Researching Race and Racism Martin Bulmer,John Solomos,2004-07-31 Race and racism have become huge areas of study in the social sciences over the past two decades However whilst this has been reflected in the growing body of theoretical and empirically based work surprisingly little has been published that explores the methodological and practical issues involved in researching race In Researching Race and Racism Martin Bulmer and John Solomos have brought together contributions from some of the leading researchers in the

field using the benefit of their experience to explore the practical and ethical issues involved in doing research in this sometimes controversial often heavily politicised field This book will provide students and researchers both new to the field and experienced alike with an invaluable tool to help them find their way      *The Routledge International Handbook of Discrimination, Prejudice and Stereotyping* Cristian Tileagă, Martha Augoustinos, Kevin Durrheim, 2021-08-29 This handbook explores prejudice stereotyping and discrimination primarily as phenomena embedded in the social organization of societies and connected to structural factors and larger societal systems It offers a unique critical and cross disciplinary approach to the study of contemporary manifestations of prejudice stereotyping and discrimination New socio psychological analyses of the most pressing social problems of our age bring into view future directions of research on prejudice stereotyping and discrimination oriented to social change and collective action and that engage with wider systems of norms and discourse The editors draw on social psychology sociology social policy clinical psychology cultural studies and feminist antiracist and decolonizing social science to show how social psychology can successfully rekindle its intellectual dialogue with kindred social science fields to create broader foundations for the exploration of the paradoxes lodged at the heart of the social expression of prejudice in liberal democracies This is essential reading for anyone interested in prejudice discrimination and stereotypes The handbook will be of interest to academics and researchers exploring both the quantitative and qualitative aspects of discrimination inequality and social exclusion as well as students undertaking masters or doctoral studies in social psychology political psychology and political science
