Regions Near And Far Desk Maps:

Planetary Cartography in the Next Decade (1984-1994) United States. National Aeronautics and Space Administration. Planetary Cartography Working Group, 1984 The cartographic products required to support science and planetary exploration during the next 10 years were assessed Only major map series or first order maps needed to characterize the surface physiography of a planet or satellite were considered Included in these considerations are maps needed as bases for plotting geologic geophysical and atmospheric phenomena and for planning future planetary exploration These products consist of three types of maps controlled photomosaics shaded relief maps and topographic contour maps **Exploring Caves**, 1997 [Giant Molecular Clouds in the Galaxy](#) P. M. Solomon, M. G. Edmunds, 2013-10-22 Giant Molecular Clouds in the Galaxy Third Gregynog Astrophysics Workshop covers the proceedings of the 1977 Third Gregynog Astrophysics Workshop on Giant Molecular Clouds GMC held at the University of Wales This book is organized into 11 parts encompassing 33 chapters After a brief introduction to the significant features of GMC this book goes on examining radio millimeter and galactic center observations of GMC along with their infrared properties and kinematics Other parts deal with the water sources in GMC time variation in interstellar water masers and the relation of HII regions to molecular clouds The remaining parts discuss the evolution of interstellar molecular clouds and the role of magnetic fields in the collapse of protostellar gas clouds These parts also cover the chemistry of interstellar molecules containing nitrogen and the search for other planetary systems This book will prove useful to cloud scientists physicists astronomers and researchers *Image Processing and GIS for Remote Sensing* Jian Guo Liu, Philippa J. Mason, 2016-03-21 Following the successful publication of the 1st edition in 2009 the 2nd edition maintains its aim to provide an application driven package of essential techniques in image processing and GIS together with case studies for demonstration and guidance in remote sensing applications The book therefore has a 3 in 1 structure which pinpoints the intersection between these three individual disciplines and successfully draws them together in a balanced and comprehensive manner The book conveys in depth knowledge of image processing and GIS techniques in an accessible and comprehensive manner with clear explanations and conceptual illustrations used throughout to enhance student learning The understanding of key concepts is always emphasised with minimal assumption of prior mathematical experience The book is heavily based on the authors own research Many of the author designed image processing techniques are popular around the world For instance the SFIM technique has long been adopted by ASTRIUM for mass production of their standard Pan sharpen imagery data The new edition also includes a completely new chapter on subpixel technology and new case studies based on their recent research *Global Climate Change and Cold Regions Ecosystems* John M. Kimble, 2000-06-28 Global Climate Change and Cold Regions Ecosystems provides information on soil processes and the carbon cycle in cold ecoregions as well as the soil carbon pool and its fluxes in the soils of cold ecoregions Filling a void in this area of soil science this resource explains soil processes influencing C dynamics under natural and disturbed ecosystems

The soils of the cold region ecosystems serve as a net sink of atmospheric C. However, an increase in global temperature could render them a net source. In the event of global warming, the cold regions ecosystems (arctic, sub-arctic, alpine, Antarctic, boreal forests and peatlands) will undergo radical changes. Potential environmental change could drastically increase the active soil layer and influence the large C pool found in them. Topics include soil C pools in different cold ecoregions, the impact of natural and anthropogenic disturbances on the soil C pool, the method of assessment of C and other properties of soils of the cold regions ecosystems while focusing on the fate of C in permafrost soils. **Global Climate Change and Cold Regions Ecosystems** covers the current and possible future effects of the cold ecoregions soil C pool on the global carbon pool.

