Regionalization For Development And Accession To The European Union:

Regionalization for Development and Accession to the European Union Gérard Marcou, 2002 **Enlargement of the European Union** Allan F. Tatham, 2009-01-26

The development of EU enlargement has raised many thorny issues unanticipated by the framers of the EC Treaty. A significant upshot of these issues is that the concept of European identity defined in terms of such factors as culture, history and economics has supplanted the long dominant theme of widening and deepening, particularly since the Union's expansion has become primarily eastward. The major contribution of this important book lies in its analysis of the conceptualization and perception of enlargement from various points of view, focusing on the concerns of stakeholders and the identity conflicts and uncertainties incurred by enlargement initiatives. In the course of its presentation, it details the actual pre-accession Europeanization process and its complex history. Among the key elements discussed are the following: the conflict between widening and deepening and the effect on EU institutional reform; institutional requirements on candidate countries; pre-accession criteria and negotiations; administrative capacity; judicial capacity and legal approximation in accession states; capacity of the EU to absorb new Member States and EC law as part of European identity. Also covered are specific historical details of particular pre-accession negotiations, e.g. Greece, Spain, Portugal, Malta and Cyprus; the still inconclusive negotiations with Turkey and the Western Balkan states; and political factors involved in the non-accession of Norway, Iceland and Switzerland. Assembling powerful evidence and applying incisive analysis, the author's conclusion shows that, absent further and major EU institutional reform, it will be difficult for an enlarging Union to continue to deliver the goods. A watershed in the continuing great debate on the fulfilment of the EC Treaty's determination to foster and promote an ever closer union of the peoples of Europe, this book will prove invaluable to anybody interested in the European integration project, particularly lawyers, academics, officials and policymakers in the EU Member States.

Europeanization and Regionalization in the EU's Enlargement to Central and Eastern Europe J. Hughes, G. Sasse, 2004-10-12

This book is a study of EU conditionality and compliance during the enlargement to the Central and Eastern European candidate countries. EU conditionality for membership is widely understood as having been a driving force for Europeanization, providing incentives and sanctions for compliance or non-compliance with EU norms such as the Copenhagen Criteria and the adoption of the *acquis communautaire*. By taking regional policy and regionalization as a case study, this book provides a comparative analysis of the effects of conditionality on the Central and East European countries and explores the many paradoxes and weaknesses in the use of EU conditionality over time.

EU Accession and Spanish Regional Development Carolyn Marie Dudek, 2005

Policymakers saw European Community membership as a way for Spain to secure democracy and promote economic development throughout the country. Nevertheless, regional economic disparities still persist in Spain almost twenty years after it entered the Community, despite significant European allocation of funds to remedy underdevelopment. How did the policies of the European Union impact Spain? What lessons can new EU members

learn from Spain's experience within the European Union Using rich empirical evidence and an innovative comparative analysis this book examines the regional experiences of Galicia and the Valencian Community in Spain The political dynamics and persistence of clientelism which affect policymaking and policy implementation within each region are particularly considered These cases provide new insight to explain why regional economic differences persist in Spain despite efforts to alleviate them Historically grounded and detailed this study analyzes the process of accession and the ignored long term ramifications of accession negotiations and treaties it focuses on the often overlooked contradiction between European regulations and regional development policies and questions whether EU membership has been as beneficial as policymakers thought it would be

Democratization and the European Union Leonardo Morlino, Wojciech Sadurski, 2010-05-31 This book examines in depth the impact of the EU on aspects of the quality of democracy in eight selected post communist countries Considering both the political and legal aspects of the dynamics among institutions and focussing on inter institutional accountability the book analyses how constitutional designs have been effectively implemented to achieve this and to what extent this was the result of EU action In order to make a comparative assessment of the EU on democracies the book features detailed case studies according to their different status vis vis the EU including older new member states Poland and Hungary newer new member states Romania and Bulgaria potential candidates Albania and Serbia and neighbour and remote neighbour states Ukraine and Armenia Each chapter addresses a range of dimensions and most relevant domains of inter institutional accountability that is executive legislative relationships constitutional justice decentralisation and regionalism and the role of ombudsman or other relevant authorities Seeking to assess how important the role of the EU has been in influencing the modes and characteristic of democracies and fundamental rights established in these regions this book will be of interest to students and scholars of comparative politics EU politics Post communist studies and democratization studies

