Close, 2000-08-22 The doctrine of supranationalism has been most evident in Europe but has become increasingly a global tour de force Supranationalism is the ideological driving force behind the process of European integration and so the European Union the first supranational regional regime SRR But the same doctrine has bequeathed other gifts to the world and to posterity The EU is evolving as a prominent global player and as a result appears to have become an inspiration and model for the proliferation of other SRRs and proto SRRs However as SRRs acquire greater power relative to traditional global players such as nation states a further state of development has ensued entailing the creation of supranational global regimes SGRs signalled by the progress of the United Nations and the World Trade Organisation *The Jurisprudence of the Caribbean Court of Justice and Regional Integration* Indira Rampersad, Anthony Gafoor, 2024-12-06 The book is a joint publication with equal contributions by Dr Indira Rampersad and Justice Dr Anthony Gafoor It presents the first comprehensive analysis of the jurisprudence of the Caribbean Court of Justice in both its original and appellate jurisdictions from 2005 to 2020 It seeks to address the central issue of whether the jurisprudence of the CCJ has the capacity to foster regional integration Through a series of semi structured interviews primary and secondary sources the book harnesses the dynamic interplay between the disciplines of International Relations and Law It claims that by attempting to uphold the rule of law and promote both economic and non economic forms of the second generation regional integration the CCJ aims to inculcate a sense of obligation among member states to uphold both economic agreements and non economic community rights and values *Regionalism, Security and Development in Africa* Ernest Tooichi Aniche, Ikenna Mike Alumona, Innocent Moyo, 2021-04-29 This book charts the history and contemporary landscape of African regionalism investigating how regional cooperation can be used to help to tackle security and development challenges in Africa Africa has a long tradition of regional cooperation with the oldest trade and monetary integration schemes in the developing world but its colonial period and partition of have caused lasting damage that still be seen in today s African economies Contemporary post colonial African regionalism deeply rooted in notions of pan Africanism has served as a means of collective self reliance and economic transformation and development This book starts with the history and theory behind African regionalism before discussing and comparing regional organisations such as the Economic Community of Central African States ECCAS the Economic Community of West African States ECOWAS the Community of Sahel Saharan States CEN SAD Southern African Development Community SADC the Common Market for Eastern and Southern Africa COMESA and the East African Community EAC Finally the book considers how regional integration and cooperation can help to address security and development challenges This ambitious and broad ranging book will be a valuable resource for

The New Nationalism Louis Snyder, 2017-07-05 Nationalism the state of mind in which the individual's supreme loyalty is owed to the nation state remains the strongest of political emotions As a historical phenomenon it is always in flux changing according to no preconceived pattern In *The New Nationalism* Louis L Snyder sees various forms of nationalism and categorizes them as a force for unity a force for the status quo a force for independence a force for fraternity a force for colonial expansion a force for aggression a force for economic expansion and a force for anti colonialism In Snyder's opinion nationalism should be differentiated from Theodore Roosevelt's New Nationalism a phrase he borrowed from Herbert D Croly's *The Promise of American Life* Croly warned that giving too much power to big industry and finance would lead to the degradation of the masses and that state and federal intervention must be pursued on all economic fronts Roosevelt expanded upon this concept and saw the flourishing of democratic government as a means of reviving the old pioneer sense of individualism and opportunity Snyder in contrast extends the work of the two major pioneers in the study of modern nationalism Carlton J H Hayes and Hans Kohn in exploring this most powerful sentiment of modern times and showing how it relates to the political economic and psychological tendencies of historical development

Transcending Member States Babatunde Fagbayibo, 2022-09-14 This book explores innovative and context driven political and legal policy measures designed to expand the powers of the African Union AU in order to meaningfully drive the continental integration process In this regard the book addresses issues of context political will and innovative and inclusive approaches as essential elements that must be considered Africa is currently experiencing one of the most critical phases of its integrative development Since 2015 there have been increasing efforts to develop policies and practices that grant the AU broader powers to coordinate and create binding rules regarding the regional integration process In other words these processes seek to endow the AU with supranational powers like those exercised by the European Union which despite its internal problems remains the most successful experiment in supranationalism in the world This has included the decision to finance the AU through a 0.2% tax on eligible imports into member states the decision to reduce the number of AU Commission portfolios from eight to six the adoption and entry into

force of the much touted Agreement establishing the African Continental Free Trade Area the adoption of the Protocol to the Treaty Establishing the African Economic Community Relating to Free Movement of Persons Right to Residence and Right of Establishment and the adoption of the AU Agenda 2063 policy framework in 2015 How these processes will change the direction of regional integration in Africa the book argues largely depends on the existence of quality driven institutions

Contested Ideas of Regionalism in Asia Baogang He, 2016-09-13 Deepening regionalism in Asia demands new leadership Strong elites who are committed to a supranational identity are a minimum requirement of successful regionalism Regional leaders are increasingly seen as a new set of leaders in Europe Currently Asian regional leaders largely come from the diplomacy community or trade and economic sectors Yet further regionalization demands a new type of leadership from civil society and citizens In this context it is important to cultivate new regional leadership through the development of regional citizenship This book examines contested ideas of regionalism in Asia with a particular focus on two competing ideas of pan Asianism and Pacificism It also identifies a new trend and contestation the fundamental shift from a civilization understanding of regionalism to a technocratic and functional understanding of regionalism in the form of regulatory regionalism It also examines the other contested imaginations of regionalism in Asia including elitist versus participatory approaches to regionalism and democracy centric versus nationalism centric approaches to regionalism

Regional and Global Regulation of International Trade Francis Snyder, 2002-07-05 The processes of legal and economic integration at a regional and global scale have created powerful legal and economic dilemmas They challenge the paradigms of constitutionalism including the State s monopoly of constitutionalism the autonomy of national political communities and the traditional forms of participation and representation The phenomena of globalisation and regional forms of governance have promoted the inter dependence of national political communities and destroyed the artificial boundaries upon which national constitutional democracies are found and from which they derive their legitimacy Furthermore it is inevitable that the development of international trade and economic integration will raise claims for some form of global distributive justice to complement the wealth maximisation arising from free trade This will come from the gradual development of global forms of political discourse and law making challenging State constitutionalism and requiring some of the instruments and theories of constitutionalism The essays in this collection written by leading scholars in international trade law argue the pros and cons of greater regional and global regulation They conclude that whatever the final framework for international trade the critical decisions about institutional form and content will be decided in an emerging global political arena They help to identify this political arena who governs it and according to which

rules and identify the different institutional alternatives in that global political arena **Migration, Social Identities and Regionalism within the Caribbean Community** Oral I. Robinson, 2020-08-08 This book offers a theoretical and

this large research gap by applying a systematic comparative approach Taking into account a huge corpus of empirical data gained through expert interviews and document analysis this study provides the conceptual and empirical groundwork necessary to better understand EU sub regionalism For the timeframe between 2009 and 2018 it analyses the scope of sub regional cooperation in the Baltic Benelux and Visegr d groupings Moreover it compares their respective institutional design political identity foreign policy as well as their external recognition by EU actors A special focus lies on their role in six EU policy cases including EU budget negotiations TTIP the drafting process of the EU Global Strategy refugee relocation quotas the revision of the posted workers directive and defence cooperation through PESCO In its conclusion this book identifies two sub regional archetypes functional hubs and political tools While differing in many regards the shared assessment finds that the overall bridge building efforts of the Baltic Benelux and Visegr d sub regionalisms exceed their spoiling potential
