Religion And Irreligion:

Toward a Sociology of Irreligion Colin David Campbell, Colin Campbell, 1971 *Secularity and Non-Religion* Elisabeth Arweck, Stephen Bullivant, Lois Lee, 2016-03-16 The present collection brings together a set of essays which shed light on recent research into non religion secularity and atheism topics which have been emerging as important areas of current research in a number of different disciplines The essays cover a wide span in terms of the various stances they discuss secular atheist non religious the settings in which these topics are relevant families wider society politics demography and the different perspectives which relate to socialisation and social relations belief acquisition discrimination Written by authors from a variety of national settings and academic disciplines the collection presents a range of methodologies combining theoretical approaches with quantitative and qualitative research findings The authors address issues related to an important academic field which had been neglected for some time but which has been made relevant by the increasing percentage of people professing a non religious stance This collection represents a major contribution to this area of academic research not only because it puts the themes of non religion and secularity firmly on the academic map but also because it offers a variety of different viewpoints and aims to bring clarity into the use of concepts and terminology The authors make important contributions to the emerging body of research in this area and point out areas where further research is needed The first essay provides a thorough introduction to this field taking stock of the work done so far highlighting the overarching issues and embedding the essays in the wider context of existing literature This book was originally published as a special issue of the Journal of Contemporary Religion Faith No More Phil Zuckerman, 2011-11-01 During his 2009 inaugural speech President Obama described the United States as a nation of Christians and Muslims Jews and Hindus and nonbelievers It was the first time an American president had acknowledged the existence of this rapidly growing segment of the population in such a public forum And yet the reasons why more and more people are turning away from religion are still poorly understood In Faith No More Phil Zuckerman draws on in depth interviews with people who have left religion to find out what's really behind the process of losing one's faith According to a 2008 study so many Americans claim no religion 15% up from 8% in 1990 that this category now outranks every other religious group except Catholics and Baptists Exploring the deeper stories within such survey data Zuckerman shows that leaving one's faith is a highly personal complex and drawn out process And he finds that rather than the cliché of the angry nihilistic atheist apostates are life affirming courageous highly intelligent and inquisitive and deeply moral Zuckerman predicts that this trend toward nonbelief will likely continue and argues that the sooner we recognize that religion is frequently and freely rejected by all sorts of men and women the sooner our understanding of the human condition will improve The first book of its kind Faith No More will appeal to anyone interested in the New Atheism and indeed to anyone wishing to more fully understand our changing relationship to religious faith Towards Better Disagreement Paul Hedges, 2016-09-21 Considering common

topics of disagreement between atheists and religious believers Hedges exposes the truth about issues such as gender violence and science Rejecting the popular perception of atheism and religion as polar opposites he advocates for better understanding and better disagreement between the two Atheism and Secularity Phil Zuckerman,2009-12-21 This important two volume contribution to the field of secular studies offers the first comprehensive examination of atheists and non religious people around the world Who are atheists How does atheism relate to various aspects of our social world such as politics feminism globalization and the family And what is the current state of atheism internationally Atheism and Secularity addresses the growing interest in the non religious world by exploring these and related questions It is a comprehensive and compelling look at atheists and atheism both nationally and internationally covering a range of topics often overlooked in other books on the subject Atheism and Secularity is not a philosophical polemic work but rather an exploration of who atheists are what they believe how they relate to the world and how the world relates to them The first volume focuses on topics such as family life gender sexuality politics and social movements The second volume looks at atheism and secularity around the world exploring the lives of non religious people in North America Japan China India Europe the Arab World and other locations Science and Religion John M. Duffey,2013-06-12 Follow the Right Reverend Bishop John M Duffey as he explains the duality of human understanding the complementary natures of science and religion and the various perspectives regarding the compatibility of science and religion In this book Duffey demonstrates the error in believing that science and religion conflict or are incompatible Science and Religion is a journey through the definitive and complementary natures of religion all religions and science on to an explanation and demonstration of their individual and combined contributions to the whole of human universal understanding By the end of this marvelous tour of contemplation the reader will be left with greater enlightenment regarding science religion and human perception and responsibility

