9781032270654 The Politics of Urban and Regional Development and the American Exception Kevin R. Cox, 2016-10-12 Although all advanced industrial societies have urban and regional development policies such policy in the United States historically has taken on a very distinct form Compared with the more top down centrally orchestrated approaches of Western European countries US cities and to a lesser degree states take the lead spurred on by developers and those with interest in rent This bottom up policy creates conflict as one city battles with another for new investments and as real estate developers fight over the spoils resulting in highly contentious politics In The Politics of Urban and Regional Development and the American Exception Cox addresses the question of why US policy is so unique In doing so he illustrates the essential characteristics of American regional development through a series of case studies including housing politics in Silicon Valley the history of the Dallas Fort Worth International Airport and a major redevelopment project that was rebuffed in Columbus Ohio Cox contrasts these examples with Western Europe s tradition of centralized governmental involvement and stronger labor movements that historically have been more concerned with creating what he calls the good geography than profits for developers whatever the shortfalls in policy outcomes might be The differences illuminate the peculiar nature of political engagement and local competition in shaping the way US urban development has evolved Governing Metropolitan Areas David K. federal countries its place and role in the governance of these countries varies considerably In some countries local government is considered an essential part of the federal nature of the state and recognized in the constitution as such whereas in others it is simply a creature of the subnational states provinces When referring to local government it is more correct to refer to local governments plural as these institutions come in all shapes and sizes performing widely divergent functions They range from metropolitan municipalities of mega cities to counties small town councils and villages Their focus is either multi purpose in the case of municipalities or single purpose in the case of special districts and school districts What unites these institutions of state is that there is no level of government below them That is also their strength and the source of their democratic claim they are the government closest to the people Political science experts from across the globe examine local governments by drawing on case studies of Australia Austria Brazil Canada Germany India Mexico Nigeria Switzerland Spain South Africa and United States Contributors include Martin Burgi Ruhr University Bochum Luis Cesar de Queiroz Ribeiro Federal University of Rio de Janeiro Jaap de Visser University of Western Cape Habu Galadima University of Jos Sol Garson Federal University of Rio de Janeiro Boris Graizbord National College of Mexico Rakesh Hooja HCM Rajasthan State Institute of Public Administration India Andreas Kiefer European Affairs Office of the Land Salzburg Andreas Ladner Swiss Graduate School of Public Administration George Mathew Institute of Social Sciences India Mike Pagano University of Illinois at Chicago Graham Sansom University of Technology Sydney Franz Schausberger Salzburg University Nico Steytler University of Western Cape Francisco Velasco Caballero Universidad Autonoma de Madrid and Robert Young University of Western Ontario
