Thomson,1949 **Classic and Contemporary Readings in Sociology** Ian Marsh,Rosie Campbell,Mike Keating,2014-05-12 Classic and Contemporary Readings in Sociology introduces the reader to sociological issues theories and debates providing extracts of primary source material from both classical and contemporary theorists Theorists are examined within their historical and sociological framework and the text provides an analysis of developments in sociological thought and research The text is divided into four main sections Part One Origins and Concepts surveys the history of the discipline of sociology and examines key themes which have influenced sociological theorising and investigation in particular social control culture and socialisation Parts Two and Four Sociological Theories and Sociological Research include a number of readings from the founding theorists and investigators including Auguste Comte Emile Durkheim Karl Marx Max Weber and Charles Booth and also include more recent theoretical writing and research approaches The focus on theory and research is extended by a selection of readings centred around the theme of Differences and Inequalities Part Three these readings provide students with examples of work from an area where sociological theorising and research has been widely applied The Reforming of General Education S. A. Barnett,2017-07-05 This comprehensive examination of general education by Daniel Bell scrutinizes the experiences of Columbia College Harvard and The College of the University of Chicago These three basic models of general education in the country are set against a background of social change which includes a detailed analysis of structural changes in American society the universities and the secondary schools and what Bell has called the emerging postindustrial society Bell attacks the distinction between general education and specialism He holds that one must embody and exemplify general education through disciplines and extend the context of specialism by setting it within the methodological grounds of knowledge The common link between the two is the emphasis on conceptual inquiry By emphasizing modes of conceptualization how one knows rather than what one knows Bell insists that colleges can have a new vivifying function between the pressures of the secondary and graduate schools In his proposals for a new curriculum Bell sets forth a scheme that imagines the first year as an acquisition of necessary historical and humanistic knowledge the next two years as training in a discipline and the last year the third tier the most radical innovation as a new kind of general education course which would brake specialization and apply disciplined knowledge to broad intellectual and policy questions *Readings on Man in Contemporary Society* Columbia College (Columbia University),1952 Circular ,1916 *An Introduction to Contemporary Problems in the United States* Columbia University,1929 *East and West* 335 *Readings in the Background of Contemporary Civilization in Turkey* ,1965 *The Feeling Intellect* Philip Rieff,1990 Collected here for the first time these writings demonstrate the
