Regional Powerhouse:

Regional Powerhouse Michael J. Enright, Edith Scott, Ka-mun Chang, 2005-06-24 Publisher description China's economic rise has captured the world's imagination. At the forefront has been the Greater Pearl River Delta, a region consisting of Hong Kong, Macao, and part of Guangdong Province whose unique and complex complementarities have created a regional powerhouse of global importance. The authors show how the Greater Pearl River Delta region has benefited from China's economic opening by combining the international orientation, business experience, and financial muscle of Hong Kong and Macao with the land, labor, and skills of the Chinese Mainland. They show how this combination has created an increasing number of world-beating industries that have attracted companies and business people from all around the globe. They show how China's accession into the WTO strengthens the region's position in the national and international economies. Finally, they show how the region's trajectory will lead it to even greater prominence in the future.

The Geopolitics of Regional Power Sören Scholvin, 2016-03-09 In the last two decades various states from the Global South have emerged as important players in international relations. Most popular among them is China. Brazil, India, and South Africa have also taken essential roles in global and regional politics. Compared to traditional great powers, they can be labelled regional great powers or regional powers because their influence is, with the exception of China, concentrated on their neighbourhood. The impact of regions, meaning the impact of geography on the economics and politics of regional powers, is surprisingly understudied. This book analyses how geographical conditions influence the regional economics and politics of South Africa, allowing the author to delineate its region of influence.

Redefining Regional Power in International Relations Miriam Prys, 2012 This book examines the concept of regional power in international relations. Using the emerging powers of India and South Africa as the case studies, it explores how regional powers simultaneously differ and share common features. The book develops a method to classify and evaluate different types of regional powers and applies this typology to contemporary case studies of India and South Africa. Regional power is often expected to have a positive influence on region-specific problems of conflict, economic deprivation, and political instability. In reality, an achievement-expectations gap can be seen in many regional powers which can be analysed and understood through observable variation in regional power. The author discovers that, in addition to the management of the internal regional order, regional powers have to establish individuality whilst fitting into the global international environment, altering both regional dynamics and creating variance in the level of control within the region. Elucidating concepts and definitions, this book is an accessible and in-depth study that both introduces key concepts and provides a framework for the future study of regional power in international relations. *Redefining Regional Power in International Relations* will be of interest to students and scholars of regionalism and international relations.
