Reinventing Political Culture Jeffrey C. Goldfarb, 2013-05-09 The way people think and act politically is not set in stone People can and do change the fundamental cultural contours of their political situation Their political culture does not only restrict imagination and action it is also a resource for political creativity and invention In Reinventing Political Culture this resource is uncovered and explored Analyzed as a tension between the power of culture and the culture of power the concept of political culture is reinvented and applied to understanding the practice of people transforming their own political culture in very different circumstances Three instances of such reinvention are closely examined one historic during the twilight of the Soviet empire one actively in process and actively opposed the Obama revolution and one an apparent distant dream the power of culture and the culture of power that would avoid the clash of civilizations in the Middle East In accessible and engaging prose Goldfarb clearly and forcefully presents students and scholars of sociology comparative politics and cultural studies with an original position on political culture showing how the political cultures of our times pose not only grave dangers but also opportunities for creative alternatives

Marx, Marxism and the Spiritual Anjan Chakrabarti, Anup Dhar, Serap A. Kayatekin, 2020-09-10 While Marxian theory has produced a sound and rigorous critique of capitalism has it faltered in its own practice of social transformation Has it faltered because of the Marxian insistence on the hyper secularization of political cultures The history of religions with the exception of some spiritual traditions has not been any less heartless and soulless This book sets up a much needed dialogue between a rethought Marxian praxis of the political and a rethought experience of spirituality Such rethinking

within Marxism and spirituality and a resetting of their lost relationship is perhaps the only hope for a non violent future of both the Marxian reconstruction of the self and the social as also faith based life practices Building on past work in critical theory this book offers a new take on the relationship between a rethought Marxism and a rethought spirituality rethought in the life philosophy and works of Christian thinkers anti Christian thinkers Marxian thinkers those critical of Marxist Statecraft Dalit neo Buddhist thinkers thinkers drawing from Judaism as well as thinkers drawing critically from Christianity Contrary to popular belief this book does not see spirituality as a derivative of only religion This book also sees spirituality as what Marx designated the sigh of the oppressed against both social and religious orthodoxy In that sense spirituality is not just a displaced form of religion it is a displaced form of the political too This book therefore sets up the much needed dialogue between the Marxian political and the spiritual traditions The chapters in this book were originally published in *Rethinking Marxism A Journal of Economics Culture and Society* *Reinventing Revolution* Gail Omvedt,1993-06-18 This study describes and analyses the new social movements that have arisen in India over the past two decades in particular the anti caste movement of both the untouchables and the lower middle castes the women s liberation movement the farmers movement centred on struggles arising out of their integration into a state controlled capitalist market and the environmental movements opposition to destructive development including resistance to big dam projects and the search for alternatives Rooted in participant observation it focuses on the ideologies and self understanding of the movements themselves The central themes of this book are the origin of movements in the socio economic contradictions of post independence India their effect on political developments in particular the disintegration of Congress hegemony their relation to traditional Marxist theory and Communist practice and their groping toward a synthesis of theory and practice that constitutes a new social vision distinct from traditional Marxism *Marx's Scientific Dialectics* Paul Paolucci,2007 This book examines both problems in traditional readings of Marx s texts and how he used several methods of science to inform his dialectical thinking historical materialist research political economic analyses and his communist project A case is made for Marx s continuing methodological relevance **Reinventing the Chinese City** Richard Hu,2023-10-10 Since the late 1970s China has undergone perhaps the most sweeping process of urbanization ever witnessed This is typically understood as a story of growth encompassing rapid development and economic dynamism alongside environmental degradation and social dislocation However over the past decade China s leaders have claimed that the country s urbanization has entered a new stage that prioritizes quality What does China s new urban vision entail and what does the future hold in store Richard Hu unpacks recent trends in urban planning and development to explore the making and imagining of the contemporary Chinese city He focuses on three key concepts the green revolution smart city movement and great innovation leap forward that have become increasingly influential Through case studies of Beijing Hangzhou and Hefei Hu analyzes how attempts to achieve greater sustainability promote data driven governance and foster innovation have fared on the ground He also

