Early Ecotheology and Joseph Sittler Panu Pihkala,2017 When did Christians begin to address environmental questions What can be learned from these pioneering thinkers This study reveals that between 1910 and 1954 many theologians called for responsibility towards nature The focal point is the work of Joseph Sittler 1904 1987 an American Lutheran and ecumenical theologian The role of these early ecotheologians is discussed in relation to environmental history and education The findings show that ecotheology was not as strongly separated from other environmentalism as it was after the 1960s Series Studies in Religion and the Environment Studien zur Religion und Umwelt Vol 12 Subject Religious Studies Environmental Studies Ecotheology Joseph Sittler **The Blackwell Companion to Science and Christianity** J. Analytic Philosophy of Religion James Franklin Harris, 2013-03-14 When Gene Long editor of Kluwer's Handbook of Contemporary Philosophy of Religion Series first invited me to write the volume on Analytic Philosophy of Religion I accepted with great enthusiasm My only explanation for that enthusiasm now is that I was younger and more naive at the time Soon after starting work on the volume my enthusiasm was dampened by the daunting magnitude of the task I began as a sprinter and quickly settled into the pace of a long distance runner Although I considered myself well read in the subject I soon discovered that I had a great deal of research to do to be confident that I had considered all of the major contributions to the various discussions issues and of religion As I read more and more problems found within analytic philosophy books and articles I realized that I had rushed into a territory already well trodden by the angels I am greatly impressed by the sophistication and subtlety of philosophical argument that characterize the different debates in contemporary analytic philosophy of religion This volume covers a vast amount of material I have endeavored to provide the fairest possible reading of different authors and in cases where I include my own critical evaluations and develop my own positions I have endeavored to provide the strongest possible interpretations of the positions I criticize

The Oxford Handbook of Religion and Ecology Roger S. Gottlieb, 2006-11-09 Ecologically oriented visions of God the Sacred the Earth and human beings The proposed handbook will serve as the definitive overview of these exciting new developments Divided into three main sections the book's essays will reflect the three dominant dimensions of the field Part I will explore

Faith in America Charles H. Lippy, 2006-09-30 Over the last 25 years there has been much talk of the presumed decline in religious participation in America In addition from the 1960s on surveys that mark the influence of religion in American life have shown a mixed response Many suggest that religion is losing influence in the culture as a whole others indicate that while organized religion may be experiencing challenges spirituality is on the upswing At the same time however there have been signs that religious life in the U S is extraordinarily healthy But religion in America has changed to be sure in a number of ways And it has changed us and our culture in return This timely set looks at the major forces that are changing the shape of religion in American life With an influx of immigrants from Asia Latin America and other regions the diversity of religion has grown to include Buddhism Hinduism Islam and other faiths Latin American and African American communities have experienced changes in the ways they practice their faith and in turn influence American culture in general Women have

entered the clergy in record numbers and the push for allowing women and gays to enter the clergy in religions that limit or prohibit their roles is on the increase In addition gay couples are leading the same sex marriage movement and other social issues such as abortion stem cell research end of life care etc are still being debated Interest over how people actually live out their religion or spirituality has mushroomed in recent decades thanks in part to the information revolution and popular culture What folks do when they gather together to worship and where they come together has changed dramatically with the advent of the Internet and the role of sports in American life So much has changed and faith in America has become more important than ever as part of our culture our way of life and the way we relate to each other and the world around us The essays found in these pages shed light on our understanding of these transformations and help us comprehend the enormous role of religion in our society and in our world

Religion and the Natural Sciences James E. Huchingson, 2005-02-07 The first half of *Religion and the Natural Sciences* is an introduction to the discussion of science and religion Here the reader learns why there is any debate at all and what resources exist for responding to it The second half deals with specific issues that arise in the individual sciences from astronomy and physics to biology and ecology Any project hoping to connect science and religion must supply the categories of connection which are found primarily although not exclusively in philosophy The simplicity of the arrangement and the nature of the selections are intended to make *Religion and the Natural Sciences* available to as wide an audience as possible including students from the sciences and technology the professions the humanities and liberal studies and theology

This Sacred Earth Roger S. Gottlieb, 2003-11-07 Updated with nearly forty new selections to reflect the tremendous growth and transformation of scholarly theological and activist religious environmentalism the second edition of *This Sacred Earth* is an unparalleled resource for the study of religion s complex relationship to the environment

