Schroeder, Lynne Chester, 2013-11-19 Political economy focuses on issues that are fundamental to individual and collective well being and rests on the proposition that economic phenomena do not occur in isolation from social and political processes One leading Australian political economist is Frank Stilwell Highlights of his work include concerns with the creation and use of wealth inequalities between rich and poor the spatial implications of economic growth and the tensions between economic growth and the environment Stilwell has been especially prominent in developing alternative economic policies with seminal contributions to understanding the radical shift in Australian economic and social policies since the early 1980s He has also been a leader in the teaching of political economy to many cohorts of first year university students This collection spanning these themes honours Stilwell s contribution to Australian political economy after more than 40 years teaching at the University of Sydney The book provides not only an opportunity to appreciate his contribution but also a greater understanding of these themes which remain of crucial contemporary relevance

Sustainable Neighbourhoods in Australia Raymond Charles Rauscher, Salim Momtaz, 2015-04-21

This book examines the planning and implementation of policies to create sustainable neighborhoods using as a case study the City of Sydney. The authors ask whether many past planning and development practices were appropriate to the ways that communities then functioned and what lessons we have learned. The aim is to illustrate the many variations within a city and from neighborhood to neighborhood regarding renewal, rehabilitation, redevelopment, replacement, and new development. Case study examples of nine City of Sydney neighborhoods note the different histories of planning and development in each. Features of the studies include literature searches, field work with photography and analysis. The authors propose a set of sustainability principles which incorporate elements of the twenty-seven principles of the 1992 Rio Declaration on Environment and Development. Part One explores sustainable urban planning and the importance of planning tools that enable best planning outcomes for communities and investors. Common factors in the nine case study neighborhoods are renewal, redevelopment, and development pressures affecting Sydney from the 1970s to 2014. Also discussed are the differing circumstances of planning faced by authorities, developers, and communities in each of the study areas. Part Two of the book is focused on the case study areas in City of Sydney: East area, Woolloomooloo and Kings Cross. Part Three covers case study areas in Sydney's Inner South area: Chippendale, Redfern, and Waterloo District. Part Four surveys the Inner West suburb of Erskineville. Part Five looks at the City West area including the Haymarket District and the Pyrmont and Ultimo District. Part Six concentrates on the North West area suburb of Glebe. Part Seven of the book looks at the growth area of South Sydney District which includes the suburbs of Beaconsfield, Zetland, and the new localities of Victoria Park and Green Square. The authors recount lessons learned and outline directions of planning for sustainable neighborhoods. Finally, the authors challenge readers to apply the lessons of these case studies to further advances in sustainable urban planning.
