Meaning in Architecture, now Carlo Deregibus,Aurosa Alison,2024-10-15 The connection between form and meaning has been so intrinsic and obvious that it has been implicit for centuries Then around fifty years ago the issue of meaning suddenly burst into the architectural world with many scholars and practitioners bustling to introduce semiology and semiotics into design Now after the globalisation and the atomisation of thoughts of the last decades those debates could seem pretty meaningless the form being mainly an aesthetic feature or a counterfeit fetish for everchanging feeble poetics Yet we continue to design produce and critique architecture attributing meanings intentions and hopes to its forms Once more we will explore and discuss the elusive yet unavoidable connection between meaning and architecture four thematic sections to understand the place and dimension of meaning in of from to after or maybe even for Architecture