Science and Applications of Coastal Remote Sensing Kevin Ross Turpie, Tiffany Kay Moisan, Kristin B. Byrd, Steven G. Ackleson, 2021-06-01. **IN MEMORIAL** This Research Topic is dedicated to our co-editor Dr. Tiffany Moisan, a well-regarded ocean color remote sensing scientist who unexpectedly passed away during its preparation. Dr. Moisan was a dear friend and upbeat and enthusiastic colleague and a scientist committed to the use of remote sensing to improve our understanding of marine microbiology and phytoplankton ecology. She was a strong supporter of the development of remote sensing capabilities and applications for coastal and inland waters, and we know that she would have wanted this Research Topic to provide her colleagues an opportunity to share and promote their work in this area. A voice in our community is now quiet. Let the chorus of our shared song continue with her memory. Dr. Tiffany Moisan is survived by her loving family, including her husband Dr. John Moisan and her two daughters.

Soviet Natural Resources in the World Economy Robert G. Jensen, Theodore Shabad, Arthur W. Wright, 1983-08. Russia is a huge storehouse of natural resources including oil, gas, and other energy sources which she can trade with the rest of the world for advanced technology and wheat. In this book, leading experts evaluate the Soviet potential in major energy and industrial raw materials, giving special attention to implications for the world economy to the end of the twentieth century. The authors examine the mineral and forest resources that the Soviet Union has developed and may yet develop to provide exports during the 1980s. They discuss the regional dimension of these resources, especially in Siberia and the Soviet Far East: individual mineral raw materials such as petroleum, natural gas, timber, iron ore, manganese, and gold, and finally the role of raw materials in Soviet foreign trade. The authors, representing the United States, Canada, and Great Britain, are primarily geographers but they include economists, political scientists, and a geologist. Their work is based on primary sources; for most of these reports, current information is no longer being released to researchers, and on interviews with Soviet officials.

The Roles of Remote Sensing in Nature Conservation Ricardo Díaz-Delgado, Richard Lucas, Clive Hurford, 2017-11-06. The book will provide an overview of the practical application of remote sensing for the purposes of

nature conservation as developed by ecologists in collaboration with remote sensing specialists providing guidance on all phases from the planning of remote sensing projects for conservation to the interpretation and validation of the images This book and linked activities have been selected as finalists of the European Natura 2000 award 2020 <https://natura2000award.eu/> finalist 3126 **United Nations Regional Cartographic Conference for Asia and the Far East** ,1977

Development of Coherent Detector Technologies for Sub-Millimetre Wave Astronomy Observations Boon Kok Tan,2015-09-15 The thesis describes the development of receiver technologies for sub millimetre astronomy instruments focusing on high performance coherent cryogenic detectors operating close to the superconductor gap frequency The mixer chip which comprises the SIS devices fed by a unilateral finline and matching planar circuits was fabricated on 15 micron silicon substrate using the recently developed Silicon On Insulator SOI technology This offered broadband IF and RF performance with fully integrated on chip planar circuits resulting in an easily reproducible mixer chip and a simple mixer block An important consequence of this design is that it can be extended to the supra THz region and making the fabrication of multi pixel heterodyne arrays feasible The extension of the operation of major telescopes such as ALMA APEX and the GLT from single pixel to large format arrays is the subject of extensive research at present time since it will allow fast mapping combined with high resolution of the submillimetre sky The technology described in this thesis makes a major contribution to this effort **Extra-Solar Planets** Bonnie Steves,Martin Hendry,Andrew C. Cameron,2010-12-07 Since the discovery of the first exoplanet orbiting a main sequence star in 1995 nearly 500 planets have been detected with this number expected to increase dramatically as new ground based planetary searches begin to report their results Emerging techniques offer the tantalizing possibility of detecting an Earth mass planet in the habitable zon **Foreign Aid** Charles Wolf,2015-12-08 Most available literature on foreign aid lacks precise terminology reliable data and a theory that permits profiting from experience This book tries to meet some of these difficulties by analyzing the foreign aid record of the US in a specific region It points the way toward improving allocation of aid in an area when the total to be allocated has been set Originally published in 1960 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Ground-water Levels and Directions of Flow Near the Industrial Excess Landfill, Uniontown, Ohio, March 1994** Denise H.
