Relative Hills Of Britain:

The Relative Hills of Britain Alan Dawson, 1992-01-01 How many hills are there in Britain Has anyone climbed them all Where is there for hill walkers to go in the south of England What is a hill anyway The answers to these and other questions will be found in *The Relative Hills of Britain* This book dispenses with the common assumption that a hill must be at least 2000ft high to be worth climbing Instead it concentrates on listing all the hills that are relatively high compared to the surrounding land rather than compared to sea level This approach leads to some interesting results for example the highest points in the Cotswolds and Chilterns Campsie and Quantocks are all included as well as the main summits on numerous Scottish islands whereas well known mountain summits such as Cairn Gorm Bowfell and Carnedd Dafydd do not qualify As well as being an invaluable reference work for all walkers this book contains a fascinating collection of not too serious facts and figures about the Marilyn's as these relative hills have been called The book is illustrated by a set of photographs and a large number of very clear maps which make it easy to locate all the hills in each region *More Relative Hills of Britain*

Mark Jackson, Alan Dawson, 2009 **The Finest Peaks - Prominence and Other Mountain Measures** Adam Helman, 2005 This book challenges the precedent that a mountain's worth scales with height It is a rational synthesis of new concepts that compel one to reassess the popular heightist mindset The concept of prominence loosely defined as a mountain's vertical relief is a stiff competitor to summit height for assessing a mountain's stature and relative worth for innumerable purposes The community of prominence theoreticians list builders and climbers has reached critical mass suggesting publication of a book dedicated exclusively to prominence Revolutions are not overnight The heightist mindset has minimally a 100 year head start Eventually the climbing community will embrace prominence For the mountaineer a prominence based peak list provides fresh goals guaranteed to satisfy A prominence based peak list regardless of geographic region incorporates the most awe inspiring and diverse mountains Chapter I introduces prominence being defined and contrasted with altitude as peak list generator Chapters II and III concern peak list production Chapter IV reviews the history of prominence including a compendium of prominence list builders and their lists Chapter V is about prominence oriented peakbaggers and their accomplishments Chapter VI entails prominence derived mountain measures submarine prominence inverse prominence proportional prominence and dominance Chapter VII concerns the advanced prominence derived concepts of parentage divide trees lineage cells and more Chapter VIII concerns alternative objective mountain measures isolation measure peakedness and prominence density and height steepness combination measures drop measure cliff measure spire measure and ruggedness measure Spire measure quantifies a mountain's subjective impressiveness due to great angularity Chapter IX is a search for the largest prominence unclimbed mountain grand goal of a future summit discovering expedition Appendices A to G cover various subtopics the glossary defines over 300 terms 48 pages of illustrations are included with full color versions on line at http://www.cohp.org/prominence/publication_2005_illustrations

main.html A beautiful hardcover edition with color illustrations is available and is highly recommended by book reviewers. Email the author for pricing and purchase information. **The Hughs** Andrew Dempster, 2020-12-11 Andrew Dempster has 40 years experience of hillwalking the length and breadth of Scotland. Author of several climbing books including the first guidebook to the Grahams in this volume he identifies the best wee hills on the Scottish mainland. MUNRO at least 3 000ft high. CORBETT 2 500 3 000ft high with a prominence of at least 500ft. GRAHAM 2 000 2 499ft high with a drop of at least 150 metres. HUGH Hill Under Graham Height under 2 000ft with exceptional character. The Hughs all offer rewarding and often stunning climbs and views. Some are already popular. Many await discovery. Each one has great character. That is what the Hughs are all about. v From Arthur's Seat in Edinburgh to An Grianan in the far north from Ben Hiant in the west to Bennachie in the east the Hughs are a phenomenally diverse range of hills stretching to all points of the compass. Accessible to people of any age the Hughs are not defined by the sterile logic of relative height they are a choice of the heart.

Trekking in the Himalaya Kev Reynolds, 2013-11-08 An inspirational larger format book providing an overview of 20 memorable treks in the Himalaya. A stunning collection of all the best trekking ideas throughout the Himalayan range they include such well known classics as the treks to Everest K2 and Kangchenjunga base camps and the Annapurna and Manaslu Circuits. The ultra long Lunana Snowman Trek and a kora around sacred Mount Kailash in Tibet are also included. There are epic glacier treks like that to Pakistan's Snow Lake following in the footsteps of Shipton and Tilman towards Nanda Devi and the approach to Gangkar Punsum the world's highest unclimbed peak located in remote Bhutan. Unlike a conventional guidebook detailed route descriptions are not included the book is however an excellent planning resource for those who wish to venture into the Himalayas. It looks at each route in turn and provides a snapshot of what makes the trek special helping you choose the best routes to walk. Perfect either for planning or for the armchair explorer. **The Westweg** Kat Morgenstern, 2017-01-20 A guidebook to walking the Westweg Westway between Pforzheim in Germany to Basel in Switzerland. Unjustifiable Risk? Simon Thompson,2012-03-06 To the impartial observer Britain does not appear to have any mountains Yet the British invented the sport of mountain climbing and for two periods in history British climbers led the world in the pursuit of this beautiful and dangerous obsession Unjustifiable Risk is the story of the social economic and cultural conditions that gave rise to the sport and the achievements and motives of the scientists and poets parsons and anarchists villains and judges ascetics and drunks that have shaped its development over the past two hundred years The history of climbing inevitably reflects the wider changes that have occurred in British society including class gender nationalism and war but the sport has also contributed to changing social attitudes to nature and beauty heroism and death Over the years increasing wealth leisure and mobility have gradually transformed climbing from an activity undertaken by an eccentric and privileged minority into a sub division of the leisure and tourist industry while competition improved technology and information and increasing specialisation have helped to create climbs of unimaginable difficulty at the leading edge of the sport But while much has changed even more has remained the same Today s climbers would be instantly recognisable to their Victorian predecessors with their desire to escape from the crowded complexity of urban society and willingness to take unjustifiable risk in pursuit of beauty adventure and self fulfilment Unjustifiable Risk was shortlisted for the Boardman Tasker prize in 2011