Regionalism Contested Henrik Halkier, 2016-12-05 As we move further into the 21st century the prominence of regions can no longer be taken for granted A certain skepticism has developed with regard to the feasibility of marginal regions achieving self sustained growth and states have maintained their role as regulators of economic and social activities Thus the notion of the region and its significance is currently much debated and contested Illustrated with a wide range of European case studies this volume brings together the main strands of these contestations as economic political and social actors attempt to institutionalise their vision of their region as the dominant form of territorial governance It questions both the external delimitation and the internal constitution of regions and critically analyses the societal processes circumscribing ways in which regions are created maintained and undermined The volume provides a wide range of analytical perspectives to enable an understanding of the current mosaic of regionalism in Europe

Politics in the European Union Ian Bache, Stephen George, Simon Bulmer, 2011-02-17 This is an account of the main developments in the process of European integration It provides coverage of theory history member states institutions and policies drawing on

academic debates including issues of legitimacy and globalisation **Crafting Democracy** Jennifer A. Yoder, 2013 The Routledge Handbook to Regional Development in Central and Eastern Europe Gábor Lux, Gyula Horváth, 2017-07-06 Twenty five years into transformation Central and Eastern European regions have undergone substantial socio economic restructuring integrating into European and global networks and producing new patterns of regional differentiation and development Yet post socialist modernisation has not been without its contradictions manifesting in increasing social and territorial inequalities Recent studies also suggest there are apparent limits to post socialist growth models accompanying a new set of challenges within an increasingly uncertain world Aiming to deliver a new synthesis of regional development issues at the crossroads between post socialism and post transition this book identifies the main driving forces of spatial restructuring in Central and Eastern Europe and charts the different regional development paths which take shape against the backdrop of post crisis Europe A comparative approach is used to highlight common development challenges and the underlying patterns of socio economic differentiation alike The issues investigated within the Handbook extend to a discussion of the varied economic consequences of transition the social structures and institutional systems which underpin development processes and the broadly understood sustainability of Central and Eastern Europe s current development model This book will be of interest to academics and policymakers working in the fields of regional studies economic geography development studies and policy **Halduskultuur-Administrative Culture 10** , Overcoming Fragmentation in Southeast Europe Panayiotis Getimis, 2017-11-28 With the expansion of the European Union the countries of Southeast Europe have finally been brought together within one socio political entity The restructuring of these economies following globalization and neoliberalization has meant that this region has become much more open to geopolitical shifts and trends While the various countries have all entered into the slow process of European integration the historic fragmentation of this region has led to various conflicts and contradictions in the restructuring and transition of national economies This volume provides a theoretical and comparative overview which examines the prospects for spatial cohesion in this region With the need to handle persisting problems and conflicts from the past while coping with new economic and political structures Southeast Europe proves to be a challenging yet fruitful testing ground for how best to overcome fragmentation and establish a long term process of social and economic integration **The European Union, the World Bank and the Policymaking of Aid** Eugenia Baroncelli, 2019-01-03 Based on the experience of the author an IPE scholar and former trade policy consultant at the World Bank WB the book offers an in depth exploration of the EU WB relations conceptualized as hybrid delegation Coupling cross time analyses of their interaction in the regions of the Middle East and North Africa Europe and Central Asia and Sub Saharan Africa with an original investigation on the coordination among the EU member states at the Executive Board of the International Bank for Reconstruction and Development over the voice and participation reform of 2008 2010 the book advances an innovative theoretical framework to assess the EU WB joint

institutional and field policy performances Augmented PA models of delegation role theory and performance analyses are engaged and selectively recombined to investigate the nature evolution and impact of the interactions of the two organizations both in their everyday and constituent politics Hybrid delegation in motion is reconstructed against the background of post Washington Consensus and post Lisbon EU to unveil the changing division of labour between the two largest development multilaterals of the new global context The book will be of interest to scholars students and practitioners in European Politics Development International Relations International Political Economy and Global Economic Governance

