Regional Public Finances:

The production and financing of regional public goods (Occasional Paper IECI = Documento de Divulgación SITI ; n. 8) Vito Tanzi, 2005 *Theory of Public Finance in a Federal State* Dietmar Wellisch, 2000-01-13 The central question of this book is whether the assignment of government functions to the individual jurisdictions in a federal state can ensure an optimal allocation of resources and a fair income distribution The analysis thereby gives a new answer to the old question about the optimal degree of fiscal decentralization in a federal state It shows that fiscal decentralization is a method to disclose the preferences of currently living and future generations for local public goods to limit the size of the government and to avoid excessive public debt finance While the allocative branch of the government benefits from fiscal decentralization it is difficult to obtain a distribution of incomes that differs from the outcome that the market brings along
