Readings In Psychology For The Teacher:

Readings in Psychology for the Teacher Dennis Child,1977-01-01 companion text for Psychology and the Teacher Pref

Readings in Educational Psychology Edgar Stones,2012 The papers in this volume relate to the nature and conditions of classroom learning with particular emphasis on the cognitive aspects They are concerned with the question of concept formation and stress the importance of the teacher s function in ensuring that the child really has assimilated the ideas and not merely the words for the concepts The role of language is fundamental to this theme and the interaction of language thinking and learning is dealt with in the first section of the book This section also provides a context within which subsequent discussions of classroom learning problems can be viewed Some problems concerning the elaboration of a general theory of teaching are then examined with particular reference to possible methods of bridging the gap between research and implementation

Educational Psychology in Context Bruce A. Marlowe,Alan S. Canestrari,2006 Educational Psychology in Context Readings for Future Teachers takes an exciting new approach to educational psychology by addressing the questions that real teachers in real schools ask about real students This book s purpose is to provide a stimulating alternative to traditional texts by helping teachers develop a strong theoretical and research based understanding of how their students learn and develop Unlike other texts this book of major readings is an anthology of primary source readings selected for students entering the teaching profession and for teachers interested in examining learning and development

 Dechant,2013-09-13 In the words of Aldous Huxley Every man who knows how to read has it in his power to magnify himself
 to multiply the ways in which he exists to make his life full significant and interesting Few people question the value of
 reading in fact most extol its virtues As our culture becomes more complex reading plays an increasingly greater role in
 satisfying personal needs and in promoting social awareness and growth In the last 20 years the teaching of this invaluable
 skill has focused so intensely on comprehension and prediction from context that it has lost sight of the significance of
 automaticity and fluency in the word identification process Reading is a synthesis of word recognition and comprehension
 thus this text is about these basic processes and their integration A common plea from teachers today is that research and
 psychology be translated into teaching behavior Therefore the aim of this book is twofold one to identify report organize and
 discuss those bits of data research and theory that are most relevant to the teacher s understanding of the reading process
 and two to help educators to interpret and apply theory and research data to everyday classroom teaching as well as to the
 problems encountered frequently in developmental and remedial teaching *Teaching and Learning* Charles