Science And Theology Ted Peters, 2019-05-20 How can we think about God s action in a quantum world of indeterminacy in a world that began with a Big Bang in a world in which life evolved and is continually evolving in a world governed by entropy and heading toward its eventual heat death These are some of the most perplexing questions that have arisen from the rapid scientific and techno

Saving Nature Tarjei Rønnow, 2011 Environmentalism has moved into the center of the most influential social movements in late modernity From preserving pre industrial landscapes advocating the intrinsic value of nature and protecting ecosystems against overexploitation it has developed into a worldview ethos and practice that is radically shifting the frontiers of politics economics and ethics *Saving Nature* approaches environmentalism as a belief system The book explores the impact of environmentalism on faith communities and vice versa and analyzes how environmental worldviews values attitudes and discourses affect religion By drawing on sources in the sociology of religion

and environmental sociology it sheds light on the religious dimensions of environmentalism It locates the quick growth of environmentalism in the history of allegedly secular modernity and interprets environmentalism in the context of modernity's re-sacralization Series Studies in Religion and the Environment Studien zur Religion und Umwelt Vol 4 The Revelation of Nature Paul Matthews, 2017-07-05 This title was first published in 2001 The Revelation of Nature embraces pragmatism aesthetics and metaphysics in an effort to narrate a fundamental relationship between the contemporary world and the natural source and site for any world of meaning Beginning with an exploration of Heidegger's seminal insight into the way we exist that human existence must be understood in its everydayness Matthews links these ideas to Heidegger's interpretation of the development of Western history in terms of its grounding metaphysical determinations to do with truth reality and the nature of things Matthews concludes that our everyday lives are informed and shaped by intellectual precepts and normative modes of behaviour that promote the combination and enslavement of both nature and ourselves within a mass technological grid This book breaks new ground in theology without underpinning the analysis with a particular religious viewpoint A Greener Faith Roger S. Gottlieb, 2009-10 world making political agenda that far exceeds interest group politics applied to forests and toxic incinerators Rather religious environmentalism offers an all inclusive vision of what human beings are and how we should treat each other and the rest of life Gottlieb analyzes the growing synthesis of the movement's religious social and political aspects as well as the challenges it faces in consumerism fundamentalism and globalization **Sourcebook of the World's Religions** Joel Beversluis, 2011-02-08 Now in its third edition this is the most comprehensive work available on the rich variety of paths available to today's spiritual seekers More than an academic reference it explores how religions can collaborate to help the world Essays exploring the realm of building an interfaith community add to the book's detailed portraits of the major religious traditions The Sourcebook also contains essays on spiritual practices as diverse as theosophy wicca and indigenous religions This revised edition of the Sourcebook offers an unparalleled look at where spirituality is headed in the coming millennium *Barth and Ecotheology* Adrian Langdon, 2025-03-31 Barth and Ecotheology offers a critical and constructive reading of Karl Barth's theology in the context of the Anthropocene It reflects on how a contemporary doctrine of creation must be broad enough to address issues such as climate change colonialism and racism sexism as well as integrating modern science Such a theology would resist the human domination of nature and the various forms of displacement occurring in modernity With Barth the author contends that a theology of creation grounded in the self-revelation of God in Jesus Christ is the best place to rethink what it means to be human and to exist within the community of creation Nevertheless if we are to affirm the livingness of the world creaturely differences and a central place for land and place then critical additions to Barth are needed To accomplish this the book provides constructive reinterpretations of Barth's theological method doctrine of God creation by the Word and Spirit anthropology and reconciliation What emerges is a vision of the triune God of love as the source and ground of all that is

Along the way Barth is brought into dialogue with ecotheology as well as theologians such as Wolfhart Pannenberg Dietrich Bonhoeffer and Bruce McCormack The volume will be of particular interest to theologians focused on the doctrine of creation ecotheology and Barth studies **Revelation and the Environment, AD 95-1995** Patmos Symposium 1995, Patmos, Greece, Jane Lubchenco, 1997 This book is the culmination of a remarkable symposium held at sea to mark the 1900th anniversary of the writing of the Book of Revelation by the Theologian St John Also known as the Apocalypse it was the source of inspiration for 200 scientists religious leaders philosophers economists and policy makers from all over the world to come together and contemplate the dangers to the planet s survival due to wasteful abuses of the environment particularly the oceans The Book of Revelation and the Environment AD 95 1995 provides a forum to integrate current scientific knowledge with a spiritual approach so as to ensure careful stewardship of the earth s finite resources Publisher s website
