How to Read Your Water Bill

Beaumont-Cherry Valley Water District (BCVWD) knows navigating your water bill can be confusing. We hope this information makes your bill easier to understand.

1 ACCOUNT INFORMATION

This is the information you will need to have on hand if you call with questions about your bill. It includes your account number and the service address, which may be different from the mailing address.

2 METER READING

Meter reading provides data on your previous and current meter reading, including the date the meter was read and the number of units of water you used. Units are measured by CCF (1 CCF = 100 cubic feet).

METER READING

Serial No.	Previous Reading		Current Reading		Date
	Date	Reading	Date	Reading	
11286365	2/10/2020	2244	4/3/2020	2280	48

Serial No: This is the number that identifies your water meter.

Previous Reading: The date your meter was previously read, and the reading number.

Current Reading: The date your meter was most recently read, and the reading number.

Cons: The number of units (CCF) of water consumed in the billing cycle. Your consumption amount will fluctuate throughout the year, as your water needs change. Many properties see an increase in the amount of water used during warmer summer periods. It is common for this to be 2-3 times the amount of cooler winter periods.

To find out how many gallons you used, take the total number of units and multiply it by 7.48 (1 CCF = 7.48 gallons).

Example: 46 units x 7.48 gallons = 34,408 gallons
