## Racing Trains Transport Railway:

The Great Train Race Allan Mitchell, 2006-03-01 From their origins railways produced an intense competition between the two major continental systems in France and Germany Fitting a new technology into existing political institutions and social habits these two nations became inexorably involved in industrial and commercial rivalry that eventually escalated into the armed conflict of 1914 Based on many years of research in French and German archives this study examines the adaptation of railroads and steam engines from Britain to the continent of Europe after the Napoleonic age A fascinating example of how the same technology borrowed at the same time from the same source was assimilated differently by the two continental powers this book offers a groundbreaking analysis of the crossroads of technology and politics during the first Industrial Revolution

Dirt Track Auto Racing, 1919-1941 Don Radbruch, 2015-03-07 Prior to World War I auto racing featured expensive machines and teams financed by auto factories The teams toured the country and most of the races were held in large cities so the vast majority of Americans never saw a race All this changed after World War I though and in the 1920s and 1930s there were approximately 1 000 dirt tracks in the United States and Canada The dirt tracks offered small time racing little prize money and minimal publicity but people loved it This pictorial history documents dirt track racing with what are today called sprint cars around the United States from 1919 to 1941 Information on dirt track racing in Canada during this time is also provided Regionally divided chapters detail the drivers tracks and specific races of each area of the country Some of the drivers went on to win fame and fortune while others faded into obscurity Tracks included well known facilities as well as out of the way sites few people had ever heard of The cars ranged from state of the art machines to the more common home built