multinational team of contributors provide interdisciplinary case studies covering Estonia Latvia Lithuania Russia Ukraine Poland the Czech Republic Slovakia Hungary Croatia Romania and Bulgaria This approach utilises perspectives from social and intellectual history in combination with sociology of religion in order to cover the historical development of secularity and secular thought complemented with sociological data The study is framed by methodological and analytical chapters Offering an important geographical perspective to the study of freethought atheism secularity and non religion this wide ranging book will be of significant interest to scholars of twentieth century social and intellectual history sociology of religion and non religion cultural and religious studies philosophy and theology **Recognizing the Non-religious** Lois

Lee, 2015-07-30 In recent years the extent to which contemporary societies are secular has come under scrutiny At the same time many countries especially in Europe have increasingly large nonaffiliate subjectively secular populations whilst nonreligious cultural movements like the New Atheism and the Sunday Assembly have come to prominence Making sense of secularity irreligion and the relationship between them has therefore emerged as a crucial task for those seeking to understand contemporary societies and the nature of modern life Drawing on ethnographic fieldwork in southeast England *Recognizing the Non religious* develops a new vocabulary theory and methodology for thinking about the secular It distinguishes between separate and incommensurable aspects of so called secularity as insubstantial involving merely the absence of religion and substantial involving beliefs ritual practice and identities that are alternative to religious ones *Recognizing the cultural forms* that present themselves as non religious therefore opens up new more egalitarian and more theoretically coherent ways of thinking about people who are not religious It is also argued that recognizing the nonreligious allows us to reimagine the secular itself in new and productive ways This book is part of a fast growing area of research that builds upon and contributes to theoretical debates concerning secularization desecularization religious change postsecularity and postcolonial approaches to religion and secularism As well as presenting new research this book gathers insights from the wider studies of nonreligion atheism and secularism in order to consolidate a theoretical framework conceptual foundation and agenda for future research *Encyclopedia of Religion and Society* William H. Atheism in Central and Eastern Europe Jenny Vorpahl, Dirk Schuster, 2020-06-08 This book brings together case studies dealing with historical as well as recent phenomena in former socialist nations which testify the transfer of knowledge about religion and atheism The material is connected on a semantic level by the presence of a historical watershed before and after socialism as well as on a theoretical level by the sociology of knowledge With its focus on Central and Eastern Europe this volume is an important contribution to the research on nonreligion and secularity The collected volume deals with agents and media within specific cultural and historical contexts Theoretical claims and conceptions by single agents and or institutions in which the imparting of knowledge about religion and atheism was or is a central assignment are analyzed Additionally procedures of transmitting knowledge about religion and atheism and of sustaining related institutionalized norms interpretations roles and practices are in the focus of interest The book opens the perspective for the multidimensional and negotiating character of legitimation processes being involved in the establishment or questioning of the institutionalized opposition between religion and atheism or religion and science

Annual Review of the Sociology of Religion. Volume 7 (2016) Roberto Cipriani, Franco Garelli, 2016-06-27 Recent studies show that atheism is increasing The reasons for this development have not as yet been examined thoroughly Many atheists continue to be residual groups in surveys on religiosity making it difficult to examine who they are and why they have chosen to be atheists Moreover they are minority groups in most countries former Soviet bloc countries are left out of discussion many do not identify with any organized groups of atheists or agnostics Atheist groups and ideologies then represent a wide range of attitudes behaviour and ways of acting towards religion The lack of a clear definition of what being atheist or an unbeliever means today invites us to study the issue in greater depth This volume represents a first attempt at understanding and scrutinizing atheism Thanks to all contributors it provides both a global perspective and specific insights into specific cases
