Racial Attitudes In America Trends And Interpretations Social Trends In The United States:

Racial Attitudes in America Howard Schuman, 1997 This new edition brings fully up to date a book widely praised for its clear and objective presentation of changes in American racial attitudes during the second half of the twentieth century The book retains the division of racial attitudes into principles of equality government implementation of those principles and social distance but adds questions concerning affirmative action and beliefs about sources of inequality A conceptual section now opens the book evidence on social desirability has been added and a new chapter deals with cohort effects and with the impact of income education and gender In key instances randomized experiments are introduced that test hypotheses more rigorously than is ordinarily possible with survey data Throughout the authors have reconsidered earlier ideas and introduced new thinking

Racial Attitudes in America Howard Schuman, Charlotte Steeh, Lawrence Bobo, 1988 This book traces changes in American attitudes toward racial issues that have taken place between the 1940s and the 1980s a crucial period that encompasses the civil rights revolution the growth of black militancy and white resistance and the enactment of affirmative action legislation The authors are the first to compare data about black and white attitudes collected by three major survey organizations Gallup the National Opinion Research Center and the Institute for Social Research They make careful distinctions between attitudes toward principles of racial equality and attitudes toward government action to implement those principles The wide research base and methodological sophistication of their analysis yield conclusions quite different from those of earlier more narrowly drawn studies For example they find that while there has been a striking increase in support for principles of equality and fairness support for some kinds of implementation of these ideals lags far behind or has even declined among both blacks and whites The implementation measures considered range from busing to achieve integration of schools to laws requiring equal opportunity in employment In addition to reanalyzing survey data the authors have also performed several innovative experiments on the wording and context of survey questions to help them interpret the data more accurately

Eliminating Racism Phyllis A. Katz, Dalmás A. Taylor, 2013-06-29 The chapters presented here provide the reader with an awareness of the divergent views of what constitutes racism and frameworks for reducing it This book points out that the dialogue and research on this subject since the mid 1970s have yielded increased controversy

over the theories foundation and continued existence of racism Ironically what we viewed in the 1954 Brown decision and the Civil Rights Act of 1964 as the beginning of the end of racism turned out to be the beginning of confusion over the course of action to ensure societal acceptance of political mandates Hence the title of this book captures the essence of the emotional core of any forum for examining racism past and present One of the most controversial forums has been that of education beginning with the U S Supreme Court's 1954 ruling in Brown v Board of Education Behind every event that has spawned controversy is a profile in courage It was not a simple decision for the players in the scenario of the Brown v Board of Education case to step forward and present themselves as evidence of discrimination Black parents supported by black organizations viewed this legal action as a chance for equal opportunity Yet the 1950s were a time when black communities were pained by the thought that bigotry and institutional racism would forever stand in the way of their achieving equality

Whiteness Interrupted Marcus Bell, 2021-06-28 In *Whiteness Interrupted* Marcus Bell presents a revealing portrait of white teachers in majority black schools in which he examines the limitations of understandings of how white racial identity is formed Through in depth interviews with dozens of white teachers from a racially segregated urban school district in Upstate New York Bell outlines how whiteness is constructed based on localized interactions and takes a different form in predominantly black spaces He finds that in response to racial stress in a difficult teaching environment white teachers conceptualized whiteness as a stigmatized category predicated on white victimization When discussing race outside majority black spaces Bell s subjects characterized American society as postracial in which race seldom affects outcomes Conversely in discussing their experiences within predominantly black spaces they rejected the idea of white privilege often angrily and instead focused on what they saw as the racial privilege of blackness Throughout Bell underscores the significance of white victimization narratives in black spaces and their repercussions as the United States becomes a majority minority society
