Governing Infrastructure Regulators in Fragile Environments World Bank, 2019-07-30 Countries exiting conflict and fragility face many urgent priorities and almost invariably suffer from substantial

infrastructure deficits There is typically very little infrastructure investment during periods of fragility and conflict and existing installations are often damaged or destroyed The purpose of this manual is to contribute to improvements in the quality of infrastructure regulation It does so by identifying key principles for the governance of infrastructure regulators and by suggesting how these principles can be introduced successfully and maintained over time The introduction of cross cutting governance principles for regulators is based on the assumption that a uniform set of governance principles can be less costly and complex for governments to implement and enforce and will provide potential investors with a more consistent and predictable regulatory environment to navigate The manual also discusses the process of implementing regulatory governance reforms in fragile contexts Improvements in governance frameworks for infrastructure regulators will support better and accountable regulatory decision making as well as increased investment and overall economic development Case studies from relevant country experience complement and provide context to the discussion on principles

Political Economy of Energy in the Southern Cone Anil Hira, 2003-03-30 Hira explores the impact of the neoliberal revolution in Latin America which claims the superiority of markets that are freed from government intervention and restrictions on trade and investment He examines changes in the energy policy of the Southern Cone Argentina Bolivia Brazil Chile Paraguay and Uruguay and finds that contrary to what is claimed and expected there is a great deal of state intervention that continues through regulatory policy All around the world economic markets are in flux Policies to change these markets are part of the neoliberal revolution that claims the superiority of markets freed from government intervention and restrictions on trade and investment The general conclusion among most academic and policy analysts who study developing countries is that market liberalization is a foregone conclusion Developing countries choices are constrained by two primary factors first the burden of massive external debt that forces them to court international finance and second the need to gain access to the world s largest markets in Europe and or the United States optimally through free trade agreements The effects of market liberalization including deregulation privatization and integration require further scrutiny Hira examines the effects of international market pressures on energy policy at the national regional and sectoral levels in Latin America s Southern Cone Argentina Bolivia Brazil Chile Paraguay and Uruguay who belong to the MERCOSUR common market Contrary to what is claimed and expected he finds that a great deal of state intervention continues through regulatory policy He also provides an thorough set of comparative political economy case studies along with a discussion of the MERCOSUR process with regards to energy His analysis of the political economy of electricity and natural gas deregulation is especially relevant in the wake of the California energy crisis the Enron debacle and international discussions about energy deregulation This book is of particular interest to scholars students and other researchers involved with Latin American economic development and energy policy
