Toward the Factory of the Future K. Kornwachs, Hans-Jörg Bullinger, Hans-Jürgen Warnecke, 2013-12-14 The International Conference on Production Research has a good tradition The first Conference was held in Birmingham 1971 with 61 participants With respect to the decision that the Conference should be held every second year by this time the Conference has been held in the following countries Birmingham 1971 UK Copenhagen 1973 Denmark Amhurst 1975 USA Tokyo 1977 Japan Amsterdam 1979 The Netherlands Novi Sad 1981 Yugoslavia Windsor 1983 Canada Stuttgart 1985 Germany and the next Conference will take place in Cincinnati 1987 USA The number of submitted abstracts and papers was continuously increasing such that the Programme Committee of this actual 8th Conference on Production Research has been forced to introduce a further refereeing procedure Each submitted abstract was presented to at least two referees This resulted not only in a reduction of the number of presented full papers and poster contributions but as the Programme Committee and the Editors hope it led also to a considerable increase in the scientific quality of this 8th International Conference on Production Research The preceding conference in Windsor Canada was dedicated to the topic Production Research as a Means of Productivity Improvement We don't believe that this statement has become untrue in the meanwhile

Spacecraft Attitude Determination and Control J.R. Wertz, 2012-12-06 Roger D Werking Head Attitude Determination and Control Section National Aeronautics and Space Administration Goddard Space Flight Center Extensive work has been done for many years in the areas of attitude determination attitude prediction and attitude control During this time it has been difficult to obtain reference material that provided a comprehensive overview of attitude support activities This lack of reference material has made it difficult for those not intimately involved in attitude functions to become acquainted with the ideas and activities which are essential to understanding the various aspects of spacecraft attitude support As a result I felt the need for a document which could be used by a variety of persons to obtain an understanding of the work which has been done in support of spacecraft attitude objectives It is believed that this book prepared by the Computer Sciences Corporation under the able direction of Dr James Wertz provides this type of reference This book can serve as a reference for individuals involved in mission planning attitude determination and attitude dynamics an introductory textbook for students and professionals starting in this field an information source for experimenters or others involved in spacecraft related work who need information on spacecraft orientation and how it is determined but who have neither the time nor the resources to pursue the varied literature on this subject and a tool for encouraging those who could expand this discipline to do so because much remains to be done to satisfy future needs
