Racial Equality In America Jefferson Lecture In The Humanities 1976:

Afro-American Life, History and Culture, 1985 **Black/white Relations in American History** Leslie Vincent Tischauser, 1998 An annotated bibliography of more than 700 significant works concerning the function of race in American history It evaluates the most important historical sociological and psychological studies published since 1944 An introductory chapter describes and evaluates key general works on the origin and meaning of race and race relations After the introduction chapters are arranged in chronological order All consequential studies of slavery on the national state and local level are included with a brief synthesis of the major findings of the study The book continues through the Civil War the Reconstruction segregation and Jim Crow up to and including the ongoing Civil Rights movement begun in the late 1950s A final chapter includes works that attempt to imagine the cost economically socially and politically of black white racism and discrimination in the United States **Housing and Planning References**, 1977 **Public Management Sources** United States. Bureau of the Budget. Library, 1977 *Annual Report* National Endowment for the Humanities, **Racial Classification and History** E. Nathaniel Gates, 1997 Explores the concept of race The term race which originally denoted genealogical or class identity has in the comparatively brief span of 300 years taken on an entirely new meaning In the wake of the Enlightenment it came to be applied to social groups This ideological transformation coupled with a dogmatic insistence that the groups so designated were natural and not socially created gave birth to the modern notion of races as genetically distinct entities The results of this view were the encoding of race and racial hierarchies in law literature and culture How racial categories facilitate social control The articles in the series demonstrate that the classification of humans according to selected physical characteristics was an arbitrary decision that was not based on valid scientific method They also examine the impact of colonialism on the propagation of the concept and note that racial categorization is a powerful social force that is often used to promote the interests of dominant social groups Finally the collection surveys how laws based on race have been enacted around the world to deny power to minority groups A multidisciplinary resource This collection of outstanding articles brings multiple perspectives to bear on race theory and draws on a wider range of periodicals than even the largest library usually holds Even if all the articles were available on campus chances are that a student would have to track them down in several libraries and microfilm collections Providing of course that no journals were reserved for graduate students out for binding or simply missing This convenient set saves students substantial time and effort by making available all the key articles in one reliable source Authoritative commentary The series editor has put together a balanced selection of the most significant works accompanied by expert commentary A general introduction gives important background information and outlines fundamental issues current scholarship and scholarly controversies Introductions to individual volumes put the articles in context and draw attention to germinal ideas and major shifts in the field After reading the material even a beginning student will have an excellent grasp of the basics of the subject Also

available individually by volume 1 The Concept of Race in Natural and Social Science 0 8153 2600 9 288 pages 2 Cultural and Literary Critiques of the Concepts of Race 0 8153 2601 7 3 Racial Classification and History 0 8153 2602 5 4 The Judicial Isolation of the Racially Oppressed 0 8153 2599 1 **The Kaiser Index to Black Resources, 1948-1986: D-H**, 1992
