Ambivalent Journey Richard C. Jones, 2022-09-13 The changing political and economic relationships between Mexico and the United States and the concurrent U S debate over immigration policy and practice demand new data on migration and its economic effects In this innovative study Richard C Jones analyzes migration patterns from two subregions of north central Mexico Coahuila and Zacatecas to the United States He analyzes and contrasts the characteristics of the two migrant populations and interprets the economic impacts of migration upon both home of migration upon both home areas Jones s findings refute some common assumptions about Mexican migration while providing a strong model for further research Jones s study focuses on the ways in which U S migration affects the lives of families in these two subregions Migrants from Zacatecas have traditionally come from rural areas and have gone to California and Illinois Migrants from Coahuila on the other hand usually come from urban areas and have almost exclusively preferred locations in nearby Texas The different motivations of both groups for migrating and the different economic and social effects upon their home areas realized by migrating form the core of this book The comparison also lends the book its uniqueness since no other study has made such an in depth comparison of two areas Jones addresses the basic dichotomy of structuralists who maintain that dependency and disinvestment are the rule for families and communities in sending areas and functionalists who believe that autonomy and reinvestment are the case of migrants and their families in home regions Jones finds that much of the primary literature is based on uneven and largely outdated data that leans heavily on two sending states Jalisco and Michoacan His fresh analysis shows that communities and regions of Mexico rather than families only account for differing migration patterns and differing social and economic results of these patterns Jones s study will be of value not only to scholars and practitioners working in the field of Mexican migration but also for its innovative methodology to anthropologists sociologists political scientists and historians whose interests include human migration patterns in any part of the world

The Health of Aging Hispanics Jacqueline L. Angel, Keith E. Whitfield, 2007-08-06 The emergence of the Hispanic population in the United States and the increasing profile of Latin America on the North and South American continents have raised the profile of Latino issues in the American consciousness Much of this attention however has revolved around trends in culture art food and music or pathological concerns about poverty crime drugs and immigration At best the scholarly and policy assessments of the implications of the impact of Latinos in the United States revolve around Mexican Americans Puerto Ricans and Central Americans as well as the children of an older Cuban population and their struggles to achieve a measure of education healthcare employment and civil rights What have not been adequately addressed are the demographic trends affecting Latinos in the United States Mexico and Latin America particularly the aging of the Hispanic population and its resultant health and long term care needs That Latinos are living longer and shifting from a youthful

population to an increasingly older cohort is little known except among the small cadre of Hispanic gerontologists Ironically this invisibility of aging Hispanics is juxtaposed to the almost picked response of the U S media and public toward the aging of the general U S population and the social and political controversies over Social Security Medicare and health care costs The policy debates of an aging U S population as a whole arise from substantial research and policy analysis a level of attention not seen with regard to the aging of the Hispanic population
