The Growth of Religious Diversity - Vol 1 Gerald Parsons,2012-11-12 This two volume set considers the role and significance of religion in post war Britain focusing in particular upon the closely inter related themes of the decline of a specifically Christian Society and the emergence of a culturally and religiously plural society Three core questions are examined in depth to what extent and in what ways has religion remained a significant factor in British culture and society in the period since 1945 what role does religion play in interpreting and understanding the development of a multi cultural and multi ethnic society in post war Britain and to what extent has Britain remained or ceased to be a religious society during this period Volume 1 *Traditions* analyses the history and development of the major religious groups present in Britain in the period since 1945 The major religious traditions examined include the traditional Christian churches Judaism Islam Hinduism Sikhism Afro Caribbean religious groups New Religious Movements and the implicit religion of the silent majority who remain detached from organised religion but are by no means simply secular Volume 2 *Controversies* explores some of the challenges tensions and controversies presented by the emergence of an increasingly religiously plural society in Britain since 1945 In particular it focuses on the impact of religious pluralism on both the Christian churches and other religious traditions the relationship between communal and national identities and religion women and religion and the relationship between religion and changing attitudes to personal and especially sexual morality

Margaret S. Archer, Jonathan Q. Tritter, 2013-04-03 Rational Choice Theory is flourishing in sociology and is increasingly influential in other disciplines Contributors to this volume are convinced that it provides an inadequate conceptualization of all aspects of decision making of the individuals who make the decisions of the process by which decisions get made and of the context within which decisions get made The critique focuses on the four assumptions which are the bedrock of rational choice rationality the theory's definition of rationality is incomplete and cannot satisfactorily incorporate norms and emotions individualism rational choice is based upon atomistic individual decision makers and cannot account for decisions made by couples groups or other forms of collective action process the assumption of fixed well ordered preferences and perfect information makes the theory inadequate for situations of change and uncertainty aggregation as methodological individualists rational choice theorists can only view structure and culture as aggregates and cannot incorporate structural or cultural influences as emergent properties which have an effect upon decision making The critique is grounded in discussion of a wide range of social issues including race marriage health and education **Foreigners, minorities and integration**

Stringer, 2016-05-23 Religious diversity is an ever present and increasingly visible reality in cities across the world It is an issue of immediate concern to city leaders and members of religious communities but do we really know what ordinary members of the public the people who live in the city really think about it Major news items inter religious violence and notorious public events often lead to negative views being expressed especially among those who

would not consider themselves to have a religious identity of their own Martin Stringer explores the highly complex series of discourses around religion and religious diversity that are held by ordinary members of the city discourses that are often contradictory in themselves and discourses that show that attitudes to religion vary considerably depending on context and wider local or national narratives Drawing on examples from UK particularly Birmingham one of the UK's most diverse cities Europe and the United States Stringer offers some practical suggestions for ways in which discourses of religious diversity can be managed in the future Students in the fields of religious studies sociology anthropology and urban studies practitioners involved in inter religious debates and church and other faith leaders and politicians should all find this book an invaluable addition to ongoing debates

Integration in Multicultural England Jörg Friedrichs, 2025-07-24 Positive relations between Muslims and non Muslims are important for the future in Britain and beyond By studying community relations this book takes an innovative approach that moves beyond mapping British Muslims or British Islam Instead Jörg Friedrichs discusses the actual ways Muslims and non Muslims relate or fail to relate where it matters most namely in diverse inner cities Is Britain a multicultural country is it moving towards greater integration or is this a false dichotomy Given their unique everyday experience inner city residents prove to be experts when it comes to community relations To give them a voice and learn from their experience the book takes us on a tour of diverse English inner cities Reassuringly the grassroots perspective of residents is consistent with a vision of integration in multicultural England Residents are concerned not so much about hot button issues like extremism or terrorism Instead their minds are set on practical matters how to coexist peacefully in stressful urban environments and how to find love and raise families when norms diverge Caught between grievance and aspiration inner city residents from any background express disappointment at Muslim and non Muslim parents sending their children to different schools They also discuss whether governance should be community blind or community based and if Britain is ready for a Muslim Prime Minister In all of this Muslim and non Muslim residents acknowledge that we live in a multicultural society For most however it does not follow

that we should adopt multiculturalism as an ideology Instead most people crave and support a move towards greater integration Towards a European Islam J. Nielsen,1999-08-04 An excellent exploration of Islam in Western Europe has developed from early immigration and settlement to the point where a native generation is developing ways of being European and Muslim England is given special attention as a case study but as the discussion moves into the present and the future reference is made to all of western Europe Factors in this process not only arise from the Muslim communities themselves but also from the inherited structures of European society and state Although the issues are complex and tense the author is generally optimistic about the outcome Religion L. M. Barley,C. D. Field,B. A. Kosmin,J. S.
