, 2016-04-29 Brazil has undertaken affirmative action in its universities on an unprecedented scale An expert group of international scholars puts the new policies in historical political and legal context evaluates their outcomes for students and universities and demonstrates that the policies have been successful in addressing racial inequality Race and Politics Leland T. Saito, 1998-07 California s San Gabriel Valley has been called an incubator for ethnic politics Located a mere fifteen minutes from Los Angeles the valley is a brave new world of multiethnic complexity *Class Action; Community Mobilization, Race, and the Politics of Student Assignment in San Francisco* Rand A. Quinn, 2011 The principal goal of the dissertation is to explain the political nature and effect of cultural characterizations on the development of student assignment policy Cultural characterizations are socially constructed portrayals that become influential when stakeholders mobilize to bring about change In education as the professional authority of school boards and superintendents diminishes community stakeholders are increasingly prominent They serve as critical producers and providers of cultural characterizations of public education and its beneficiaries As such the engagement of community stakeholders with public sector institutions organizations and individuals can significantly amplify modify or blunt education policy The dissertation traces the history of community mobilization in San Francisco from 1971 to 2005 during which the federal district court supervised all aspects of the school district s student assignment policy Cultural characterizations of student assignment were structured by three distinct logics of action integration choice and neighborhood These logics were stable but not fixed Changes in the institutional environment coupled with how stakeholders framed understood and shaped these logics led to transformations in student assignment policy that ultimately altered the educational experience of multiple generations of public school students Data are drawn primarily from archival documents from the federal district court the school district and community organizations mainstream and community newspaper articles letters to the editor and editorials and retrospective interviews with key stakeholders Handbook of Critical Race Theory in Education Marvin Lynn, Adrienne D. Dixon, 2021-10-25 This handbook illustrates how education scholars employ Critical Race Theory CRT as a framework to bring attention to issues of race and racism in education It is the first authoritative reference work to provide a truly comprehensive description and analysis of the topic from the defining conceptual principles of CRT in Law that gave shape to its radical underpinnings to the political and social implications of the field today It is divided into six sections covering innovations in educational research policy and practice in both schools and in higher education and the increasing interdisciplinary nature of critical race research New chapters broaden the scope of theoretical lenses to include LatCrit AsianCrit and Critical Race Feminism as well as coverage of DisCrit Studies Research Methods and other recent updates to the field This handbook remains the definitive statement on the state of critical race

theory in education and on its possibilities for the future

Handbook of Education Policy Research 2nd Edition Lora Cohen-Vogel, *Saul Alinsky and the Dilemmas of Race*

Mark Santow, 2023-09-15 A groundbreaking examination of Saul Alinsky's organizing work as it relates to race Saul Alinsky is the most famous even infamous community organizer in American history Almost single handedly he invented a new political form community federations which used the power of a neighborhood's residents to define and fight for their own interests Across a long and controversial career spanning more than three decades Alinsky and his Industrial Areas Foundation organized Eastern European meatpackers in Chicago Kansas City Buffalo and St Paul Mexican Americans in California and Arizona white middle class homeowners on the edge of Chicago's South Side black ghetto and African Americans in Rochester Buffalo Chicago and other cities Mark Santow focuses on Alinsky's attempts to grapple with the biggest moral dilemma of his age race As Santow shows Alinsky was one of the few activists of the period to take on issues of race on paper and in the streets on both sides of the color line in the halls of power and at the grassroots in Chicago and in Washington DC Alinsky's ideas actions and organizations thus provide us with a unique and comprehensive viewpoint on the politics of race poverty and social geography in the United States in the decades after World War II Through Alinsky's organizing and writing we can see how the metropolitan color line was constructed contested and maintained on the street at the national level and among white and black alike In doing so Santow offers new insight into an epochal figure and the society he worked to change Education Policy and Racial Biopolitics in Multicultural Cities Kalervo N. Gulson, P. Taylor Webb, 2017-07-26

For decades now school choice has been growing in urban areas around the world but we've not yet deeply analyzed the ways that such programs interact with the complicated politics of race and ethnicity in contemporary multicultural cities This book offers a close look at such questions through the case of the twenty year struggle within Toronto's black community to introduce black focused curricula and schools which culminated in the opening of the publicly funded Africentric Alternative School in Toronto in 2009 The authors offer a detailed analysis of the policy process and practices involved in the battle for and creation of the school and they draw lessons from it for the politics of education in other cities **Testing Regimes,**

