Reshaping The Us Left:

Shaping U.S. Military Forces for the Asia-Pacific Michael R. Kraig, 2014-06-04 The first twenty years of post Cold War US defense and diplomatic policies toward Asia have looked a good deal like the previous 50 namely continued deterrence based upon overwhelming offensive military predominance In East Asia all powers harbor common and divergent interests based on fragmented nationalist identities and complex economic interdependence In this multipolar Asian system new Chinese military capabilities could support both the wish to secure its own interests as well as a more expansive vision for regional leadership which might harbor a destabilizing geopolitical agenda How the United States addresses this reality via military procurements and employment concepts for the Asian theater could either detract from or enhance crisis stability The US defense establishment must reorient its force posture to save money manage conflicts of interest and prevent future interstate crises This analysis provides a framework for how the United States should ideally structure and use military power so as to best support the diplomatic resolution of conflicting interests without resorting to full scale warfare It also critiques the usual Western military focus on offensive strategic predominance in force postures itself often fuelled by the unrealistic pursuit of the opponent's complete submission via victory in decisive battles

Conservative Philanthropies and Organizations Shaping U.S. Educational Policy and Practice Kathleen deMarrais, Brigitte A. Herron, Janie Copple, 2020-09-10 American public education has been under assault for the last few decades as a broken system that needs a complete overhaul In large part these opinions are offered by people and organizations who know little about schools But who are these influencers This book is about conservative philanthropies the organizations and individuals within their networks and the strategies they use to shape educational policy and practice in K 12 and higher education Each chapter examines a philanthropy philanthropic network or corporation focused on pushing an agenda of individualism privatization and conservative ideologies Based in extensive research including the tax filings of specific philanthropic foundations the authors demonstrate how the philanthropic elite work within federal state and local governmental contexts to influence policy and practice Within a global context of increasing wealth inequality the authors question the motivations of these privileged few to withhold tax dollars from the US treasury where duly elected representatives can determine how tax dollars are used to benefit society By allowing these philanthropic organizations tax exemptions under the guise of assumed benevolence are citizens giving up their ability to hold these organizations accountable for how the money is spent This book aimed at a general audience of educators provides the in depth knowledge necessary to understand and resist private control of public policies and institutions

Radicalism at the Crossroads Dayo F. Gore, 2012-10-01 With the exception of a few iconic moments such as Rosa Parks's 1955 refusal to move to the back of a Montgomery bus we hear little about what black women activists did prior to 1960 Perhaps this gap is due to the severe repression that radicals of any color in America faced as early as the 1930s and into the Red Scare of the 1950s To be radical and black and a woman was to be forced to the margins and consequently these women's stories have been deeply buried and all but forgotten by the general public and historians alike In this exciting work of historical recovery Dayo F. Gore unearths and examines a dynamic extended network of black radical women during the early Cold War including established Communist Party activists such as Claudia Jones artists and writers such as Beulah Richardson and lesser known organizers such as Vicki Garvin and Thelma Dale These women were part of a

black left that laid much of the groundwork for both the Civil Rights Movement of the 1960s and later strains of black radicalism. Radicalism at the Crossroads offers a sustained and in depth analysis of the political thought and activism of black women radicals during the Cold War period and adds a new dimension to our understanding of this tumultuous time in United States history. *Shaping US Military Law* Joshua E. Kastenberg, 2016-04-01 Since the United States entry into World War II the federal judiciary has taken a prominent role in the shaping of the nation's military laws. Yet a majority of the academic legal community studying the relationship between the Court and the military establishment argues otherwise providing the basis for a further argument that the legal construct of the military establishment is constitutionally questionable. Centering on the Cold War era from 1968 onward this book weaves judicial biography and a historic methodology based on primary source materials into its analysis and reviews several military law judicial decisions ignored by other studies. This book is not designed only for legal scholars. Its intended audience consists of Cold War military and political historians as well as political scientists and military and national security policy makers. Although the book's conclusions are likely to be favored by the military establishment the purpose of this book is to accurately analyze the intersection of the later twentieth century's American military political social and cultural history and the operation of the nation's armed forces from a judicial vantage. *Impacts of Mobile Use and Experience on Contemporary Society* Xu, Xiaoge, 2019-03-22 As a popular and powerful medium mobile use has increased significantly across the world. Kankam-Da-Costa, 2012-10 Whenever a society stands bold enough to tackle controversial issues and inspire the people collectively to solve problems it makes a far reaching positive impact on the stability growth and development of a nation. *Environment and Planning*, 1990. *Shaping a Global Theological Mind* Darren C. Marks, 2017-11-28 Theological thinkers are placed into contexts which inform their theological tasks but that context is usually limited to a European or North American centre usually ignoring minorities and lesser mainstream theologies even in that context. This work focuses on the shift of Christian theological thinking from the North Atlantic to the Global South even within the North Atlantic Church and Academy. It gives a Global perspective on theological work method and context. Theologians from North America

Great Britain and Europe Africa Asia Central and South America comment on how their specific context and methodology manifests organizes and is prioritized in their thought so as to make Christian theology relevant to their community By placing the Global South alongside the newly emerging presence of non traditional Western forms such as Pentecostal Aboriginal and Hispanic theologies and theologians a clearer picture of how Christian theology is both enculturated and still familial is offered

The Other Alliance Martin Klimke,2011-09-04 Using previously classified documents and original interviews The Other Alliance examines the channels of cooperation between American and West German student movements throughout the 1960s and early 1970s and the reactions these relationships provoked from the U S government Revising the standard narratives of American and West German social mobilization Martin Klimke demonstrates the strong transnational connections between New Left groups on both sides of the Atlantic Klimke shows that the cold war partnership of the American and German governments was mirrored by a coalition of rebelling counterelites whose common political origins and opposition to the Vietnam War played a vital role in generating dissent in the United States and Europe American protest techniques such as the sit in or teach in became crucial components of the main organization driving student activism in West Germany the German Socialist Student League and motivated American and German student activists to construct networks against global imperialism Klimke traces the impact that Black Power and Germany s unresolved National Socialist past had on the German student movement he investigates how U S government agencies such as the State Department s Interagency Youth Committee advised American policymakers on confrontations with student unrest abroad and he highlights the challenges student protesters posed to cold war alliances Exploring the catalysts of cross pollination between student protest movements on two continents The Other Alliance is a pioneering work of transnational history
