The New Metaphysicals Courtney Bender,2010-07-15 American spirituality with its focus on individual meaning experience and exploration is usually thought to be a product of the postmodern era But as *The New Metaphysicals* makes clear contemporary American spirituality has historic roots in the nineteenth century and a great deal in common with traditional religious movements To explore this world Courtney Bender combines research into the history of the movement with fieldwork in Cambridge Massachusetts a key site of alternative religious inquiry from Emerson and William James to today Through her ethnographic analysis Bender discovers that a focus on the new on progress and on the way spiritual beliefs intersect with science obscures the historical roots of spirituality from its practitioners and those who study it alike and shape an enduring set of modern religious possibilities in the process A Monastery in Time Caroline Humphrey,Hürelbaatar Ujeed,2022-12-22 *A Monastery in Time* is the first book to describe the life of a Mongolian Buddhist monastery the Mergen Monastery in Inner Mongolia from inside its walls From the Qing occupation of the eighteenth and nineteenth centuries through the Cultural Revolution Caroline Humphrey and Hürelbaatar Ujeed tell a story of religious

formation suppression and survival over a history that spans three centuries Often overlooked in Buddhist studies Mongolian Buddhism is an impressively self sustaining tradition whose founding lama the Third Mergen Gegen transformed Tibetan Buddhism into an authentic counterpart using the Mongolian language Drawing on fifteen years of fieldwork Humphrey and Ujeed show how lamas have struggled to keep Mergen Gegen s vision alive through tremendous political upheaval and how such upheaval has inextricably fastened politics to religion for many of today s practicing monks Exploring the various ways Mongolian Buddhists have attempted to link the past present and future Humphrey and Ujeed offer a compelling study of the interplay between the individual and the state tradition and history

The New Science of Consciousness Survival and the Metaparadigm Shift to a Conscious Universe Dr. Alan Ross Hugenot, 2016-06-30 Alan Hugenot lectures on the Leading Edge Science of the Afterlife he concluded that the entire universe is conscious and that this explains both near death experiences and certain paradoxes of quantum theory As someone with a physics degree I know that Hugenot s basic idea of a conscious universe is neither crazy nor new Erwin Schrödinger one of the fathers of quantum physics was an avid student of Hindu philosophy and believed something similar Gideon Lichfield April 2015 Atlantic Monthly The existence of a hidden field Bohm s implicate order of non physical consciousness occupying as yet undiscerned additional dimensions which are outside the visible reality Bohm s explicate order as defined by 3 D plus time has now been proven scientifically by the following collated data Recent repeated replication of John Bell s theory of non locality Studies of the Near Death experience and After death communications demonstrated in triple blind laboratory experiments testing evidential mediumship This hidden field implicate order of non physical consciousness also provides the matrix upon which the explicate order of observed reality is continually manifested Alan Hugenot Our challenge is to discover through careful science how we can interface with this matrix of consciousness Viewing psi phenomena as belonging to aspects of reality about which we as yet simply know very little is the only honest way for any scientist to proceed Healthy scientific skepticism must be open to new discoveries and so allow open examination of the scientific data developed by rigorous para normal research Honest open minded inquiry will bring both new discoveries of truth and new laws of physics beyond the limits of the Newtonian paradigm Alan Hugenot

Signs of Reincarnation James G. Matlock, 2019-06-15 Signs of Reincarnation provides the first comprehensive look at the belief in reincarnation and the evidence for past lives from historical records anthropological studies and contemporary research Matlock discusses various ways the evidence may be interpreted and shows that although reincarnation entails a rejection of the materialist notion that consciousness is generated by the brain it does not require the acceptance of any radically new concepts or the abandonment of well established findings in mainstream psychology or biology This book offers students scholars and anyone interested in the possibility of reincarnation an essential grounding in beliefs cases and theory while opening doors for future research into the extension of consciousness beyond our present lives

The Most Holy Trinosophia and the New Revelation of Divine Feminine Robert Powell, 2000
The rising interest in goddess spirituality expresses our current need to understand the feminine side of God, the Sophia or Divine Wisdom, and her relationship to the masculine aspects of God. Offering a new perspective, the author draws on his own research and on the teaching of Russian philosopher Pavel Florensky, according to whom Sophia has a relationship to the masculine Trinity as an independent spiritual being. Robert Powell discusses Sophia as a Trinity as Mother, Daughter, and Holy Soul, and as the feminine aspect of Divine Godhead. He connects our reawakening to the feminine aspect of God with many of the changes now taking place in the world. Also included is an introduction to the Divine Feminine by Daniel Andreev, author of *The Rose of the World*.

European Cases of the Reincarnation Type Ian Stevenson, M.D., 2015-09-02
Many cultures accept that a person may die and then come back to life in another form, but Westerners have traditionally rejected the idea. Recently, however, surveys conducted in Europe indicate a substantial increase in the number of Europeans who believe in reincarnation, and numerous claims of reincarnation have been reported. This book examines particular cases in Europe that are suggestive of reincarnation. The first section provides a brief history of the belief in reincarnation among Europeans. The second section considers eight cases from the first third of the twentieth century that were not independently investigated but were reported and sometimes published by the persons concerned. The third section covers 32 cases from the second half of the twentieth century that were investigated by the author. Many of these cases involved either children who exhibited unusual behavior attributed to a previous life, or adults who experienced recurrent or vivid dreams attributed to a previous

life In the fourth section the author compares European cases suggestive of reincarnation with those of other countries and cultures
