Foster,Keith A. Crawford,2006-04-01 The pages of this book illustrate that as instruments of socialization and sites of ideological discourse textbooks are powerful artefacts in introducing young people to a specific historical cultural and socioeconomic order Crucially exploring the social construction of school textbooks and the messages they impart provides an important context from within which to critically investigate the dynamics underlying the cultural politics of education and the social movements that form it and which are formed by it The school curriculum is essentially the knowledge system of a society incorporating its values and its dominant ideology The curriculum is not our knowledge born of a broad hegemonic consensus rather it is a battleground in which cultural authority and the right to define what is labelled legitimate knowledge is fought over As each chapter in this book illustrates curriculum as theory and practice has never been and can never be divorced from the ethical economic political and cultural conflicts of society which impact so deeply upon it We cannot escape the clear implication that questions about what knowledge is of most worth and about how it should be organized and taught are problematic contentious and very serious **Education and Society** Jackson Mobisa Mogeni,Locha Erukudi,Everylyne Achieng Owuor,Rachael Mwende,Garat Hassan Osman,2023-11-06 TOPICS IN THE BOOK Extent of

Paradigm Shift of Education Governance in China Yan Wang,2019-10-16 The book addresses the paradigm shift in
education governance in China through a study of two legislation episodes in China the 1986 Compulsory Education Law and
the 2006 Compulsory Education Law Amendment The research began with two broad questions how was the Compulsory
Education Law made and amended Why was it made and amended Using ethnographic interviews and documentary analysis
as the main research methods more specific questions on both legislative processes were delved into as the research evolved
What were the driving forces behind the 1986 and 2006 legislation What values of compulsory education were assumed in
their central decisions What was the institutional rationale underpinning them Data was collected through ethnographic
interviews with key informants involved in the policymaking process The research findings were analyzed and presented on
the basis of narration analysis The policymaking process of the legislation was then analyzed from three paradigms agenda
setting decision making and organizational behavior Finally by examining the results of the previous stages of analysis and
further comparing the two cases the research arrived at a theoretical framework for education governance that embraces
three essential elements political ideology perceived value of education and institutional rationale A thorough analysis of the
two legislative processes identified that the political ideology which shifted from efficiency oriented economic well being to
equity oriented social cohesion steered the agenda setting of the compulsory education legislation The perceived value of
education reflects the role that education plays in development changing from economic value to social value The
institutional rationale essentially determines strategies by which compulsory education materializes with a variance from
governing by goal and mobilization to governing by accountability and regulation In conclusion education governance in
China witnessed a paradigm shift from economic instrumentalism to social rationalism between mid 1980s and 2006