Regional Development and Spatial Planning in an Enlarged European Union Neil Adams, 2016-04-01 The expansion of the European Union in 2004 has had significant consequences for both existing and new members of the Union New member states are assimilating into a new institutional and policy framework while the changing geography of Europe provides a different context for policy development in pre 2004 member states One of the more important fields in which these changes are impacting is regional development The admission of the new countries changes patterns of economic and social disparities across the territory of the European Union which in turn demands that existing approaches to regional development are reconsidered An approach which has proved to be one of the most innovative is spatial planning This book brings together a team of academics and policy makers from across the new Europe involved in regional development and spatial planning Providing insights into different approaches it offers a valuable opportunity to compare experiences across European borders

Spreading Democracy and the Rule of Law? Wojciech Sadurski, Adam Czarnota, Martin Krygier, 2006-07-30 The accession of eight post communist countries of Central and Eastern Europe and also of Malta and Cyprus to the European Union in 2004 has been heralded as perhaps the most important development in the history of European integration so far While the impact of the enlargement on the constitutional structures and practices of the EU has already generated a rich scholarly literature the influence of the accession on constitutionalism democracy human rights and the rule of law among the new member states has been largely ignored This book fills this gap and addresses the question of the consequences of the external force of European enlargement upon the understanding and practice of democracy and the rule of law and among both the main legal political actors and the general public in the new member states A number of leading legal scholars sociologists and political scientists both from Central and Eastern Europe and from outside address these issues in a systematic and critical way Taken together these essays help answer a fundamental question does the European Union have the potential of promoting and consolidate democracy and human rights

Endogenous Regional Development Robert John Stimson, Roger Stough, Peter Nijkamp, 2011 Increasingly endogenous factors and processes are being emphasized as drivers in regional economic development and growth This 15 chapter book is unique in that it commences by presenting five disciplinary takes on endogenous development from the perspectives of economics geography sociology planning and organizational management Several chapters demonstrate how researchers have developed

operational models to investigate the roles played by endogenous factors in regional economic development including the role of entrepreneurial rents Further chapters provide empirical investigations of endogenous factors in regional development at various levels of spatial scale from the supraregion to the nation city and small town and in a variety of situational settings including the European Union Asia and Australia The book is an invaluable up to date resource for researchers and students in regional science and regional economic development and planning

Mobilizing Regions, Mobilizing Europe Sebastian M. Buettner, 2013-10-23 Regional development strategies are becoming more similar all around Europe even though regional differences are more pronounced than ever and many European regions have become more autonomous actors This thesis of a peculiar standardized diversification of sub national space in the modern European Union is the point of departure of this book Based upon the analytical premises of Stanford School Sociological Institutionalism Sebastian M B ttner studies regional mobilization in contemporary Europe from a new and innovative perspective He highlights the importance of scientific expertise and global scientific models in contemporary regional development practice and exemplifies their significance with the example of region building in Poland in the course of EU integration This new wave of regional mobilization is not just conceived as an effect of local national or European politics but as an expression of a larger conceptual shift in governing society and space This well researched and clearly argued book not only provides fresh insights into region building and regionalization in contemporary European space but also contributes to the new sociology of Europeanization It will be an illuminating read for scholars and students in Sociology European and EU studies International Relations Cultural Studies Geography Regional Science Polish Studies and related subject areas

