Racial Politics And Urban Planning Robert A. Catlin, 2014-10-17 When Richard G. Hatcher became the first black mayor of Gary Indiana in 1967 the response of Gary's white businessmen was to move the entire downtown to the suburbs thereby weakening the city core Meanwhile white business and institutional leaders in Atlanta Detroit and Newark worked with black mayors heading those majority black cities to rebuild their downtowns and neighborhoods Why not Gary Robert A. Catlin who served as Mayor Hatcher's planning advisor from 1982 to 1987 here analyzes the racial conflicts that tore Gary apart He asserts that two types of majority black cities exist Type I including Atlanta Baltimore Detroit and Newark have Fortune 500 corporate headquarters major universities and large medical centers institutions that are placebound and their leaders must work with black mayors Type II cities like Gary lack these resources thus their white leaders feel less compelled to cooperate with black mayors Unfortunately in Gary's case black politicians and white executives fell victim to pettiness and mistrust

and as a result Gary and the entire northwest Indiana region suffered Racial Politics and Urban Planning is required reading for citizens interested in urban affairs Leaders in cities such as Albany and Macon Georgia Monroe Louisiana Mount Vernon New York and Pine Bluff Arkansas should also take note Those cities have just become majority black and are in the Type II category Will they learn from Gary or are they doomed to repeat its mistakes *City Politics* Annika M. Hinze, Dennis R. Judd, 2018-09-03 Praised for the clarity of its writing careful research and distinctive theme that urban politics in the United States has evolved as a dynamic interaction between governmental power private actors and a politics of identity *City Politics* remains a classic study of urban politics Its enduring appeal lies in its persuasive explanation careful attention to historical detail and accessible and elegant way of teaching the complexity and breadth of urban and regional politics which unfold at the intersection of spatial cultural economic and policy dynamics Now in a thoroughly revised tenth edition this comprehensive resource for undergraduate and graduate students as well as well established researchers in the discipline retains the effective structure of past editions while offering important updates including All new sections on immigration the Black Lives Matter Movement the downtown condo boom and the impact of the sharing economy on urban neighborhoods especially the rise of Airbnb Individual chapters introducing students to pressing urban issues such as gentrification sustainability metropolitanization urban crises the creative class shrinking cities racial politics and suburbanization The most recent census data integrated throughout to provide current figures for analysis discussion and a more nuanced understanding of current trends Taught on its own or supplemented with the optional reader *American Urban Politics in a Global Age* for more advanced readers *City Politics* remains the definitive text on urban politics and how they have evolved in the US over time for a new generation of students and researchers *The New American Politics* Bryan D Jones, 2018-02-07 Was 1992 a realigning election Did the midterm elections of 1994 realign the realignment Will 1996 carry the United States forward on yet another changed trajectory In this volume of original essays leading political scientists examine key components of the American agenda and assess the current administration s position in light of historical precedents and future trends Each conclusion is unique born of a combination of the empirical record and its interpretation but essays by Bryan Jones and Larry Dodd help to put the wide ranging views represented here in long term perspective **Problems and Methods in the Study of Politics** Ian Shapiro, Rogers M. Smith, Tarek E. Masoud, 2004-09-09 The study of politics seems endlessly beset by debates about method At the core of these debates is a single unifying concern should political scientists view themselves primarily as scientists developing ever more sophisticated tools and studying only those phenomena to which such tools may fruitfully be applied Or should they instead try to illuminate the large complicated untidy problems thrown up in the world even if the chance to offer definitive explanations is low Is there necessarily a tension between these two endeavours Are some domains of political inquiry more amenable to the building up of reliable scientific knowledge than others and if so how should we deploy our efforts In this book some of the world s most prominent students

of politics offer original discussions of these pressing questions eschewing narrow methodological diatribes to explore what political science is and how political scientists should aspire to do their work
