W. Foster,2016-10-25 Excerpt from The Registrum Antiquissimum of the Cathedral Church of Lincoln Vol 1 A distinguished German scholar Dr Walther Holtzmann until lately a lecturer in the University of Berlin and now professor of modern history in the University of Halle has placed me deeply in his debt by reading the proofs of the papal bulls and mandates Out of his extensive knowledge of the mediaeval papal chancery he has not only made many valuable suggestions but has also supplied the notes which are printed under his name at the end of some of the bulls Dr Holtzmann is now engaged in collecting the English material for a critical edition of the papal bulls and letters prior to the year 1198 which the Academy of Gottingen has had in hand since the year 1896 About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

clerical marriage in the eleventh and twelfth centuries Changes in educational provision c 1100 also help to explain growing social and geographical mobility among clerics      *The Archaeology of the Lower City and Adjacent Suburbs* Jenny Mann, Alan Vince, Jane Young, 2016-04-30 This volume contains reports on excavations undertaken in the lower walled city at Lincoln which lies on sloping ground on the northern scarp of the Witham gap and its adjacent suburbs between 1972 and 1987 and forms a companion volume to LAS volumes 2 and 3 which cover other parts of the historic city The earliest features encountered were discovered both near to the line of Ermine Street and towards Broadgate Remains of timber storage buildings were found probably associated with the Roman legionary occupation in the later 1st century AD The earliest occupation of the hillside after the foundation of the colonia towards the end of the century consisted mainly of commercial premises modest residences and storage buildings It seems likely that the boundary of the lower enclosure was designated before it was fortified in the later 2nd century with the street pattern belonging to the earlier part of the century Larger aristocratic residences came to dominate the hillside with public facilities fronting on to the line of the zigzagging main route In the 4th century the fortifications were enlarged and two new gates inserted Examples of so called Dark Earth deposits were here dated to the very latest phases of Roman occupation Elements of some Roman structures survived to be reused in subsequent centuries There are hints of one focus in the Middle Saxon period in the area of St Peter's church but occupation of an urban nature did not recommence until the late 9th century with the first phases of Anglo Scandinavian occupation recorded here Sequences of increasingly intensive occupation from the 10th century were identified with plentiful evidence for industrial activity including pottery metalworking and other crafts as well as parish churches Markets were established in the 11th century and stone began to replace timber for residential structures from the mid 12th century with clear evidence of the quality of some of the houses With the decline in the city's fortunes from the late 13th century the fringe sites became depopulated and there was much rebuilding elsewhere including some fine new houses There was a further revival in the later post medieval period but much of the earlier fabric and surviving stretches of Roman city wall were swept away in the 19th century      *The Engineering of Medieval Cathedrals* Lynn T. Courtenay, 2016-12-05 The great cathedrals and churches of the medieval West continue to awe How were they built and why do they remain standing What did their builders know about what they were doing These questions have given rise to considerable controversy which is fully reflected in the papers selected here The first section of the book is concerned with the medieval builders and their design methods the second focuses on engineering issues in the context of the infamous collapse of the choir at Beauvais in 1284 The following papers extend the analysis into the 15th century looking for example at Brunelleschi's dome for Florence Cathedral and deal with the often neglected structures of roofs towers and spires      *Medieval Ecclesiastical Studies* Michael J.