considers the experimental city Xiong'an in terms of China's idealized vision of the urban future and investigates how the recent experiences of Hong Kong relate to regional and national development projects *Reinventing the Chinese City* provides a careful accounting of the ideas that have dominated urban policy in China since 2010 emphasizing key continuities underlying claims of novelty Shedding light on the transformations of the Chinese city this book offers a new perspective on the factors that will shape the trajectory of urbanization in the coming decades *Confronting Capitalism in the 21st Century* Marc Silver, 2019-04-23 This book analyzes key aspects of Marx's *Capital* with an eye towards its relevance for an understanding of issues confronting us in the 21st Century The contributions to this volume suggest that while aspects of Marx's original analysis must be adjusted to take into account changes that have occurred since its initial publication in 1867 his overall perspective remains necessary for understanding the nature of crises in 21st century Part I emphasizes the central concepts Marx employed in *Capital* including exploitation capital accumulation commodity fetishism and his use of dialectics as a method for baring the underlying relations that define capitalism Parts II and III extend that focus by addressing the concept of value fictitious capital credit and financialization Parts IV and V offer analyses of several concrete manifestations of contemporary crises from national contexts Europe Latin America China and the United States The volume argues that we have to combat the imperatives of capitalism to move towards a more humane and egalitarian future

Carroll this thought provoking volume is designed for research methods courses in sociology and social sciences *Critical Strategies for Social Research* explores ways in which several key research strategies bring an emancipatory dimension to social analysis The new approaches recognize that social analysis is a form of knowledge production that takes place in a human constructed world marked by injustice and persistent inequality Carroll considers five influential and productive strategies of inquiry Dialectical Social Analysis Institutional Ethnography Participatory Action Research Critical Discourse Analysis Social Inquiry as Communicative Reason **Hegel's Dialectical Political Economy** Paul Diesing, 2019-03-01 This book demonstrates how Hegel's dialectic can be used in empirical research and shows how one can do dialectical research in economics It also shows how one can use dialectical thinking to interpret some personal or social or political problem and devise a possible solution **Routledge Encyclopedia of International Political Economy: Entries A-F** R. Producer Cooperatives as a New Mode of Production Bruno Jossa, 2014-02-05 The notion that there is no alternative to capitalism emerged after the fall of the Berlin Wall and made rapid headway due to increasing economic globalisation More recently this belief that there is no viable alternative has held firm despite the financial crisis high unemployment levels and an ever increasing gap between rich and poor However since the appearance of Benjamin Ward's seminal 1958 article economic theorists have been developing a workable alternative a system of self managed firms The core argument outlined in this book is that a well organised system of producer cooperatives would give rise to a new mode of production and ultimately a genuinely socialist society This argument is developed through three key steps First following on from Jaroslav Vanek's definition it is argued that a Labour Managed Firm a firm which strictly segregates capital incomes from labour incomes would implement a new production mode because it would reverse the pre existing relation between capital and labour Second given that a system of these Labour Managed Firm cooperatives would reverse the capital labour relationship it is suggested that this would constitute a form of market socialism Third it is argued that compared to capitalism a system of producer cooperatives offers a wealth of advantages including the potential for efficiency gains the eradication of unemployment and the end of exploitation Ultimately this book concludes that self management could take the place of central planning in Marxist visions for the future

Labour Managed Firms and Post-Capitalism Bruno Jossa, 2016-11-25 This book illustrates and discusses the major points of the economic theory of producer cooperatives its evolution since the 1950s and links with Marxian theory Most importantly this book demonstrates that a system of producer cooperatives offers a wealth of advantages compared to capitalism There is general agreement that the main benefit of this form of economic democracy is that people allowed to freely pursue their interests are happier than those acting on somebody else's instruction The author argues that a system of democratic firms would eradicate classical high wage unemployment and scale down both Keynesian and structural unemployment levels

Cornel West and the Politics of Prophetic Pragmatism Mark David Wood, 2000 Wood evaluates the political consequences of a shift in West's position from an earlier revolutionary socialist stance to a later progressive reformist one Wood shows how West's subsequent reworking of Marxism supports his transition from a socialist to a progressivist politics
