The Psychological Basis of Moral Judgments John Park, 2021-07-18 This volume examines the psychological basis of moral judgments and asks what theories of concepts apply to moral concepts By combining philosophical reasoning and empirical insights from the fields of moral psychology cognitive science evolutionary psychology and neuroscience it considers what mental states not only influence but also constitute our moral concepts and judgments On this basis Park proposes a novel pluralistic theory of moral concepts which includes three different cognitive structures and emotions Thus our moral judgments are shown to be a hybrid that express both cognitive and conative states In part through analysis of new empirical data on moral semantic intuitions gathered via cross cultural experimental research Park reveals that the referents of individuals moral judgments and concepts vary across time contexts and groups On this basis he contends for moral relativism where moral judgments cannot be universally true across time and location but only relative to groups This powerfully argued text will be of interest to researchers academics and educators with an interest in cognitive science moral theory philosophy of psychology and moral psychology more broadly Those interested in ethics applied social psychology and moral development will also benefit from the volume
Moral Relativism Steven Lukes, 2011-05-26 Do we as humans have no shared standards by which we can understand each other Do we truly have divergent views about what constitutes good and evil harm and welfare dignity and humiliation or is there some underlying commonality that wins out These questions show up everywhere from the debate over female circumcision to the UN Declaration of Human Rights They become ever more pressing in an age of mass immigration religious extremism and the rise of identity politics So by what right do we judge particular practices as barbaric Who are the real barbarians This provocative book takes an enlightening look at what we believe why we believe it and whether there really is an irreparable moral discord between us and them
Relativism-Relativity Marin Cilea, Maria-Ana Tupan, 2013-07-26 Relativism Relativity An Interdisciplinary Perspective on a Modern Concept is a revisionary and historicist approach to an issue which cuts across the disciplinary borders of science philosophy ethics and art Sceptical of stereotypes including those of the totalising fictions of the Enlightenment supposedly steeped in absolutism and substantialism the authors endeavour to bring to light an

alternative mode of cognitive mapping which runs from the seventeenth century to the age of complexity Current notions of fractal geometry rhizomatic linking of open structures hypertextuality the superposition of symbolic systems and nonlinear reality of chance and determinism are traced back to the work of Leibniz Laurence Sterne and D Alembert Similarly to H l ne V drine who documented the dark side of the Renaissance in *Les Philosophies de la Renaissance* 1971 the essayists here see the issue of the absolutism relativism polarity as the focal point in the construction of a new eighteenth century whose ground breaking ideas first launched in the tentative form of the essay acquired a quasi canonical status in the French Encyclopaedia and referenced other disciplinary fields psychology ethics social science entering into fertile negotiations with discursive and formal innovations in literature

Rationality, Relativism and the Human Sciences Joseph Margolis, A.S. Krausz, R. Burian, 2012-12-06 The Greater Philadelphia Philosophy Consortium was launched in the early eighties It began during a particularly lean period in the American economy But its success is linked as much to the need to be in touch with the rapidly changing currents of the philosophical climate as with the need to insure an adequately stocked professional community in the Philadelphia area faced perhaps permanently with the threat of increasing attrition The member schools of the Consortium now include Bryn Mawr College the University of Pennsylvania Temple University and Villanova University that is the schools of the area that offer advanced degrees in philosophy The philosophy faculties of these schools form the core of the Consortium which offers graduate students the instructional and library facilities of each member school The Consortium is also supported by the associated faculties of other regional schools that do not offer advanced degrees notably those at Drexel University Haverford College La Salle University and Swarthmore College both philosophers and members of other departments as well as interested and professionally qualified persons from the entire region The affiliated and core professionals now number several hundreds and the Consortium s various ventures have been received most enthusiastically by the academic community At this moment the Consortium is planning its fifth year of what it calls the Conferences on the Philosophy of the Human Studies

Ethical Relativism and Universalism Saral Jhingran, 2001-01-01 The present work addresses itself to one of the most hotly debated issues in contemporary ethics relativism Relativism has become a formidable argument in Western socio moral thought under the impact of postmodern writings The author presents a detailed critique of various relativist and postmodernist theses without rejecting some of their empirically justified observations She underscores the fact that the intercultural communication which has been going on since time immemorial puts a question mark to the postmodernist theories of indeterminacy of translation incommensurability of various conceptual frameworks etc The author supports cognitivism in ethics according to which the moral properties of the object of moral judgement do in some way determine or cause that judgment This view is not to be confused with any realist ontological commitment She asserts that universalizability is the necessary condition of all rational judgments including the moral ones The author also discusses the relationship between self and others and in this context she draws upon the insights of ancient

Indian thinkers She proposes that minimum moral principles and maxims can be agreed upon through reasoning and intercultural discourse **Rationalism, Realism, and Relativism** Robert L. Arrington, 2019-05-15 During the 1970s and 1980s the field of ethics underwent a profound change in perspective from noncognitivism to cognitivism regarding moral judgments and reasoning Although metaethical noncognitivism had been the predominant point of view during the previous three decades a series of attacks had undermined its authority by the 1970s and it gave way to the cognitivist belief that moral judgments have truth values This book provides a descriptive and critical guide to the often bewildering scene that resulted from these controversies in contemporary moral epistemology *A Companion to Relativism* Steven D.

Relativism Michael Krausz, 1989 Recent years have seen a vigorous revival of interest in relativism both in support and in opposition This collection of 21 essays 16 of which appear in print here for the first time advances the discussion found in an earlier volume *Relativism Cognitive and Moral* These present selections focus on philosophical and methodological issues of relativism by exhibiting its varieties and by rehearsing its virtues and vices The contributions concern relativism in a wide range of practices in the human studies

Cognitive Relativism and Social Science Diederick Raven, 2020-02-18 Modern epistemology has been dominated by an empiricist theory of knowledge that assumes a direct individualistic relationship between the knowing subject and the object of knowledge Truth is held to be universal and non individualistic social and cultural factors are considered sources of distortion of true knowledge Since the late 1950s this view has been challenged by a cognitive relativism asserting that what is true is socially conditioned This volume examines the far reaching implications of this development for the social sciences Recently cognitive relativism has become a key issue of debate in anthropology philosophy and sociology In anthropology this is illustrated by a growing awareness of the similarity of all systems of knowledge In philosophy it is exemplified by the realization that traditional monolithic and absolutist concepts of truth have increasingly lost any power to make sense and to convince In sociology it is visible in a renewal of interest in a general sociology of knowledge Yet in spite of this convergence of interests practitioners of these three disciplines have on the whole shown no inclination to reach a consensus on the terms of reference that could facilitate an interdisciplinary approach *Cognitive Relativism and Social Science* aims to do just this It is a working assumption of this volume that as far as the subject of cognitive relativism is concerned anthropologists philosophers and sociologists should join forces rather than try to deal with the challenges of cognitive relativism within strictly imposed boundaries that normally separate academic disciplines Only when they work together will it be possible to treat the problems posed by cognitive relativism in an adequate way This volume provides the results of attempts to communicate on cognitive relativism across disciplinary boundaries This is must reading in the philosophy of social science and in social research theory