Local and Regional Development Andy Pike, Andrés Rodríguez-Pose, John Tomaney, Andres Rodriguez-Pose, 2006-11-22 Local and regional development is an increasingly global issue For localities and regions the challenge of enhancing prosperity improving wellbeing and increasing living standards has become acute for localities and regions formerly considered discrete parts of the developed and developing worlds Amid concern over the definitions and sustainability of development a spectre has emerged of deepened unevenness and sharpened inequalities in the development prospects for particular social groups and territories Local and Regional Development engages and addresses the key questions what are the principles and values that shape definitions and strategies of local and regional development What are the conceptual and theoretical frameworks capable of understanding and interpreting local and regional development What are the main policy interventions and instruments How do localities and regions attempt to effect development in practice What kinds of local and regional development should we be pursuing This book addresses the fundamental issues of what kind of local and regional development and for whom frameworks of understanding and instruments and policies It outlines what a holistic progressive and sustainable local and regional development might constitute before reflecting on its limits and political renewal With the growing international importance of local and regional development this book is an essential student

Prospects and Risks Beyond EU Enlargement Wim van Meurs, 2013-11-11 Werner Weidenfeld Since the signing of the Treaties of Rome in 1957 Western European history has been an ongoing process integrating and enlarging European institutions Over the course of that time the institutions now known as the European Union have become a major pillar for the security and stability for Europe as a whole These essential functions can only be perpetuated if the Union can project its capacities and capabilities beyond its current borders Today s European agenda is defined by integration Offering prospects for membership in the EU has been a successful instrument for helping shape the transition in East Central Europe The imminent first round of enlargement also calls for a deep ening of EU integration which should be resolved through the EU Convention While the European Union is preparing for ten new member states developments in Europe are far from standing still The countries beyond the EU s future borders in Eastern Europe and the Balkans are undertaking a threefold process of national consolidation transition to a market economy and strengthening parliamentary democracy These processes entail risks that range from authoritarian regimes to armed escalation in Southeastern Europe These risks have a direct impact on European security and stability At the same time some areas of internal transition are making serious strides toward Western standards For this reason simply reducing Eastern and Southeastern Europe to a set of risks threatens to create a self fulfilling prophecy

European Union Foreign Policy in a Changing World Karen E. Smith, 2013-04-18 The second edition of *European Union Foreign Policy in a Changing World* provides a clear introduction to the complexities of contemporary European foreign policy and offers a fresh and distinctive perspective on the nature of the EU s international identity Thoroughly revised and expanded the book explores how and why the EU tries to achieve five core foreign policy objectives the encouragement of regional cooperation the advancement of human rights the promotion of democracy and good governance the prevention of violent conflicts and the fight against international crime including terrorism In pursuing these goals the book illustrates how the EU is faced with acute policy dilemmas because the five objectives not only clash with each other but also with additional policy priorities such as securing energy supplies or establishing strategic partnerships with key powers The uniqueness of the EU as a global actor is carefully assessed and its key policies and the related dilemmas it faces compared with those of other international actors This well written and thoroughly researched book will be a valuable resource for undergraduate and postgraduate students of European politics foreign policy analysis international relations and related disciplines

Europeanization as Discursive Practice Senka Neuman Stanivuković, 2017-09-01 *Europeanization as Discursive Practice* adopts a poststructuralist reading of Europeanization to study the effects of EU accession in the light of political territoriality and consequent state building processes in the EU and Central and Eastern European countries CEECs and the Western Balkans from 1990 2013 Focusing on how domestic actors have framed Europe EU norms in the debates on territorial reforms and the implications of this framing on policy reforms it

asks how competing articulations of the EU and its norms construct state territoriality in the given political and policy debates The book argues that the European Union acted as a discursive force and a challenge to the established structures of understanding of territoriality statehood and power With this the author proposes a new research model for the study of Europeanization that goes beyond the neo institutionalist account of the EU s policy norm transfer to member non member states This text will be of key interest to students scholars and practitioners of European integration EU foreign policy enlargement policy and regional policy and territoriality in post socialist spaces
