Regional Mechanisms And International Security In Latin America:

Regional Mechanisms and International Security in Latin America Olga Pellicer de Brody, 1998 A great diversity of points of view on international security one of the most current subjects in the area of international relations coexist in Latin America and the Caribbean This region is immersed in an interesting debate in which reticence and enthusiasm coexist and confront themselves in order to enlarge the functions of regional mechanisms of security or to evaluate experiences acquired either through UN action or recent tendencies of the Security Council The center of debate is also found in the impossible to ignore role of the United States Does the end of the Cold War modify the U S interests in Latin America in the field of security Should existing mechanisms of collective security in the region be strengthened Or should new alternatives be found How far is a shared agenda for security not only with the United States but also between the countries in Latin America itself and among them and the Caribbean possible or desirable How acceptable are the new tendencies of the multilateral organizations in the field of security of the countries in the region These are some of the questions that this book deals with from different points of view It presents a new perspective on the contemporary debate over international security in Latin America and the Caribbean Power Dynamics and Regional Security in Latin America Marcial A.G. Suarez, Rafael Duarte Villa, Brigitte Weiffen, 2017-07-25 This volume explores the repercussions of a changing world order on regional security in Latin America It examines how global and regional power shifts impact on the evolution of regional institutions as well as on state policies adopted in response to regional security challenges such as border conflicts political instability migration drug trafficking organized crime and terrorism Contributions to this volume analyze the topic from three angles power dynamics and its effects on regional security governance the contribution of regional institutions to the management of security challenges and the impact of power dynamics on states shifting security priorities Written by specialists from Brazil Argentina Colombia Mexico the United States and Europe the chapters weave theory and case studies to provide a rich description of the impact of power and politics on regional security in Latin America This book is an invaluable resource for students scholars and practitioners interested in Latin American politics regional cooperation and war and conflict studies as well as international security and international relations in general **Routledge Handbook of Latin American Security** David R. Mares, Arie M. Kacowicz, 2015-07-16 This new Handbook is a comprehensive collection of cutting edge essays on all aspects of Latin American Security by a mix of established and emerging scholars The Routledge Handbook of Latin American Security identifies the key contemporary topics of research and debate taking into account that the study of Latin America s comparative and international politics has undergone dramatic changes since the end of the Cold War the return of democracy and the re legitimization and re armament of the military against the background of low level uses of force short of war Latin America s security issues have become an important topic in international relations and Latin American studies This Handbook sets a rigorous agenda for future research and is organised into five key parts The Evolution of

Security in Latin America Theoretical Approaches to Security in Latin America Different Securitities Contemporary Regional Security Challenges Latin America and Contemporary International Security Challenges With a focus on contemporary challenges and the failures of regional institutions to eliminate the threat of the use of force among Latin Americans this Handbook will be of great interest to students of Latin American politics security studies war and conflict studies and International Relations in general *South America and Peace Operations* Kai Michael Kenkel, 2013-07-18 This volume is the first English language work to focus specifically on South America in the context of peace operations The region of South America has been undergoing significant changes recently with regard to its attitudes towards participation in peace operations Leaving behind a strong reluctance with regard to intervention the states have recently taken on a much stronger presence among UN peacekeepers The foremost showcase of this more robust and responsible stance has been MINUSTAH the current UN mission in Haiti South American contributors provide over half the operation s troops and the Force Commander is provided by Brazil This book is intended as an introduction for researchers to the nexus of issues surrounding South America s increasing influence as a contributor to peace operations The authors provide the reader with a historically and theoretically grounded understanding of what motivates defence policy and decisions on intervention in the region Featuring contributions from prominent thinkers in the field and a broad range of case studies this volume successfully combines practical applicability with diversity of analysis This book will be of much interest to students of peacekeeping South American politics peace and conflict studies security studies and International Relations in general **Ecuador Vs. Peru** Monica Herz, João Pontes Nogueira, 2002 Although the 1995 Cenepa War between Ecuador and Peru was the first military conflict in South America in over 50 years the Ecuador Peru relationship has been one of enduring rivalry This text analyzes the mediation process that followed the 1995 war The United Nations & Regional Security Michael Charles Pugh, Waheguru Pal Singh Sidhu, 2003 Events in Europe over the past decade or so have created a dynamic requiring conceptual and practical adjustments on the part of the UN and a range of regional actors This volume explores the resulting collaborative relationships in the context of peace operations in the Balkans Environmental Security in Latin America Gavin O'Toole, 2017-05-18 This book examines security in Latin America through an environmental lens at a time when this region faces a broad and growing spectrum of threats The book considers the backdrop against which security debates about Latin America have been conducted the extent to which scholarship has been dominated by traditional US strategic concerns and how in the changing context at the end of the Cold War some policymakers within Latin America itself at both national and regional levels began to reposition security It argues that traditional security scholarship focusing on military defence and strategic affairs in this region is hard to explain and out of date and offers reasons why a new focus on environmental threats within a broader human security perspective has much to offer this field Such a focus is justified by the scale of the challenges that environmental degradation is posing in Latin America and the very real impact of climate change there The

book considers how the various theoretical possibilities of the term environmental security all have some potential application to this region where the natural environment is rapidly being securitized by military forces on behalf of their states Finally it proposes that a fruitful approach to Latin America might be one where human and environmental security have parity This book will be of interest to students of environmental security Latin American security human geography and IR in general

Regions and Powers Barry Buzan, Ole Wæver, 2003-12-04 This book develops the idea that since decolonisation regional patterns of security have become more prominent in international politics The authors combine an operational theory of regional security with an empirical application across the whole of the international system Individual chapters cover Africa the Balkans CIS Europe East Asia EU Europe the Middle East North America South America and South Asia The main focus is on the post Cold War period but the history of each regional security complex is traced back to its beginnings By relating the regional dynamics of security to current debates about the global power structure the authors unfold a distinctive interpretation of post Cold War international security avoiding both the extreme oversimplifications of the unipolar view and the extreme deterritorialisations of many globalist visions of a new world disorder Their framework brings out the radical diversity of security dynamics in different parts of the world

Regional Organisations and Security Stephen Aris, Andreas Wenger, 2013-10-30 This book aims to examine the conceptions and practices of security adopted by Regional Organisations ROs across the globe Since the end of the Cold War there has been an increased focus on regions as a relevant realm for security with actors within regional contexts identifying a significant degree of interdependency between one another As a consequence international security has taken on a distinct regionally institutionalised character as seen by the increase in calls for greater utilisation of Chapter VIII Regional Arrangements of the UN in order to create a devolved UN led system of global security management However the idea of a system of global security management is a remote prospect because divergence seems to be as important as commonality in terms of regional security In light of the above Regional Organisations and Security analyses the primary ROs that are active in Africa Asia Eurasia the Middle East and South America The findings of individual case studies are compiled to highlight disparities and similarities in how security is seen prioritised understood practised managed and implemented across regions On this basis the authors reach conclusions about whether we live in an increasingly globalised or regionally distinct world and go on to assess the prospects for a globalised system of security management and consider how this might be developed and organised This book will be of interest to students of comparative regionalism international organisations international security and IR
