

Reading Strategies

Before Reading

Predict—Check out the headings, bold fonts, and any diagrams in a chapter. Skim it and guess what the chapter may be about.

During Reading

Question—Raise questions as you read. Write down words you don't know and look them up in the dictionary. Be skeptical about an author's claims; think of yourself as an investigator. Did the author prove what he or she said? How? Did the author write something you don't understand? Can you guess what he or she meant based on the context?

Visualize—Slowly read any parts where there are phrases with sensory details, such as sight, sound, touch, smell, and taste. Give yourself a second to imagine them in your own way.

Make Connections—Consider how you relate to the text you are reading. What does it make you think about from your life, work, or other readings, films, or media?

After Reading

Summarize—Write a few sentences on what an article, chapter, or passage was about to help you remember what you read.

React—How do you interpret the material? What is your response to the text? What is left to be desired? What did it show you? What more do you know or want to know about? Do you think the author is right or wrong? Why?

Reading Strategies for University Students Kathleen Romstedt, Julia Tevis McGory, 1988 **Research in English Language Teaching** Ruth Roux, Alberto Mora Vázquez, Nelly Paulina Trejo Guzmán, 2012-10-26 Research in English Language Teaching Mexican Perspectives Teacher research takes different forms and serves a variety of purposes but it is conducted by teachers individually or collaboratively with the basic aim of understanding teaching and learning in context. In Mexico, teacher research is starting to gain momentum and newcomers search for guidance and examples. This book can be used by English language teachers, teacher educators, and student teachers who want to develop their professional expertise by investigating learning and teaching in a systematic and organized way. It is also useful for undergraduate students of EFL teaching and applied linguistics who need to produce a thesis or experienced teachers who want to develop a research project for the first time. Research in English Language Teaching Mexican Perspectives combines basic general knowledge and practical advice with reports of research conducted in Mexican educational contexts. PART ONE offers an overview of research and discussion on the teaching research nexus and different ways to meet the challenges of doing research. PART TWO presents accounts of recent research in the national context written by teacher researchers working for different public higher education institutions. These accounts reflect diverse theoretical approaches, topics, methods of data collection and analysis, and styles of reporting. PART THREE includes basic guidelines to write the most common research genres: thesis, conference paper, and research article. The final section contains a glossary of research terms.
