Community as Urban Practice Talja Blokland, 2017-05-11 Community is a central idea in urban studies but remains conceptually vague and empirically difficult to work with Building on existing theories of community Talja Blokland offers an important contribution to defining and understanding this key theme Blokland argues that there has been too much focus on community as a stable construct formed by durable relationships with kin friends social groups or neighbours She draws attention to the non durable fluid encounters that constitute community theorizing communities as shared urban practices in a globalizing world The book proposes two core ways of thinking about community the dimension of familiarity defined by our ability to construct identities and the dimension of access defined by our freedom to enter and leave urban spaces These dimensions form various urban configurations which enable us to experience and practise community in diverse ways As this book maintains community is after all an urban practice not a fixed state of affairs

new urbanism within and beyond Europe And can a future urbanity for the 21st century be planned at all In particular it focuses on Hamburg s HafenCity which at around 155 hectares is one of the most prominent city centre development projects in Europe and will increase the size of Hamburg s city centre by 40 percent The project HafenCity serves as a starting point for a conceptually wide ranging debate on the character shape function and meaning of New Downtowns

Gentrification of the City Neil Smith, Peter Williams, 2013-10-15 The author and contributors of this book seek to present alternatives to the mainstream discussions of gentrification It does not present a single coherent vision of the causes effects and experiences of gentrification but a number of different views that do not always coincide What the authors have in common is the attempt to escape a naive empiricism which has dominated much mainstream research as well as the conviction that questions of social class lie at the heart of this issue This book was first published in 1986 *Redevelopment and Race* June Manning Thomas, 2013-04-15 In the decades following World War II professional city planners in Detroit made a concerted effort to halt the city s physical and economic decline Their successes included an award winning master plan a number of laudable redevelopment projects and exemplary planning leadership in the city and the nation Yet despite their efforts Detroit was rapidly transforming into a notorious symbol of urban decay In *Redevelopment and Race* Planning a Finer City in Postwar Detroit June Manning Thomas takes a look at what went wrong demonstrating how and why government programs were ineffective and even destructive to community needs In confronting issues like housing shortages blight in older areas and changing economic conditions Detroit s city planners worked during the urban renewal era without much consideration for low income and African American residents and their efforts to stabilize racially mixed neighborhoods faltered as well Steady declines in industrial prowess and the constant decentralization of white residents counteracted planners efforts to rebuild the city Among the issues Thomas discusses in this volume are the harmful impacts of Detroit s highways the mixed record of urban renewal projects like Lafayette Park the effects of the 1967 riots on Detroit s ability to plan the city building strategies of Coleman Young the city s first black mayor and his mayoral successors and the evolution of Detroit s federally designated Empowerment Zone Examining the city she knew first as an undergraduate student at Michigan State University and later as a scholar and planner Thomas ultimately argues for a different approach to traditional planning that places social justice equity and community ahead of purely physical and economic objectives *Redevelopment and Race* was originally published in 1997 and was given the Paul Davidoff Award from the Association of Collegiate Schools of Planning in 1999 Students and teachers of urban planning will be grateful for this re release A new postscript offers insights into changes since 1997 *Professional Lives, Personal Struggles* Martha Trenna Valado, Randall Amster, 2012-07-06 This edited volume illuminates critical research issues through the particular lens of homelessness bringing together some of the leading scholars in the field from an array of disciplines and perspectives to explore this condition of marginalization and the ethical dilemmas that arise within it The authors provide insights into the realities and

challenges of social research that will guide students activists practitioners policymakers and service providers as well as both novice and seasoned researchers in fields of inquiry ranging from anthropology and sociology to geography and cultural studies Although many texts have explored the subject of homelessness few have attempted to encapsulate and examine the complex process of researching the issue as a phenomenon unto itself Professional Lives Personal Struggles examines the many challenges of conducting ethical research on homelessness as well as the potential for positive change and transformation through the deeply personal accounts of scholars and advocates with extensive experience working in the field Environment & Planning ,1984
