*Sustainability and Small and Medium-sized Enterprises* Aharon Factor,John Parm Ulhøi,2021-03-29 Industrialisation has brought great benefits to humankind but now after 200 years of fossil fuel use land clearance and pollution the planet s boundaries are being stretched to their limits Going beyond these confines would have severe consequences for humankind To prevent this from happening government corporate and community initiatives must focus on reducing the environmental impact of approximately 400 million small and medium sized enterprises SMEs given that they produce approximately 70% of the world s pollution 60% of carbon emissions and have a significant impact on land To date research shows that SMEs have been environmental laggards and more needs to be understood to improve sustainability in the SME sector Broadening the researcher s methodological focus beyond traditional singular approaches improves knowledge generation and better informs policy and practice This book paves the way by showing the reader that a mixed method research design is able to provide a deep diverse and holistic understanding of sustainability and SMEs Importantly the book also provides an in depth mapping of mixed method sustainability and SME research at a regional level As this book is about environmental sustainability framed in a business context it will be of interest to researchers academics students and those in industry who are enquiring about the environmental sustainability of SMEs

*Justifying Entrepreneurship*  
Devi Akella, Niveen L. Eid, 2023-11-14

This book on entrepreneurship compiles a series of evidence-based episodes from the lives of the marginalized and the minority-oriented entrepreneurs to comprehend whether entrepreneurship is truly a socio-economic emancipatory strategy. Varying experiences of entrepreneurs from different geographical territories, origins, and gender are examined under a critical lens to deconstruct its emancipatory potential and appreciate its power in generating human freedom, equal opportunities, and in uplifting the oppressed and suppressed classes globally. In specific, the book explores entrepreneurs located in two geographically diverse regions across the world: The social entrepreneurs in the contested region of Palestine and the black and ethnic entrepreneurial group based in Georgia, United States. The book is a planned and purposeful compilation of raw i.e. in terms of emotions and feelings, untold stories of entrepreneurs who have embraced entrepreneurship to eradicate their harsh realities and subsequently emancipate themselves. The book integrates a critical perspective encompassing a variety of theoretical frameworks such as critical race theory, critical theory, critical realism, and different power modalities and philosophies to investigate the emancipatory potential of entrepreneurship and justify it as a socio-economic emancipatory strategy. This book ventures into the murky and dark waters of entrepreneurship by exploring this concept within the black and immigrant communities as a collective social entrepreneurship reform movement. Female entrepreneurship, informal entrepreneurship operating under occupation, to provide detailed insights on bricolage and other complexed economic issues.

are fixed in quantity and once used cannot be reused except through being reused in one form or another This is particularly true of the mineral resources of the planet These are finite in quantity and once fully extracted extra quantities are no longer available for future use This book argues and presents evidence that the remaining mineral resources are diminishing significantly and heading towards exhaustion Once mined and consumed they are no longer available for future use other than what can be recycled and reused This book demonstrates that future scarcity means that best use must be made of what exists as sustainability depends upon this and best use is defined as utility rather than economic value which must be considered at a global level rather than a national level Moreover sustainability depends upon both availability in the present and in the future so the use of resources requires attention to the future as well as to the present This book investigates the alternative methods of achieving the global distribution of these mineral resources and proposes an optimum solution This book adds to the discourse through the understanding of the importance of the depletion and finiteness of raw materials and their use for the present and the future in order to achieve and maintain sustainability *Philosophical Reflexivity and Entrepreneurship Research* Alain Fayolle, Stratos Ramoglou, Mine Karatas-Ozkan, Katerina Nicolopoulou, 2018-05-15

Philosophy is inescapable This is the powerful mantra and call to action of this authoritative and informative collection of essays Acting upon the conviction that empirical scrutiny only takes us so far in understanding the full nature of entrepreneurship this text provides a set of thoughtful and refreshing commentaries on the different ways in which philosophical assumptions shape entrepreneurship research Entrepreneurship scholarship will be richer for the reading of it Denise Elaine Fletcher Professor of Entrepreneurship and Innovation University of Luxembourg Luxembourg This book offers the reader a variety of philosophical ideas and approaches to spur reflection on taken for granted assumptions about what entrepreneurship is and the ways entrepreneurship scholars understand this phenomenon The chapters in this book go beyond critiquing current ideas and perspectives rather the book opens up important lines of inquiry in such topic areas as uncertainty the imagination social construction critical realism and the nature of failure I expect that many of the insights from this book will provide directions for major avenues of entrepreneurship scholarship over the next decade Scholars who want clues about the future direction of the entrepreneurship field would be wise to explore this book William B Gartner Bertarelli Foundation Distinguished Professor of Family Entrepreneurship Babson College USA **Handbook of**