Accountabilities and Education Policy Bob Lingard, Goli Rezai-Rashti, Wayne Martino, 2017-10-02 Around the globe various kinds of testing including high stakes national census testing have become meta policies steering educational systems in particular directions and having great effects on schools and on teacher practices as well as upon student learning and curricula There has also been a complementary global aspect to this with the OECD's PISA and IEA's TIMSS and PIRLS

which have had impacts on national education systems and their policy frameworks While there has been a globalized educational policy discourse that suggests that high stakes standardised testing will drive up standards and enhance the quality of a nation s human capital and thus their international economic competitiveness this discourse still manifests itself in specific vernacular path dependent ways in different nations High stakes testing and its effects can also be seen as part of the phenomenon of the datafication of the world and policy as numbers linked to other reforms of the state including new public management network governance and top down and test based modes of accountability This edited collection provides theoretically and empirically informed analyses of these developments This book was originally published as a special issue of the Journal of Education Policy

Charter Schools, Race, and Urban Space Kristen L. Buras, 2014-07-17 Charter schools have been promoted as an equitable and innovative solution to the problems plaguing urban schools Advocates claim that charter schools benefit working class students of color by offering them access to a portfolio of school choices In *Charter Schools Race and Urban Space* Kristen Buras presents a very different account Her case study of New Orleans where veteran teachers were fired en masse and the nation s first all charter school district was developed shows that such reform is less about the needs of racially oppressed communities and more about the production of an urban space economy in which white entrepreneurs capitalize on black children and neighborhoods In this revealing book Buras draws on critical theories of race political economy and space as well as a decade of research on the ground to expose the criminal dispossession of black teachers and students who have contributed to New Orleans culture and history Mapping federal state and local policy networks she shows how the city s landscape has been reshaped by a strategic venture to privatize public education She likewise chronicles grassroots efforts to defend historic schools and neighborhoods against this assault revealing a commitment to equity and place and articulating a vision of change that is sure to inspire heated debate among communities nationwide

Urban Politics Myron A. Levine, 2019-07-24 *Urban Politics* blends the most insightful classic and current political science and related literature with current issues in urban affairs The book s integrative theme is power demonstrating that the study of urban politics requires an analyst to look beyond the formal institutions and procedures of local government The book also develops important subthemes the impact of globalization the dominance of economic development over competing local policy concerns the continuing importance of race in the urban arena local government activism versus the limits imposed on local action by the American constitutional system and economic competition and the impact of national and state government action on cities *Urban Politics* engages students with pragmatic case studies and boxed material that use classic and current urban films and TV shows to illustrate particular aspects of urban politics The book s substantial concluding discussion of local policies for environmental sustainability and green cities also appeals to today s students Each chapter has been thoroughly rewritten to clearly relate the content to current events and academic literature including the following the importance of the intergovernmental city the role of local governments as active policy

actors and vital policy makers even in areas outside traditional municipal policy concerns the prospects for urban policy and change in and beyond the Trump administration including the ways in which urban politics is affected by but not determined by Washington Mixing classic theory and research on urban politics with the most recent developments and data in urban and metropolitan affairs *Urban Politics* 10e is an ideal introductory textbook for students of metropolitan and regional politics and policy The book's material on citizen participation urban bureaucracy policy analysis and intergovernmental relations also makes the volume an appropriate choice for Urban Administration courses Chapter 2 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Education and Poverty in Affluent Countries Carlo Raffo, Alan Dyson, Helen Gunter, Dave Hall, Lisa Jones, Afroditi Kalambouka, 2009-12-04 For the first time researchers policymakers and practitioners across the world will have access to a comprehensive mapping of research evidence and policy strategies about education and poverty in affluent countries Although there is widespread agreement that poverty and poor educational outcomes are related there are competing explanations as to why that should be the case This is a major problem for practitioners policy makers and researchers who are looking for pointers to action or straightforward ways of understanding an issue that troubles education systems across the world This unique book brings scholarship and analysis from some of the most influential researchers and writers on education and poverty within one text The authors provide a synthesising framework that will help researchers and policy makers to examine future educational policy in a holistic and comprehensive fashion

Mayors and Schools Stefanie Chambers, 2006 This book examines the national trend toward mayoral control of big city school districts through comparative case studies of Chicago and Cleveland two school districts that adopted mayoral control during the 1990s Chambers takes up the question of whether granting control to mayors in major cities will indeed fix public school systems She finds that although both cities have experienced noteworthy improvements in student performance since mayoral control the increased centralization of decision making has reduced minority participation in democratic politics Chambers argues that this conundrum of improved performance at the cost of decreased minority participation could undermine the very democratic and civic values that schools try to teach In a concluding chapter she offers several suggestions for better incorporating minority participation educational decisions even while centralizing more power in mayors offices

Closest of Strangers: Liberalism and the Politics of Race in New York Jim Sleeper, 1991-09-17 In this study of race relations in N Y C Sleeper an editorial writer for New York Newsday harshly criticizes both black leaders and their liberal supporters for pointing a finger at America's racist society rather than setting concrete goals to overcome inequality Kirkus Reviews A report of the current state of race relations in New York City which examines the differing views of militants liberals and forgotten minorities and presents suggestions for racial common sense that attempt to demolish long standing stereotypes
